A GRAMMAR
OF THE
IRISH LANGUAGE

FOR THE USE OF SCHOOLS.

BY

P. W. JOYCE, LL. D., T. C. D., M. R. I. A.,

ONE OF THE PROFESSORS IN THE TRAINING DEPARTMENT OF THE COMMISSIONERS
OF NATIONAL EDUCATION, IRELAND.

NEW YORK:
PRINTED BY LYNCH, COLE & MEEHAN,
AT THE OFFICE OF THE "IRISH-AMERICAN,"
No. 12 WARREN STREET.
1879.

Melther's Collection

1225

P R E F A C E .

THOUGH this text-book is small, it comprises, I believe, everything necessary—so far as grammar is concerned—for a student of modern Irish. I have not treated at all of the ancient forms of the language; and I have excluded everything in the shape of dissertation: the grammar of the modern Irish language, and no more, is here set forth, in words as few and simple as possible. I have not suggested any changes either in spelling or in grammatical forms, or attempted innovation of any kind: this is a grammar of the language as it actually exists in the works of our best writers. All the illustrative examples are quotations from standard Irish writings; but though I retain the references, I have not given them in the grammar, as they would encumber the book, and impede, rather than facilitate the learner. I may mention here, however, that the works from which the examples are chiefly taken, are, those of Keating, the publications of the Ossianic Society, “The Three Sorrowful Stories of Erin” (viz., “The Fate of the Children of Usna,” “The Fate of the Children of Lir,” and “The Fate of the Children of Turen”), and occasionally “The Annals of the Four Masters.” The language of the various works published by the Archaeological and Celtic Societies is generally too antiquated to be quoted in a grammar of modern Irish. I have all through given word-for-word translations of the examples: free translations would have been more pleasant to read, but would have added considerably to the learner’s difficulty. In the last Part—“Idioms”—I have given a popular rather than a scientific explanation of the principal idioms of the language. Nothing like this is to be found in any other Irish Grammar; and I believe that the learner who masters it will be saved much labor and perplexity. There are several other Irish Grammars, but none low enough in price to be within reach of the many. Whoever wishes to study the Irish language in its ancient as well as in its modern forms, must procure O’Donovan’s Grammar; without this great work no one can attain a thorough knowledge of the language. I may also mention “The College Irish Grammar,” by the Rev. Ulick J. Canon Bourke, in which there is a great amount of miscellaneous information on the language, proverbs, and popular literature of Ireland. The labors of the Society for the Preservation of the Irish Language have lately given a great impetus to Celtic studies. The Society has produced three admirable little elementary books (the First, Second and Third Irish Books),—all drawn up by the members themselves on the plan of the elementary works of Smith, Arnold, Ahn, &c. But the want of a very cheap and simple text-book on Irish Grammar has been much felt; and this Grammar has been written to supply the want. I have written it with the cognisance of the Council of the Society, of which I am myself a member. It was at first intended that the name of the Society should appear on the title-page along with my own name, and a resolution to that effect was passed by the Council. But I found some difficulty as to the exact words, and I have accordingly contented myself with mentioning the matter here. I acknowledge with thanks that I have received valuable assistance from several gentlemen of the Society, who read every word of my proofs, suggesting various corrections, alterations, and improvements. One member in particular, Mr. John Fleming, of Rathgormack, in the county Waterford, read all my manuscript in the first instance, and all the proof-sheets afterwards. Mr. Fleming’s assistance was invaluable to me, for he possesses an intimate knowledge of modern Irish Grammar, language, and literature, and, what is still better, much sound sense and clear, critical judgment.

DUBLIN, *November, 1878.*

SCHOOL

IRISH GRAMMAR.

PART I.

ORTHOGRAPHY.

CHAPTER I.

SOUNDS.

I. LETTERS.

1. The Irish alphabet consists of eighteen letters, of which thirteen are consonants and five are vowels.

2. The five vowels are α , e , ɿ , o , u ; of which α , o , u are broad, and e , ɿ are slender.

3. Each consonant (with the exceptions mentioned below) has a broad and a slender sound. When a consonant comes immediately after or before a broad vowel, it has its broad sound: when it comes after or before a slender vowel, it has its slender sound. But this does not apply to b , ɸ , h , m , p , each of which has one sound only, whether joined with a broad vowel or a slender vowel.

4. Vowels are either long or short. A long vowel is usually marked by an accent; as $\acute{b}\acute{a}\eta$, white: a short vowel has no mark; as $\text{m}\grave{a}\text{c}$, a son.

5. The Irish vowels, like the English, have an obscure sound in unaccented syllables, of which it is not necessary to take further notice here.

6. The following are the usual sounds of the Irish letters, so far as they can be represented by English letters:—

7. Those marked with asterisks are only imperfectly represented in sound by the corresponding English letters: those not so marked are represented perfectly or nearly so.

8. The sounds of the marked letters must be learned by ear: it is hardly possible to give in writing such a description of them as would enable a learner to utter them.

9. C is equal to *k*, yet when it comes before the diphthong *ao*, or the triphthong *aoi*, beginners find it very hard to sound it: *caol* (narrow) is neither *kaul* nor *quail*, but something between; *caoín* (gentle) is neither *keen* nor *queen*, but something between

10. So also with *g*, which (broad and slender) is equal to *g* in *got* and *get*: yet *gaoil* is hard for a beginner to utter, being neither *gail* nor *gwail*, but something between.

11. The Irish broad *ð* and *τ* bear the same relation to each other as the English *d* and *t*; that is, the first in each case is flat and soft, and the second sharp and hard. English *d* and *t* are sounded by placing the tip of the tongue against the roof of the mouth; Irish *ð* and *τ* by placing the top of the tongue against the upper front teeth. Irish *ð* and *τ* may be described in another way: the two sounds of *th* in *those* and *thumb* are both *continuous*, the first flat, the second sharp. Now the two *explosive* sounds corresponding to these two continuous sounds (*i.e.*, with the tongue in the same position), are exactly the Irish *ð* and *τ*.

12. Broad *l* and *n* are sounded by placing the top of the tongue (not against the roof of the mouth as in case of English *l* and *n*, but) against the upper front teeth. Irish *ð* and *τ* are to English *d* and *t* as Irish *l* or *n* to English *l* or *n*.

13. Slender *μ* is the most difficult of all the Irish consonantal sounds; and learners, unless they have acquired it in youth, often fail to articulate it correctly, though the teacher may sound it over and over again for their imitation.

14. As *h* represents a mere breathing or aspiration, and not an articulate sound, and as it never begins a word, some writers exclude it from the letters, thus making seventeen instead of eighteen, as given here.

TABLE OF SOUNDS.

Letters.		Vowel long or short.	Consonant broad or slender.	Irish sounds.	Corresponding English sounds.
Irish.	Eng.				
Ḃ	a	a	long	lan	lawn, ball
Ḃ	"	"	short	mac	hat or what
Ḃ	b	b	--	ball	ban
Ḃ	c	c	--	cab	cob
Ḃ	"	"	--	cinn	king
*	Ḃ	d	--	dall	those
	"	"	--	dian	cordial
*	Ḃ	e	long	mé	date
	"	"	short	—	met
Ḃ	f	f	--	finn	fin
Ḃ	g	g	--	gort	got
Ḃ	"	"	--	geir	get, gimlet
Ḃ	h	h	--	h-anam	hammer
Ḃ	i	i	long	min	seen
	"	"	short	min	pin
*	Ḃ	l	--	lon	loné
	"	"	--	file	vermilion
Ḃ	m	m	--	mil	mill
*	Ḃ	n	--	nor	none
	"	"	--	nead	new
Ḃ	o	o	long	mor	more
	"	"	short	dor	love, run
Ḃ	p	p	--	poc	pore
Ḃ	r	r	--	rod	road
	"	"	--	cuir	clarion
*	Ḃ	s	--	sona	son
	"	"	--	sin	sheen
*	Ḃ	t	--	tom	thumb
	"	"	--	teine	courteous
*	Ḃ	u	long	muir	moor, rude
	"	"	short	mac	put, bull

15. The following are the native names of the Irish letters, but they need not be used by the learner. All or most of them are the names of trees:—*a*lm, *a*; *beic*, *b*; *coll*, *c*; *daun*, *d*; *eaða*, *e*; *feann*, *f*; *gort*, *g*; *uaç*, *h*; *ioçai*, *i*; *luir*, *l*; *muin*, *m*; *nuin*, *n*; *oir* or *onn*, *o*; *peic-boç*, *p*; *ruir*, *r*; *ruil*, *s*; *teine*, *t*; *uir*, *u*.

II. DIPHTHONGS.

1. There are thirteen diphthongs in the Irish language—viz. *ae*, *ao*, *eu*, *ja*, *ua*, *aɪ*, *ea*, *eɪ*, *eo*, *io*, *iu*, *oi*, *ui*; of which the first five are always long, and the remaining eight are sometimes long and sometimes short.

2. The following are the sounds of the five long diphthongs:—

3. *ae*, sounds like *ay* in *slay*; as *rae*, the moon, pronounced *ray*.

4. *ao*, in the southern half of Ir land, sounds nearly like *way*, and in the west and north-west something like *we*. Thus *maon*, a steward, is pronounced like *mwair* in the south, and like *mweer* in the west and north-west.

5. *eu* like *ai* in *lair*; as in *feur*, grass, pronounced *fair*.

6. *ja* like *ee* in *beer*; as in *ciai*, dark-colored, pronounced *keer*.

7. *ua* nearly like *oe* in *doer*; as in *Luain*, Monday, pronounced *l-o-un*.

8. The following are the sounds of the eight diphthongs that are sometimes long and sometimes short. When these diphthongs are long there is an accent over one of the vowels: when short there is no accent:—

9. *aɪ* long has an accent over the *a*, and sounds something like the *awi* in *drawing*; as in *caɪn*, tribute, pronounced *caw-in*.

aɪ short is sounded something like the *a* in *valiant* or the *o* in *collier*; as in *maic*, good, whose sound is very nearly represented by *moh*.

In Ulster, *aɪ* short is pronounced like short *e* in *bell*; as in *aɪrroc*, restitution, which is pronounced *eshoc* in the north, and *ashoc* in the south and west.

10. *ea* long has an accent over the *e*, and sounds like *ea* in *bear*; thus *mean*, a finger, is pronounced *mare*.

ea short sounds like *ea* in *heart* (but shorter); as in *fean*, knowledge, pronounced *fass*.

11. *eɪ* long has an accent over the *e*, and sounds like *ei* in *rein*; as *mein*, a course, pronounced *rain*.

eɪ short, like *e* in *sell*; as in *cein*, a basket, sounded like *kesh*.

12. *eo* long has an accent over the *o*, and is sounded nearly like long English *o* with a slight sound of *y* before it; as in *ceol*, music, which will be correctly pronounced if a *k* sound is put before the word *yole*

eo short nearly like *u* in *shut*, with *y* before it; as in *deoc*, drink.

Note.—This diphthong is short in only a very few words.

13. *io* long has an accent over the *i*, and sounds very like *ea* in *hear*; as in *fiun*, wine, pronounced *feen* or *fee-on*.

jo short, nearly like short *i*: as in *ṡṡṡṡṡ*, *myrrh*, which has nearly the same sound as the first syllable of *mirror*.

14. *ṡṡ* long has an accent over the *u*, and has the same sound as the diphthongal English *u* in *tune*; as in *ṡṡṡ*, *wortny*, which is sounded exactly like *few*.

ṡṡ short is sounded like the *u* in *put*, with a *y* before it; as in *ṡṡṡ*, *wet*.

15. *ṡṡ* long has an accent over the *o*, and is sounded like the *oi* in *owing*; as in *ṡṡṡ*, a while, pronounced *fó-il*.

ṡṡ short like the *o* in *love*, with a very short *i* at the end; as in *ṡṡṡ*, the will.

16. *ṡṡ* long, with an accent over the *u*, is sounded like *ooi* in *cooling*; as *ṡṡṡ*, the eye, pronounced *soo-il*.

ṡṡ long, with an accent over the *ṡ*, has nearly the same sound as *we*; as in *ṡṡṡ*, yellow, which is pronounced *bwee*.

ṡṡ short is like the *ui* in *quill*; as in *ṡṡṡṡṡ*, a lark, pronounced *fṡishoge*.

III. TRIPHTHONGS.

1. There are commonly reckoned five triphthongs, which are always long:—*ṡṡṡ*, *ṡṡṡ*, *ṡṡṡ*, *ṡṡṡ*, *ṡṡṡ*.

2. *ṡṡṡ* is sounded very like *we*, as in *ṡṡṡṡṡ*, wealth, pronounced *mween*.

3. *ṡṡṡ* is sounded like the *yoi* in the combination *yó-ing*; as in *ṡṡṡṡ*, flesh, which will be correctly pronounced if the sound of *f* is put before the combination *yó-il*.

4. *ṡṡṡ* is sounded like *eei* in *seeing*; as *ṡṡṡṡ*, a physician.

5. *ṡṡṡ* like the *ewi* in *mewing*; as *ṡṡṡṡṡ*, gentle.

6. *ṡṡṡ* like *ooi* in *cooling*; as *ṡṡṡṡṡ*, strike, which is sounded *boo-il*.

7. The preceding attempts to represent the sounds of the diphthongs and triphthongs are, in many cases mere approximations. The student must hear them pronounced; and in no other way is it possible to learn to sound them correctly.

IV. VARIOUS SOUNDS.

1. *ṡ* and *o* before *ṡ*, *ṡṡ*, *ṡṡ*, or *ṡṡ*, in monosyllables, and often before *ṡṡ* and *ṡṡ*, are sounded in Munster like the *ou* in *foul*; as *ṡṡṡ*, crooked, and *ṡṡṡ*, hazel, pronounced *cowm* and *cowl*; and *ṡṡṡṡṡṡṡ*, a small glen, pronounced *glounthaun*; and *o* before *ṡ* and *ṡ* has often the same sound; as *ṡṡṡṡṡṡṡ*, learning, pronounced *fowlm*.

2. *ṡṡ* and *ṡṡ* are often sounded like long English *i* in *fine*; as *ṡṡṡṡṡ*, sight, pronounced *ry-ark*; *ṡṡṡṡṡ*, a fork, pronounced *lyre*; *ṡṡṡṡṡ*, a breach, pronounced *mime*.

3. The termination $\alpha\delta$ is pronounced in Connaught nearly the same as *oo*: thus $\text{bu}\alpha\lambda\alpha\delta$, striking, is pronounced *'boolo* in Connaught, but *boola* in Munster.

4. In the combination $\delta\iota$, the δ is silent, and the whole is sounded like *l* or *ll*; as $\text{co}\delta\lambda\alpha\delta$, sleep, pronounced *culla*.

5. In the combination $\lambda\eta$, the η is silent, and the whole is sounded like *l* or *ll*; as $\text{co}\lambda\eta\alpha$, of a body, pronounced *culla*.

6. In the combination $\delta\eta$, the δ is silent, and whole is sounded the same as η or $\eta\eta$; as $\text{c}\acute{\epsilon}\alpha\delta\eta\alpha$, the same, pronounced *kaina*.

7. Final *e* is never entirely silent in Irish as it is in English; thus $\text{m}\eta\eta\epsilon$, smoothness, is pronounced *meena*. In some situations it is very nearly silent in the modern language; as in $\text{c}\mu\text{o}\mu\delta\epsilon$, a heart, pronounced *cree*.

8. There are some Irish consonants which, when they come together in a word, do not coalesce in sound, so that when they are uttered a *very* short obscure vowel sound is heard between them.

This generally occurs in the case of two liquids, or a liquid and a mute. Thus $\text{lo}\mu\zeta$, a track, is pronounced so as to seem, to an ear accustomed to English, a word of two syllables; not *lurg*, but *lurrug*. $\text{Oe}\alpha\lambda\beta$, a shape, is sounded, not *dulo*, but *dillaw*; $\text{r}\epsilon\alpha\mu\beta$, bitter, is sounded *shurraw*; $\text{bo}\mu\beta$, proud, is pronounced *burrub*; $\text{co}\zeta$, a sword, *cullug*, and so on. In Irish prosody, however, such words as these count as only one syllable.

In the English language no such difficulty exists in regard to most of these letters; they coalesce perfectly in sound, so that each of the above words would be a pure monosyllable.

CHAPTER II.

LETTER CHANGES.

I. ASPIRATION.

1. The term "aspiration" is used to express a certain change of sound suffered by some of the Irish consonants under certain grammatical conditions.

2. It is impossible to give a definition of aspiration that will correctly describe all the cases, inasmuch as the changes of sound vary in kind with the several consonants. In most cases the change caused by aspiration is one from an *explosive* to a *continuous* sound.

3. There are nine consonants which can be aspirated, namely, *b, c, d, f, g, m, p, r, t*; these are called mutable or aspirable consonants; the others are called immutable. The aspiration is denoted either by placing a point over the consonant, as \acute{c} ; or by placing *h* after it, as ch .

4. The following are the sounds of the aspirated consonants so far as they can be represented by English letters:—

5. *ϑ*h or *β* is sounded sometimes like *v* and sometimes like *w*, and it often has a sound something between both; as α *β*εαη, his wife, pronounced *a van*; ζαβαλ, a fork, pronounced *gowal*.

6. *ϸ*h broad, has a guttural sound which is not represented in English; but it is heard in the pronunciation of the word *lough*, (Irish, *loc*.) a lake.

*ϸ*h slender (*i.e.*, joined with a slender vowel) has a less guttural sound than *ϸ* broad; as ηϸικαλλ, folly, in which the *ϸ* sound is only a little more guttural than *h* in *mee-heel*.

7. *Ϸ*h and *ζ* have the same sound. When slender, they are sounded like initial *y* in English; as α ζεαη, his love, pronounced *a yan*. *Ϸ*h and *ζ* broad have a guttural sound which cannot be represented by English letters, though it is something like initial *y* or initial *w*; it stands to the guttural sound of broad *ϸ* in the relation of flat to hard. Both these aspirated letters are silent at the end of a word; as Ϸιαδ, a deer, pronounced *fee a*.

But in south Munster the final *ζ* is fully sounded, like *g* in *fig*; as ΚορκαϷ (dative of Κορκαϸ, Cork), pronounced *curkieg* in Munster, but *curkee* elsewhere.

8. *Ϸ*h is always silent; thus α Ϸιορ, his knowledge, is pronounced *a iss*; αη ϷεαδδϷ, the plover, pronounced *an addogue*.

9. *Ϸ*h is very nearly the same as *β*, viz., like *v* or *w*; as α ηϷιαρ, his dish, pronounced *a vee-as*.

10. *Ϸ*h has the sound of *f*, as α Ϸιαη, his pain, pronounced *a fee-an*.

11. *Ϸ*h and *ϸ* are the same as *h*; as α Ϸαλ, his leel, pronounced *a haul*; α ϸοβαρ, his well, pronounced *a hubber*.

II. RULES FOR ASPIRATION.*

1. The possessive pronouns *μο*, my; *δο*, thy; and α, his, as, pirate the first consonant of the next word: as *μο β*ο, my cow; *δο κε*αηη, thy head; α ζοιρ, his garden.

2. The article aspirates in the singular feminine, nominative and accusative;† as αη βεαη, the woman. (See also page 23, paragraph 6, and page 24.)

* These rules cannot be fully understood without a knowledge of Etymology. It must be borne in mind that they apply only to the aspirable or mutable consonants.

† Irish nouns have no inflection for the accusative (or objective) case; but it is often convenient to speak of nouns in the accusative, by which is meant the case where the noun is the object of a transitive verb, or sometimes of a preposition.

3 The article aspirates in the genitive singular masculine; as ἀη ἑταίρου, of the garden.

NOTE.—This rule and the preceding do not apply to the letter ρ. (See, also, page 23, paragraph 6; and page 34.)

4. In compound words, the initial consonant of the second word of the compound is aspirated (with a few exceptions): thus from κεφαλή, a head, and βράσιον, a garment, is formed κεφαλή-βράσιον, head-garment, or canopy. (See also page 36, paragraph 2).

5. The interjections α and Ω, as signs of the vocative case, aspirate; as α ἄνθρωπε, O man.

6. An adjective agreeing with a noun has its initial consonant aspirated when the noun is nominative singular feminine, or genitive singular masculine, or vocative singular of both genders; and, according to O'Donovan, in the nominative plural masculine, when the noun ends in a consonant; as βό βάτη, a white cow; καίτι βάτη, of a white cat; α ἄνθρωπε ἡρόσι, O great man; α βεαή ἡεῖρη, O mild woman; καταρῖν βάνα, white horses. (δ and τ are sometimes excepted: see page 36.)

7. The initial consonant of a verb is aspirated (1) in the infinitive mood by the particles δο and α; as δο δέειν, or α δέειν, to do: (2), in the simple past tense, active voice; as δο ἦεσθε ἦε, he stood: (3) by the particles ἡ, not, and ἡ, it: as ἡ βεῖθε ἡ, she will not be; ἡ ἦεσθε ἡ, if he stands: (4), by the relative α, who, (expressed or understood); as ἀη τῆ α βίασθε, the person who strikes. (See also pages 57 and 59.)

8. The simple prepositions, with some exceptions, aspirate the initial consonants of nouns: as ἀνω βάσιον, on top; εἰς ἡνῆρα, to a summit; ὑπο ἡεῖρη, under affection.

III ECLIPSIS.

1. A consonant is said to be eclipsed, or to suffer eclipsis, when its sound is suppressed, and the sound of another consonant, which is prefixed to it, substituted: thus in ἡ-δῶν, δ is eclipsed by η, and the whole word is pronounced *nawn*, whereas δῶν is pronounced *dawn*. It is only at the beginning of words consonants are eclipsed.

2. The following eight consonants can be eclipsed:—b, c, d, f, g, p, r, t; the others cannot. Between the eclipsing and the eclipsed letter there is usually placed a *hyphen*, as η-βάσιον: but often they are put together without any separating mark, as βροσιον. Sometimes eclipsis is denoted by the doubling of the eclipsed letter; thus, α τταβ is the same as α δ-ταβ, their bull

3. Each consonant has an eclipsing letter of its own.

4. *b* is eclipsed by *m*; as a *m*-báird, their bard, pronounced a *mawrd*.

5. *C* is eclipsed by *g*: as a *g*-coll, their hazel, pronounced a *gowl* or a *gull*.

6. *O* by *n*; as a *n*-dor, their bush, pronounced a *nuss*.

7. *F* by *b* (which itself sounds like *v* or *w*); as a *b*-feannan, their land, pronounced a *varran*.

8. *S* is eclipsed by *n*. But this is not a true eclipse, for the resulting sound is not that of *n*, but the sound of English *ng*; thus a *n*golla, their servant, is pronounced *ang-illa*.

9. *P* is eclipsed by *b*; as a *b*-pian, pronounced a *bee-an*.

10. *S* is eclipsed by *t*, as a *t*-rúil, the eye, pronounced a *too-il*.

11. *T* is eclipsed by *d*; as a *d*-tál, their adze, pronounced a *dawl*.

RULES FOR ECLIPSIS.*

1. The possessive pronouns plural—*an*, our; *buu*, your; *a*, their; eclipse the initial consonant of the next word; as *an* d-tíseanna, our Lord; *buu* g-craon, your tree; *a* b-páirc, their field.†

2. The article eclipses the initial consonant of nouns in the genitive plural; as *teac* na *m*-báird, the house of the bards; *gort* na *g*-capall, the field of the horses.

3. When a simple preposition is followed by the article and a noun in the singular number, the initial consonant of the noun is generally eclipsed; as *an* na *m*-bóird, on the table; ó'n *b*-fáinne, from the sea. (See page 34: see also Syntax.)

4. The initial consonant of a verb is eclipsed after the interrogative particles *a*, *an*, *cá*, *há*; also after *go*, that; *muna*, unless; *ian*, after; *dá*, if; and after the relative *a* preceded by a preposition; as a *m*-beirneann *re*? Does he bear? *an* *m*-buairleann *tá*? Dost thou strike? *cá* *b*-fuil *rí*? Where is she? *há* d-tuiseann *tu*? Dost thou not understand? *go* *m*-beannaíse *O*ha *duit*, may God bless thee; *muna* d-tuiscfú, unless thou shalt fall; *dá* *n*-dearfainn, if I would say, *an* *tí* *an* a d-tairne *riad*, the country into which they came.

* These rules apply of course only to those consonants that can be eclipsed. The rules for eclipsis, like those for aspiration, suppose a knowledge of Etymology.

† Rules 1, 2, 3, 4 do not apply to *r*. See for this letter Rule 5.

When a vowel beginning with r is weakened by the glide, the subject vowel has more of a diphthong quality, or passing quality, and generally in the latter part of both periods, as in er and ur . The transition from one to the other is the least of any other, and is not so marked as in er and ur . The transition is not so marked as in er and ur , and is not so marked as in er and ur . The transition is not so marked as in er and ur . (See pages 23 and 24.)

The following table is usually given with the rules for

and a vowel begins with a vowel, the latter r is generally pronounced as usual, but in some cases, as in er and ur , the r is pronounced as a vowel. (See page 23.)

and in some cases, as in er and ur , the r is pronounced as a vowel. (See page 23.)

If a vowel begins with a vowel, the latter r is generally pronounced as usual, but in some cases, as in er and ur , the r is pronounced as a vowel. (See page 23.)

If a vowel begins with a vowel, the latter r is generally pronounced as usual, but in some cases, as in er and ur , the r is pronounced as a vowel. (See page 23.)

Changing a broad vowel to a slender is called in Latin

and a very common one, and is a sign of the laws of aspiration.

and a very common one, and is a sign of the laws of aspiration.

caol, slender, from caol, slender.) and in English *abbreviation*; changing from slender to broad is called Irish *leathuagad* (i.e., making broad, from leath-on, broad).

5. Attenuation takes place chiefly in two ways:—first, by putting a slender vowel between the broad vowel and the consonant; as when baill, a spot, is changed to baill, spots; or when ra is prefixed to buail, and the resulting word is buairra, not buaira: secondly, by removing the broad vowel which precedes *r* follows the consonant, and putting a slender vowel in its place; as when ceann, a head, is changed to cinn, of a head.

6. In like manner "making broad" takes place chiefly in two ways, which are the reverse of the two preceding.

7. The following examples will illustrate the preceding rules and remarks:—

8. When the future termination *rad* is added to buail, the resulting word is not buairad, but buairread, I shall strike.

9. When the infinitive termination *ad* is added to buail, the resulting word is not buairad, but buailad.

10. When *móin*, great, is fixed to *cion*, love, the compound is not móincion, but móiníon, great love.

11. When *ceann*, head, is prefixed to *litrín*, a letter, the compound is not ceannlitrín, but cinnlitrín, a head letter, or capital letter. (This is a case of irregular attenuation.)

12. When the diminutive termination *óy* is added to *cúil*, the resulting word is not cúilóy, but cúileóy, a fly.

13. When *e* is added to *onbóy*, a thumb, to inflect it for the genitive, the word is not onbóye, but onbóíye, of a thumb.

14. When the diminutive termination *ín* is added to *capall*, a horse, the whole word is not capallín, but capallín.

VI SYNOPE.

1. Syncope, or the omission of one or more letters from the body of a word, is very common in Irish.

2. When a short vowel occurs between a liquid (*l, n, r,* or *r,*) and a mute, or between two liquids, the word is often syncopeated when it is lengthened either by grammatical inflection or otherwise.

The syncope generally consists in the omission of the short vowel; but this change often involves others, in accordance with the rule *caol le caol*, &c.; and is often also accompanied by some other consonantal changes.

4. The following examples exhibit the chief types of syncope:--
5. λᾱηαῖηα, a married couple; plural λᾱηαῖηηα, contracted from λᾱηαῖηηαηα.
6. λᾱραῖηη, a flame; plural λᾱηηαῖα, contracted from λᾱραῖηηαῖα.
7. Φocal, a word; φοcλόηη, a dictionary, contracted from φοcαλόηηη.
8. Σαῖβηη, rich; comparative ᾱαῖβηηε, contracted from ᾱαῖβηηηε.
9. Cαῖαῖηη, a city; genitive cαῖηηαῖ, contracted from cαῖαῖηηαῖ.
10. Φλαῖῖεαῖηηαῖ, princely; comparative φλαῖῖεαῖηηηα, contracted from φλαῖῖεαῖηηηαηα.
11. Colαηη, the body; genitive colηηα, (sometimes collα), contracted from colαηηα.
12. Cαηηα, genitive cαηηαῖ: the plural is formed by adding e to this, which syncopates the second α: this would make cαηηηε, which again, in accordance with the rule caol le caol, &c., is made cαηηηε.
13. Uαῖαῖ, noble, becomes uαῖηηε in the comparative, by a process exactly similar to the last.
14. Φollηη, evident, becomes φοῖηηηε in the comparative in a similar way.
15. Αβαηηη, a river: the plural is formed by adding e; this causes syncope of the second α and the omission of one η, which would make the plural αβηηηε; and this again becomes αῖβηηε, by the rule caol le caol, &c.
16. Λαβᾱηη, speak (imperative mood); λαβᾱηηαῖηη, I speak, contracted from λαβᾱηηαῖηηη.

PART II.

ETYMOLOGY.

1. There are nine parts of speech in Irish, which are the same as those in English.

CHAPTER I.

THE ARTICLE.

I. CHANGE OF FORM IN THE ARTICLE.

1. The Irish language has one article, *an*, which has the same meaning as the English definite article *the*.

2. The article changes its form according to number, gender, and case.

3. In the singular number the article has the form *an* in all the cases except the genitive feminine, in which it becomes *na*; as *caisleán na caille*, the castle of the hen.

In the plural number the article is always *na*.

4. In the spoken language the *n* of *an* is often omitted before a consonant; as *ceann a caib*, the head of the bull. And this is sometimes found in books also, both printed and MS., but it is not recommended.

5. When *an* follows a preposition ending in a vowel, the *a* is often omitted in writing, but the omission is usually marked by an apostrophe; thus, *ó an tír*, from the land, is written *ó'n tír*; and *fá an ngréin*, under the sun, is written *fá'n ngréin*.

Very often in MSS., and sometimes in printed books, the apostrophe in such cases is omitted, and the *n* of the article joined with the preposition; as *ón tír*, *fá'n ngréin*.

6. In the plural the article (*na*) is often joined to the preposition; as *do na*, for *do na*.

7. The letter *r* is inserted between certain prepositions and the article *an*; and this occasionally leads to combinations that might puzzle a learner. Thus, *ann an leabair*, in the book, is written *annr an leabair*, and *ir an leabair*, which is still further shortened to *ran leabair*: also (omitting the *n*) *anna leabair*, and even *ra leabair*.

II. CHANGES PRODUCED BY THE ARTICLE.

1. The article produces certain changes in the initial letters of nouns to which it is prefixed.

2. These changes are very important, and the learner will obtain a clearer view of them by separating the singular from the plural. (For more on this subject see page 34.)

SINGULAR.

1. If the noun begins with an aspirable consonant (except τ , σ , δ), the article aspirates in the nominative feminine, and in the genitive masculine; as $\alpha\eta$ $\beta\acute{o}$, the cow; $\sigma\upsilon\alpha\eta$ $\alpha\eta$ $\acute{\rho}\eta\mu$ $\eta\theta\acute{o}\eta\mu$, the harbor of the great man.

2. If the noun begins with τ , followed by a vowel or by λ , η , or μ , the τ is eclipsed by σ in those cases where, according to the last rule, a mutable consonant would be aspirated; as $\alpha\eta$ τ - $\rho\acute{\alpha}\lambda$ (fem.), the heel; $\alpha\eta$ τ - $\rho\acute{\eta}\mu\acute{o}\eta$, (fem.), the nose; $\lambda\upsilon\acute{\alpha}\acute{\sigma}$ $\alpha\eta$ τ - $\rho\eta\mu\iota\alpha\eta$ (masc.), the price of the bridle.

3. If the noun begins with a vowel, the article prefixes σ to the nominative masculine, and η to the genitive feminine; as $\alpha\eta$ τ - $\alpha\tau\alpha\eta\mu$, the father; $\lambda\epsilon\alpha\beta\alpha\mu$ $\eta\alpha$ η - $\upsilon\delta\eta\epsilon$, the book of the dun (cow).

4. If the noun begins with an eclipsable consonant (except δ or σ), the article *generally* eclipses, if it be preceded by a simple preposition; as $\alpha\eta\mu$ $\alpha\eta$ ζ - $\sigma\tau\alpha\eta\eta$, on the tree; $\delta\prime\eta$ β - $\rho\acute{o}\alpha\lambda$ $\eta\beta\epsilon\mu$, "from the word 'iber;'" $\lambda\epsilon\eta\tau$ $\alpha\eta$ β - $\rho\epsilon\alpha\mu$, with the man.

5. But after the prepositions $\delta\omicron$ and $\delta\epsilon$, the article aspirates oftener than it eclipses; as $\sigma\epsilon\eta\acute{\sigma}\eta\epsilon$ $\sigma\acute{\epsilon}\eta\eta\epsilon$ $\delta\omicron\prime\eta$ $\acute{\sigma}\eta\mu\omicron\tau$, four degrees of the zone (Keating); $\delta\omicron$ $\lambda\epsilon\alpha\eta\alpha\delta\alpha\mu$ α ζ - $\sigma\omicron\tau\alpha$ $\delta\omicron\prime\eta$ $\acute{\sigma}\alpha\mu$ - $\eta\alpha\zeta$, their feet clung to the rock (story of the Children of Lir).

6. No change is produced by the article in the singular number, if the noun begins with λ , η , μ , δ , σ , or with τ before a mute.

PLURAL.

1. If the noun begins with an eclipsable consonant, the article eclipses in the genitive; as $\eta\eta\eta$ $\eta\alpha$ β $\rho\acute{\omicron}\delta\beta\alpha\delta$ [the] island of the woods; $\sigma\alpha\eta\eta$ $\delta\epsilon\alpha\tau$ $\sigma\eta\acute{\upsilon}\delta\tau\epsilon$ $\eta\alpha$ η - $\beta\acute{o}$ [the] pretty girl of [the] milking of the cows (*i.e.*, the pret.y milking girl).

2. If the noun begins with a vowel, the article prefixes η to the genitive, and η to the other cases; as $\tau\eta\mu$ $\eta\alpha$ η - $\acute{\omicron}\zeta$, the land of the young (people); δ $\eta\alpha$ η - $\acute{\alpha}\tau\eta\beta$ $\eta\eta$, from those places.

These are the only changes produced by the article in the plural.

CHAPTER II.

THE NOUN.

I. GENDER.

1. There are only two genders in the Irish language, the masculine and feminine: all Irish nouns, therefore, are either masculine or feminine gender.

2. In ancient Irish there was a neuter gender, but no trace of it remains in the modern language.

3. To know and remember the gender of all ordinary Irish nouns is one of the great difficulties in learning the language, as it is in learning French and many other languages. Without this knowledge, which can only be mastered by practice, no one can speak or write Irish correctly.

4. There are a few general rules which will very much help the learner to distinguish the gender of nouns: they are only *general* rules, however, subject to many exceptions; and where they do not apply, the student must depend on practice and memory.

MASCULINE.

1. The following nouns are generally masculine:—

(1.) Names of males; as *coileac*, a cock; *laoc*, a hero; *feam*, a man.

(2.) Nouns of more than one syllable, ending in a consonant, or two consonants, preceded by a broad vowel; as *doirtceall*, churlishness: except (*a*), derivatives in *ac̄t*; (*b*), diminutives in *ó̄s*.

(3.) Nouns ending in *ó̄iu*, *aiue*, *ac̄ āide* (or *ōide*, or *ūide*), when they denote personal agents, as they generally do; as *rpéaladó̄iu*, a mower; *real̄ḡaiue*, a hunter; *cēt̄eair̄nac̄*, a soldier—one of a body of *ker̄ns*; *r̄ḡéal̄āide*, or *r̄ḡeul̄ūide*, a story-teller.

(4.) Diminutives in *an̄* and abstracts in *ar̄*; as *coilean̄*, a whelp; *cāiūdear̄*, friendship.

(5.) Diminutives in *in̄* are of the same gender as the nouns from which they are derived.

FEMININE.

2. The following nouns are generally feminine:—

(1.) Names of females; names of countries, rivers, and diseases; as *ceanc*, a hen; *Ēiue*, Ireland; *beair̄ba*, the Barrow; *pl̄āiḡ*, a plague.

(2.) Diminutives in *ó̄s*, and derivatives in *ac̄t*; as *fūir̄eó̄s*, a lark; *cāūīnac̄t*, fragrance: and abstract nouns formed from the *ε̄* active feminine of adjectives; as *dāille*, blindness.

(3.) Nouns ending in a consonant, or two consonants, preceded by a slender vowel (except those in $\delta\eta\mu$); as $\tau\acute{\upsilon}\lambda$, the eye; $\tau\acute{o}\zeta\lambda\upsilon\eta\eta$, learning.

II. DECLENSIONS.

CASES.

1. Irish nouns have four cases, that is, four different inflections, to express relation:—Nominative, genitive, dative, and vocative.

2. The nominative case is the same as the nominative case in English.

3. The genitive is the same as what is called the possessive case in English.

4. The dative is the case where a noun is governed by a preposition.

5. The vocative case is the same as what is called the nominative of address in English.

6. Irish nouns have different forms for these four cases, and for no others. Thus, the four cases of briadán , a salmon, are, for the plural number, as follows:—Nom. briadáin , as $\tau\eta\acute{\iota}\text{ briadáin}$, three salmons; gen. briadán , as $\text{loc } \eta\alpha \eta\text{-briadán}$, the lake of the salmons; dat. $\text{briadán}\eta\lambda\beta$, as $\text{do } \eta\alpha \text{ briadán}\eta\lambda\beta$, to the salmons; voc. briadána , as $\alpha \text{ briadána ca } \beta\text{-fuil } \tau\eta\beta \alpha\zeta \text{ dul?}$ "O ye salmons, whither are ye going?"

7. These four cases are not always different in form; thus, the four cases of the same noun in the singular number are:—Nom. briadán ; gen. briadáin ; dat. briadán ; voc. briadáin ; in which it will be seen that the dative is the same as the nominative, and the vocative the same as the genitive.

8. Those cases which are alike in form are distinguished by the sense; just as the nominative and objective cases are distinguished in English.

9. Some writers on Irish grammar have put in two more cases, in imitation of Latin declension; the accusative (or, as it is called in English, the objective) and the ablative. But in Irish there are no separate inflections for them, the accusative being always the same in form as the nominative, and the ablative the same as the dative; so that it would be only a useless puzzle to the learner to include them in a statement of Irish declension. In certain explanations, however, and in the statement of certain rules, it is sometimes convenient to speak of the accusative case.

10. Different nouns have different inflections for the same case; thus the dative singular of $\text{co}\tau$, a foot, and $\text{do}\tau$, a bush, are different, namely, $\text{co}\tau\tau$ and $\text{do}\tau$. But though this variation extends

to most of the cases, the genitive singular is taken as the standard, in comparing the declension of one noun with the declension of another.

11. There are five chief ways of forming the genitive singular of Irish nouns; and in one or another of these ways, far the greatest number of nouns in the language form their genitive. There are usually reckoned, therefore, FIVE DECLENSIONS of Irish nouns.

12. Besides these there are genitive inflections, but as no one of them comprises any considerable number of nouns, it is not considered necessary to lay down more than five declensions. The number of declensions is, however, very much a matter of convenience; and, accordingly, in some Irish grammars, there are more than five, and in some less.

FIRST DECLENSION.

1. The first declension comprises masculine nouns which have their characteristic vowel, that is, the last vowel of the nominative singular, broad.

2. The genitive singular is formed by attenuating the broad vowel.

3. In the singular, the dative is like the nominative, and the vocative is like the genitive; in the plural, the nominative is generally like the genitive singular, and the genitive like the nominative singular. Example, *ball*, a member, or limb.

Singular.		Plural.	
Nom.*	<i>ball.</i>	Nom.	<i>baill.</i>
Gen.	<i>baill.</i>	Gen.	<i>ball.</i>
Dat.	<i>ball.</i>	Dat.	<i>ballaib.</i>
Voc.	<i>a baill.</i>	Voc.	<i>a balla.</i>

4. The number of nouns that belong to this declension is very large; but though they all form their Genitive singular in the same way (except those in *ac*, in which there is a slight additional change, for which see next paragraph), there are a few which vary in the formation of other cases.

5. Nouns in *ac*, in addition to the attenuation, change *c* into *ċ* in the genitive singular; and generally form the nominative plural by adding *e* to the genitive singular; and from this again is formed the dative plural in *ib*, in accordance with the rule in Par. 9, page 26. Example, *maicac*, a horseman.

* It would be well for the learner, when declining nouns, to call this "Nominative and Accusative" all through the declensions.

Singular.		Plural.	
Nom.	ἡμεῖς.	Nom.	ἡμεῖς.
Gen.	ἡμεῶν.	Gen.	ἡμεῶν.
Dat.	ἡμῶν.	Dat.	ἡμῶν.
Voc.	ὦ ἡμεῖς.	Voc.	ὦ ἡμεῖς.

6. A few nouns make their nominative plural by an increase in *a*; as *pen*, a pen; plur. *pena*: and some of these are syn-copated, as *uball*, an apple; plur. *ubla*.

7. In a few nouns of this declension the nominative plural is formed by adding *ta* or *ta* to the nominative singular; as *sail*; nom. plur. *sailta*; dat. plur. *sailta*; *wall*; nom. plur. *wallta*; dat. plur. *wallta*.

8. In many words of one syllable belonging to this declension, the attenuation in the genitive singular causes considerable change in the vowel or diphthongal part of the word; thus, *body*; gen. *cuip*; *fish*; gen. *éip*; *strength*; gen. *neip* or *neip*; *man*; gen. *fiu*; *tree*; gen. *crip*; *mouth*; gen. *béal* or *beol*.

The three following rules (9, 10, and 11) apply to all the declensions:

9. The dative plural ends in *ib*.

This *ib* correspond with the Latin dative and ablative termination *ibus* or *bis*. It is now hardly ever pronounced,* but it is nearly always retained in writing; just as in English, *gh*, which was formerly sounded as a guttural in such words as *plough*, *daughter*, is retained in writing, though it is no longer pronounced.

10. The dative plural is formed from the nominative plural whenever this latter differs from the genitive singular: otherwise from the nominative singular.

11. The vocative is always preceded by the particle *o* or *o*, which aspirates the initial; as *o fiu*, O man; *o mha*, O women; *o Císeapna*, O Lord.

SECOND DECLENSION.

1. The second declension comprises most of the feminine nouns in the language.

2. The genitive singular is formed by adding *e* to the nominative. If the characteristic vowel is broad, it must be attenuated in accordance with the rule *caol le caol*, &c.

3. The dative singular is formed from the genitive singular by dropping the final *e*.

* This syllable is always sounded in the West and North of Ireland which is undoubtedly the rule, the other being the exception.

3. When the characteristic vowel is broad, the nominative plural is formed from the nominative singular by adding *a*; when the characteristic vowel is slender, by adding *e*.

5. The genitive plural is generally like the nominative singular.

6. The vocative is usually the same as the nominative, and is accordingly omitted from the paradigm.

First example: *ῥεανηρόζ*, a shamrock.

Singular.	Plural.
Nom. <i>ῥεανηρόζ</i> .	Nom. <i>ῥεανηρόζα</i> .
Gen. <i>ῥεανηρόζε</i> .	Gen. <i>ῥεανηρόζ</i> .
Dat. <i>ῥεανηρόζ</i> .	Dat. <i>ῥεανηρόζαῖβ</i> .

Second example: *πέιρτ*, a worm, a beast.

Singular.	Plural.
Nom. <i>πέιρτ</i> .	Nom. <i>πέιρτε</i> .
Gen. <i>πέιρτε</i> .	Gen. <i>πέιρτ</i> .
Dat. <i>πέιρτ</i> .	Dat. <i>πέιρτῖβ</i> .

7. Nouns in *ac* when they belong to this declension, change the *c* to *z* in the genitive singular; thus, *κλαίηρεac*, a harp, is declined as follows:—

Singular.	Plural.
Nom. <i>κλαίηρεac</i> .	Nom. <i>κλαίηρεaca</i> .
Gen. <i>κλαίηριζε</i> .	Gen. <i>κλαίηρεac</i> .
Dat. <i>κλαίηριζ</i> .	Dat. <i>κλαίηρεacaῖβ</i> .

8. There are many nouns belonging to this declension which depart from the general rule laid down in Par. 4, in forming their nominative plural.

9. Some, probably over fifty, form the nominative plural by adding *anna*; and these form the genitive plural by dropping the final *a* of this termination; thus, *κύρ*, a cause; nom. plural, *κύρηanna*; gen. plural, *κύρηanna* dat. plural, *κύρηannaῖβ*.

10. Some form their nominative plural by adding *aca*: thus, *οβαίη*, a work, and *οράῖδ*, a prayer, make *οἱβρεaca* and *οράῖδεaca* in the nominative plural.

11. When the characteristic vowel is slender, it is often dropped in the genitive plural; as *ῥυαίη*, a sound; gen. plural, *ῥυαη*.

12. When the nominative plural takes *te*, the genitive plural is formed by adding *ad*; as *coill*, a wood; nom. plur. *coillte*: and genitive plural, as seen in *Οἱλεη ηα ζ-coilltead*, the island of the woods (Keating).

13. There are other variations of the nominative and genitive plural; but they do not comprise any considerable number of nouns, and they must be learned by practice.

THIRD DECLENSION.

1. Nouns belonging to the third declension are some of them masculine and some feminine.

2. The genitive singular is formed by adding *a* to the nominative singular.

3. The vocative is like the nominative.

4. The nominative plural is generally formed by adding *a* or *e*.

5. The genitive plural is generally like the nominative singular.
Example: *cleap*, a trick or feat.

Singular.	Plural.
Nom. <i>cleap</i> .	Nom. <i>cleapa</i> .
Gen. <i>cleapa</i> .	Gen. <i>cleap</i> .
Dat. <i>cleap</i> .	Dat. <i>cleapaib</i> .

6. If the characteristic vowel is slender, it must be made broad in the genitive singular, in accordance with the rule *caol le caol*, &c.; as *toil*, the will, gen. *cola*.

7. Sometimes *τ* or *é* is introduced before the *a* of the genitive singular, which commonly causes other changes by syncope; as *bodail*, sleep; genitive *codailta*; *buairéire*, trouble; genitive *cuairdearta*.

8. This is the case with verbal or participial nouns in *ad*, *ead*, and *užad*, the genitives of which have the same form as their passive participles considered as verbs; and they are all commonly reckoned as belonging to this declension, though the genitive singular is formed in some by adding *e*, not *a*; as *mólaid*, praising; gen. *mólta*; *rinead*, stretching; gen. *rinte*; *caolužad*, making slender; gen. *caoluité*.

9. Nouns in *act* generally, and those in *ear* or *ior*, often, belong to this declension; as *clirteact*, dexterity; gen. *clirteacta*; *doilgior*, sorrow; gen. *doilgiora*. But the greater number of those in *ear* or *ior* belong to the first declension; thus the last noun, *doilgior*, is often made *doilgior* in the genitive; and *brionnánar*, a gift, makes *brionnánair*.

10. There are forty or fifty nouns (many of them ending in *iu*.) which form their genitive singular in *ad*, and which are reckoned as belonging to this declension, though some writers arrange them under a separate declension; as *cačairi*, a city; gen. *cačnac*; *Teairiari*, Tara; gen. *Teairnac*; *griáir*, hatred; gen. *griánac*.

11. Those in *iu* generally form their genitive as above; but *atair*, a father; *matair*, a mother; and *briáčair*, a brother, form their genitive by dropping the final *i*:—gen. *atair*, *matair*, *briáčair*.

12. Outside the general rule stated in Par 4 above, there is considerable variety in the formation of the nominative plural.

13. Those in $\acute{\omicron}\mu$ generally make the nominative plural by adding $\iota\delta\epsilon$: as $\rho\epsilon\alpha\lambda\acute{\alpha}\delta\acute{\omicron}\mu$, a mower; nom. plur. $\rho\epsilon\alpha\lambda\acute{\alpha}\delta\acute{\omicron}\mu\iota\delta\epsilon$.

14. And these form the genitive plural variously; generally $\eta\alpha$ $\rho\epsilon\alpha\lambda\acute{\alpha}\delta\acute{\omicron}\mu\iota\delta$, but sometimes $\eta\alpha$ $\rho\epsilon\alpha\lambda\acute{\alpha}\delta\acute{\omicron}\mu$, or $\eta\alpha$ $\rho\epsilon\alpha\lambda\acute{\alpha}\delta\acute{\omicron}\mu\acute{\alpha}\delta$.

15. Others form the nominative plural either like the genitive singular or by adding $\eta\eta\alpha$ to it; as $\rho\mu\upsilon\acute{\tau}$, a stream; gen. $\rho\mu\upsilon\acute{\tau}\alpha$; nom. plur. $\rho\mu\upsilon\acute{\tau}\alpha$, or $\rho\mu\upsilon\acute{\tau}\alpha\eta\eta\alpha$; $\delta\mu\upsilon\mu\eta$, a back; gen. $\delta\mu\upsilon\mu\eta\alpha$; nom. plur. $\delta\mu\upsilon\mu\eta\alpha$, or $\delta\mu\upsilon\mu\eta\alpha\eta\eta\alpha$.

16. Those that add $\eta\eta\alpha$, form the genitive plural by omitting the α ; as $\rho\mu\upsilon\acute{\tau}$; gen. plur. $\rho\mu\upsilon\acute{\tau}\alpha\eta\eta$.

17. Many nouns of this declension that end in η or λ , form their plural by adding $\tau\epsilon$ or $\tau\alpha$; as $\mu\acute{\omicron}\eta$, a bog; gen. sing. $\mu\acute{\omicron}\eta\alpha$; nom. plur. $\mu\acute{\omicron}\eta\tau\epsilon$.

18. And these generally form their genitive plural by adding $\alpha\delta$, to the nominative plural; as $\mu\acute{\omicron}\eta$; gen. plur. $\mu\acute{\omicron}\eta\tau\epsilon\alpha\delta$.

19. Those that form their genitive singular in $\acute{\alpha}\delta$ (10) form the plural by adding α to this $\acute{\alpha}\delta$; as $\lambda\alpha\rho\alpha\mu$, a flame; gen. sing. $\lambda\alpha\rho\alpha\delta$; nom. plur. $\lambda\alpha\rho\alpha\alpha$.

FOURTH DECLENSION.

1. Nouns of the fourth declension end in vowels or in η , and are some of them masculine and some feminine.

2. There is no inflection in the singular, all the cases being alike.

3. The nominative plural is generally formed by adding $\iota\delta\epsilon$ or $\alpha\delta\alpha$ (with occasionally an obvious vowel change). Example, $\acute{\alpha}\mu\eta\epsilon$, a sloe.

Singular.	Plural.
Nom. $\acute{\alpha}\mu\eta\epsilon$.	Nom. $\acute{\alpha}\mu\eta\iota\delta\epsilon$.
Gen. $\acute{\alpha}\mu\eta\epsilon$.	Gen. $\acute{\alpha}\mu\eta\epsilon\alpha\delta$.
Dat. $\acute{\alpha}\mu\eta\epsilon$.	Dat. $\acute{\alpha}\mu\eta\iota\delta\iota\delta$.

4. Some form the plural by adding $\tau\epsilon$ or $\acute{\epsilon}\tau\epsilon$: as $\tau\epsilon\iota\eta\eta\epsilon$, a fire; nom. plur. $\tau\epsilon\iota\eta\eta\tau\epsilon$; $\delta\alpha\omicron\iota$, a clown; nom. plur. $\delta\alpha\omicron\iota\acute{\epsilon}$; and $\alpha\iota\acute{\tau}\eta\epsilon$, a commandment, has nom. plur. $\alpha\iota\acute{\tau}\epsilon\alpha\eta\tau\alpha$.

5. These generally form the genitive plural, by adding δ or $\alpha\delta$ (not to the nominative singular, as in the model, but) to the nominative plural; as nom. plur. $\delta\alpha\omicron\iota\acute{\epsilon}$, clowns; gen. plur. $\delta\alpha\omicron\iota\acute{\epsilon}\alpha\delta$.

6. Nouns ending in $\alpha\iota\delta\epsilon$, $\alpha\iota\delta\epsilon$, and $\alpha\iota\mu\epsilon$, generally belong to this declension; as $\rho\acute{\iota}\lambda\acute{\alpha}\beta\upsilon\iota\delta\epsilon$, a slave; $\rho\acute{\iota}\beta\omicron\alpha\iota\mu\epsilon$, a piper.

FIFTH DECLENSION.

1. Nouns of the fifth declension are mostly feminine.
 2. They generally end in a vowel; and they form their genitive by adding η or ηη, and occasionally δ or τ.
 3. The dative singular is formed from the genitive by attenuation.
 4. The nominative plural is formed from the genitive singular by adding α.
 5. The genitive plural is like the genitive singular.
- Example, *υἱρα*, a door-jamb.

Singular.	Plural.
Nom. <i>υἱρα</i> .	Nom. <i>υἱραηα</i> .
Gen. <i>υἱραν</i> .	Gen. <i>υἱραν</i> .
Dat. <i>υἱρανῆ</i> .	Dat. <i>υἱραηαῖβ</i> .

6. To this declension belong the proper names 'Εἰρε, Ireland; gen. 'Εἰρεαηη, dat. 'Εἰρηηηη; Ἀβα, Scotland; gen. Ἀβαη, dat. Ἀβαηη; Μουνια, Munster; gen. Μουνιαη, dat. Μουνιαηη; and several others of less note.

7. *κατα*, a friend, is an example of the genitive in δ: nom. *κατα*; genitive *καταδ*; dat. *καταδ*; nom. plur. *κατιδε*.

8. There is a good deal of variety in the formation of the cases of nouns belonging to this declension, which can only be learned by practice.

IRREGULAR DECLENSION

1. Some nouns are irregular; that is, they are not inflected in accordance with any of the regular declensions.

2. The most important of the irregular nouns are* :—*βειη*, a woman; *βό*, a cow; *βιύ*, a womb; *καρια*, a sheep; *σεό*, a fog; *κηό*, a hut; *κύ*, a hound; *Οἶα*, God; *λά*, a day; *μη* a month; *ο* or *υα*, a grandson. They are declined as follows—(the vocative is not given where it is like the nominative):—

βειη, a woman, fem.

Singular.	Plural.
Nom. <i>βειη</i> .	Nom. <i>μεια</i> .
Gen. <i>μεια</i> .	Gen. <i>βειη</i> .
Dat. <i>μειας</i> .	Dat. <i>μειαιβ</i> .

βό, a cow, fem.

Nom. <i>βό</i> .	Nom. <i>βα</i> .
Gen. <i>βό</i> .	Gen. <i>βό</i> .
Dat. <i>βυηη</i> .	Dat. <i>βυαιβ</i> .

* For additional examples of declensions of nouns, both regular and irregular, see Appendix at the end of the book.

Ծրն, *a womb, fem.*

Nom. Ծրն.	Nom. Ծրողոյս.
Gen. Ծրուողոյս, or Ծրողոյ.	Gen. Ծրողոյ.
Dat. Ծրուողոյ.	Dat. Ծրողոյսի.

Շարս, *a sheep, fem*

Nom. Շարս.	Nom. Շարսիչ.
Gen. Շարսի.	Gen. Շարսի.
Dat. Շարս.	Dat. Շարսի.
Voc. ա Շարս.	Voc. ա Շարսի.

Շո՛, *a fog, masc.*

Nom. Շո՛.	Nom. Շո՛.
Gen. Շո՛ի or Շո՛իչ.	Gen. Շո՛.
Dat. Շո՛.	Dat. Շո՛ի.

Շո՛ or Շո՛ն, *a nut, masc.*

Nom. Շո՛.	Nom. Շո՛ն, Շո՛նի.
Gen. Շո՛ն, Շո՛նի.	Gen. Շո՛ն.
Dat. Շո՛ն, Շո՛նի.	Dat. Շո՛նի.

Շո՛ն, *a hound, masc. or fem.*

Nom. Շո՛ն.	Nom. Շո՛ն, Շո՛նի, Շո՛նի,
	or Շո՛նի.
Gen. Շո՛ն.	Gen. Շո՛ն.
Dat. Շո՛ն.	Dat. Շո՛նի.

Շո՛ն, *God, masc.*

Nom. Շո՛ն.	Nom. Շո՛ն, Շո՛նի.
Gen. Շո՛ն.	Gen. Շո՛ն, Շո՛նի.
Dat. Շո՛ն.	Dat. Շո՛նի, Շո՛նի.
Voc. ա Շո՛ն or ա Շո՛նի.	Voc. ա Շո՛ն or ա Շո՛նի.

Լա, *a day, masc.*

Nom. Լա.	Nom. Լաի.
Gen. Լա.	Gen. Լաի.
Dat. Լա, Լո՛.	Dat. Լաի.

Չո՛ն, *a month, fem.*

Nom. Չո՛ն.	Nom. Չո՛նի.
Gen. Չո՛նի, Չո՛նի.	Gen. Չո՛նի.
Dat. Չո՛նի, Չո՛նի.	Dat. Չո՛նի.

Օ or սա, *a grandson, masc.*

Nom. Օ, սա.	Nom. սա.
Gen. Օ, սա.	Gen. սա.
Dat. Օ, սա.	Dat. սա, սաի.
Voc. ա սա.	Voc. ա սա.

DECLENSION OF THE ARTICLE WITH THE NOUN.

1. The initial changes produced by the article in the nouns to which it is prefixed have been set forth at page 22; these changes must be carefully observed in declining nouns with the article.

2. Twelve typical examples are here given, corresponding with the several cases mentioned in paragraphs 1, 2, 3, 4, 5, and 6, page 22; and these examples include almost every possible variety. There is a good deal of difference of usage in the dative singular of nouns beginning with *r*.

3. The declension of the singular number only is given; the changes in the plural are so very simple (see page 22,) that they can present no difficulty.

4. Col⁵, a sword, masc. Nom. *an col⁵*; gen. *an cúil⁵*; dat. *leir an ⁵-col⁵* (Par. 4, p. 22), or *do'ñ còl⁵* (Par. 5, p. 22).

5. Ca¹lleac^c, a hag, fem. Nom. *an cáilleac^c*; gen. *na cáil-^ll⁵e*; dat. *ó'ñ ⁵-ca¹ll¹l⁵*, or *do'ñ cáill¹l⁵*.

6. Sao⁵al, the world, masc. Nom. *an rao⁵al*; gen. *an ^c-rao⁵al*; dat. *ó'ñ rao⁵al*, or *do'ñ ^c-rao⁵al* (Par. 5, p. 22).

7. Sab⁶óid, the Sabbath, fem. Nom. *an ^c-Sab⁶óid*; gen. *na Sab⁶óide*; dat. *ó'ñ Sab⁶óid*, or *do'ñ ^c-Sab⁶óid* (Pars. 2 and 5, p. 22).

8. Sla^c, a rod, fem. Nom. *an ^c-rla^c*; gen. *na rla^ce*; dat. *leir an rla^c*, or *do'ñ ^c-rla^c*.

9. Si⁶ól, satin, masc. Nom. *an rru⁶ól*; gen. *an ^c-rru⁶ól*; dat. *ó'ñ rru⁶ól*, or *do'ñ ^c-rru⁶ól*.

10. A¹al, an ass, masc. Nom. *an ^c-a¹al*; gen. *an a¹al*; dat. *ó'ñ a¹al*.

11. I¹ñir, an island, fem. Nom. *an iñir*; gen. *na h-iñire*; dat. *do'ñ iñir*.

12. Le^cac, a stone, fem. Nom. *an le^cac*; gen. *na le^ce*; dat. *do'ñ le^c* (Par. 6, page 22).

13. O¹íle, a deluge, fem. Nom. *an d¹íle*; gen. *na d¹íleann*; dat. *do'ñ d¹íliñ*.

14. S⁵eu^l, a story, masc. Nom. *an r⁵eu^l*; gen. *an r⁵éil*; dat. *ó'ñ r⁵eu^l*.

15. Spe¹al, a scythe, fem. Nom. *an rpe¹al*; gen. *na rpe¹e*; dat. *leir an rpe¹*.

CHAPTER III.

THE ADJECTIVE.

I. DECLENSION OF ADJECTIVES.

1. In Irish the adjective changes its form according to the gender, case, and number of the noun.

2. Adjectives are declined in much the same manner as nouns; but they never take the inflection ιβ in the dative plural (though anciently they had this inflection like nouns); the dative plural of an adjective is like the nominative plural.

There are usually reckoned four declensions of adjectives.

4. The inflections of these four declensions follow those of the noun so closely, that when the noun is mastered the adjective presents no difficulty.

FIRST DECLENSION.

1. Adjectives of the first declension are those that end in a consonant preceded by a broad vowel, as βαῖν , white; βλιϋτῆς , wet.

2. In the masculine gender (*i.e.*, when the adjective belongs to a masculine noun), they are declined the same as nouns of the first declension of the type of βαλλ , except that the nominative plural always ends in α .

3. In the feminine gender adjectives are declined the same as nouns of the second declension of the type of ρεαμητιός .

4. Both genders are alike in the plural. Example, βαῖν , white.

Singular.		Plural.
Masc.	Fem.	Masc. and Fem.
Nom.	βαῖν .	βαῖνα .
Gen.	βαῖν .	βαῖνε .
Dat.	βαῖν .	βαῖνα .
Voc.	βαῖν .	βαῖνα .

SECOND DECLENSION.

1. Adjectives of the second declension are those that end in a consonant preceded by a slender vowel.

2. In the singular, all the cases of both masculine and feminine are alike, except the genitive feminine, which takes ϵ .

3. In the plural, both genders are alike, and all the cases except the genitive are formed by adding ϵ ; the genitive is like the nominative singular. Example, μηῖν , smooth, fine.

Singular.		Plural.
Masc.	Fem.	Masc. and Fem.
Nom.	μηῖν .	μηῖνε .
Gen.	μηῖν .	μηῖν .
Dat.	μηῖν .	μηῖνε .
Voc.	μηῖν .	μηῖνε .

THIRD DECLENSION.

1. Adjectives of the third declension are those that end in αῖνα , which has the same signification as the English postfix *like*:— βανῖνα , a woman; βανῖναῖνα , womanlike, modest.

2. The two genders are always alike.
3. The four cases singular are alike except the genitive, which is formed by adding *α*, with a syncope.
4. In the plural, the genitive is the same as the nominative singular; and the other cases are the same as the genitive singular. Example, *μαῖρεαῖηαι*, graceful.

Singular.	Plural.
Nom. <i>μαῖρεαῖηαι</i> .	Nom. <i>μαῖρεαῖηαι</i> .
Gen. <i>μαῖρεαῖηαι</i> .	Gen. <i>μαῖρεαῖηαι</i> ,
Dat. <i>μαῖρεαῖηαι</i> .	Dat. <i>μαῖρεαῖηαι</i> .

FOURTH DECLENSION.

1. Adjectives of the fourth declension are those that end in vowels; as *μῶμδα*, majestic.
2. They have no inflections, being alike in all cases, numbers, genders.

II. DECLENSION OF THE ADJECTIVE AND ARTICLE WITH THE NOUN.

1. The rules for the aspiration of the initial consonants of adjectives agreeing with nouns are given at page 22; and these rules must be very carefully observed in declining nouns with adjectives.

2. It may be added here that *δ* and *τ* sometimes resist aspiration, especially if they follow a noun ending in *η*. There is much variety of usage as to aspiration of adjectives in the dative singular.

3. When a noun is declined with both an adjective and the article, the initial of the adjective is generally eclipsed in the genitive plural (or takes *η* if it be a vowel).

4. Four typical examples are here given of the declension of the adjective with the noun (for the influence of the article, see page 92):—

Ἄη capall bán, the white horse, masc.

Singular.	Plural.
Nom. <i>Ἄη capall bán.</i>	<i>ἡα capall bánα.</i>
Gen. <i>Ἄη capall bánη.</i>	<i>ἡα ζ-capall m-bán.</i>
Dat. <i>ὀῆ ζ-capall bán, or</i> <i>η-bán.</i>	<i>ὀῆα capallaῖβ bánα.</i>
Voc. <i>α capall bánη.</i>	<i>α capalla bánα.</i>

Ἄη fúireóζ beαζ, the little lark, fem.

Nom. <i>Ἄη fúireóζ beαζ.</i>	<i>ἡα fúireόζα beαζα.</i>
Gen. <i>ἡα fúireόζε bιζε.</i>	<i>ἡα β-fúireόζ m-beαζ.</i>
Dat. <i>ὀῆ β-fúireoιζ bιζ.</i>	<i>ὀῆα fúireόζαῖβ beαζα.</i>
Voc. <i>α fúireóζ beαζ.</i>	<i>α fúireόζα beαζα.</i>

Աղ ւոոս արժ, *the high hill, masc.*

Nom. աղ ւոոս արժ.	Nom. դա շույլս արժա.
Gen. աղ շույլս արժ.	Gen. դա շ-ւոոս դ-արժ.
Dat. զ'դ շ-ոոս արժ.	Dat. զ'դա շոոսայն արժա.
Voc. ա շույլս արժ.	Voc. ա շոոսա արժա.

Աղ եճ ծսն, *the black cow, fem.*

Nom. աղ եճ ծսն.	Nom. դա եա ծսնա.
Gen. դա եճ ծսնե.	Gen. դա դ-եճ դ-ծսն.
Dat. զ'դ դ-եւսն ծսն.	Dat. զ'դա եսայն ծսնա.
Voc. ա եճ ծսն.	Voc. ա եա ծսնա.

III. COMPARISON OF ADJECTIVES.

1. Irish adjectives have three degrees of comparison, the same as English adjectives.

2. The positive is the simple form of the adjective; as արժ, high; փայտեանիլ, princely.

3. The comparative and the superlative have the same form, which is that of the genitive singular feminine; as արժե, փայտեանիւ; and they are distinguished by prefixed particles, or by the context.

4. The comparative has generally the particle դիօր (or դիօրա, or դիբա) prefixed, and it is usually followed by դա, than (spelled also դիա and յոնա); as տա աղտեաճ թօ դիօր արժե դա աղտեաճ թիղ, this house is higher than that house; աճա աղտաճ սժ դիօր փայտեանիւ դա աղտիճ թճիղ, "yonder champion is more princely than the king himself."

5. The superlative is often preceded by յր or աբ, with the article expressed before the noun; as աղտեար յր փայտեանիւ թաղ թիղ, the most princely man in the country.

6. In the comparative, դիօր is omitted when the assertion or question is made by the verb յր in any of its forms, expressed or understood; as եա ծսնե ա շուսաճ դա աղտալ, "her hair was blacker than the coal;" յր շիլե թեաճա դա եայրե, snow is whiter than milk; աղտեար զօ ճեարեմաճար յա ճիբա? is thy brother better than thou?

7. When the characteristic particles are not expressed, the construction generally determines whether the adjective is comparative or superlative; as աղտաճաղ յր սայրե դա թիլճեաճ, the art which is nobler than poetry; աղտաճաղ յր սայրե աղտալ ելճ, "the art which is the noblest in the world."

8. An adjective in the comparative or superlative is not inflected, all the cases being alike in form.

IRREGULAR COMPARISON.

1. The following adjectives are irregularly compared. There are a few others, but their departure from rule is so slight as not to require notice:—

2. $\zeta\iota\alpha$ is a comparative as it stands, signifying more (in number); but it has no positive, unless $\iota\omicron\mu\eta\delta\alpha$, or $\mu\omicron\delta\mu\acute{\alpha}\eta$ (many), or some such word, be considered as such.

Positive.	Comparative.	Superlative.
$\beta\epsilon\alpha\zeta$, little.	$\eta\acute{\sigma}\omicron\tau$ $\lambda\upsilon\zeta\alpha$.	$\iota\tau$ $\lambda\upsilon\zeta\alpha$.
$\beta\alpha\delta\alpha$, long.	$\eta\acute{\sigma}\omicron\tau$ $\beta\alpha\iota\delta\epsilon$, $\eta\acute{\sigma}\omicron\tau$ $\tau\iota\alpha$	$\iota\tau$ $\beta\alpha\iota\delta\epsilon$, $\iota\tau$ $\tau\iota\alpha$.
$\beta\upsilon\mu\upsilon\tau$, or $\upsilon\mu\upsilon\tau$, easy.	$\eta\acute{\sigma}\omicron\tau$ $\beta\upsilon\tau\alpha$, $\eta\acute{\sigma}\omicron\tau$ $\upsilon\tau\alpha$.	$\iota\tau$ $\beta\upsilon\tau\alpha$, $\iota\tau$ $\upsilon\tau\alpha$.
$\mu\alpha\iota\zeta$, $\delta\epsilon\alpha\zeta$, } good.	$\eta\acute{\sigma}\omicron\tau$ $\beta\epsilon\acute{\alpha}\rho\mu\iota$.	$\iota\tau$ $\beta\epsilon\acute{\alpha}\rho\mu\iota$.
$\mu\eta\eta\iota\varsigma$, often.	$\eta\acute{\sigma}\omicron\tau$ $\mu\eta\omicron\eta\varsigma\alpha$.	
$\mu\omicron\delta\mu$, great.	$\eta\acute{\sigma}\omicron\tau$ $\mu\omicron\delta$.	$\iota\tau$ $\mu\omicron\delta$.
$\omicron\lambda\varsigma$, bad.	$\eta\acute{\sigma}\omicron\tau$ $\mu\epsilon\alpha\tau\alpha$.	$\iota\tau$ $\mu\epsilon\alpha\tau\alpha$.
$\tau\epsilon\iota\zeta$, hot.	$\eta\acute{\sigma}\omicron\tau$ $\tau\epsilon\acute{\omicron}$.	$\iota\tau$ $\tau\epsilon\acute{\omicron}$.

11. There are certain particles which, when prefixed to adjectives, intensify their signification; and in accordance with the rule in Par. 4, page 22, they aspirate the initials of the adjectives.

12. The principal of these are $\alpha\eta$, $\beta\acute{\sigma}\omicron\mu$, $\mu\acute{\omicron}$, $\tau\acute{\alpha}\rho\mu$, $\acute{\upsilon}\mu$: as $\mu\alpha\iota\zeta$, good; $\alpha\eta\text{-}\mu\alpha\iota\zeta$, very good; $\zeta\mu\acute{\iota}\alpha\eta\eta\alpha$, ugly; $\beta\acute{\sigma}\omicron\mu\text{-}\zeta\mu\acute{\iota}\alpha\eta\eta\alpha$, excessively ugly; $\mu\omicron\delta\mu$, large; $\mu\acute{\omicron}\text{-}\mu\omicron\delta\mu$, very large; $\lambda\acute{\alpha}\beta\delta\iota\mu$, strong; $\tau\acute{\alpha}\rho\mu\text{-}\lambda\acute{\alpha}\beta\delta\iota\mu$, very strong, &c.

IV. NUMERAL ADJECTIVES.

1. The following is a list of the most important of the numerals, both cardinal and ordinal.

For the influence of some of them in aspirating and eclipsing, and for other syntactical influences on the noun, see Syntax.

Cardinal.	Ordinal.
1. $\alpha\omicron\eta$.	1st. $\acute{\omicron}\epsilon\acute{\alpha}\delta$.
2. $\delta\acute{\omicron}$, $\delta\acute{\alpha}$.	2d. $\delta\alpha\tau\alpha$.
3. $\tau\mu\acute{\iota}$, $\tau\epsilon\acute{\omicron}\mu\alpha$.	3rd. $\tau\mu\epsilon\alpha\tau$.
4. $\sigma\epsilon\alpha\zeta\alpha\iota\mu$, $\sigma\epsilon\iota\zeta\mu\epsilon$.	4th. $\sigma\epsilon\alpha\zeta\mu\alpha\eta\alpha\delta$.
5. $\sigma\acute{\upsilon}\mu\zeta$.	5th. $\sigma\acute{\upsilon}\mu\zeta\epsilon\acute{\alpha}\delta$.
6. $\tau\acute{\epsilon}$.	6th. $\tau\epsilon\iota\tau\epsilon\acute{\alpha}\delta$.
7. $\tau\epsilon\alpha\zeta\tau$.	7th. $\tau\epsilon\alpha\zeta\tau\eta\alpha\delta$.
8. $\omicron\zeta\tau$.	8th. $\omicron\zeta\tau\eta\alpha\delta$.
9. $\eta\alpha\omicron\iota$.	9th. $\eta\alpha\omicron\eta\alpha\delta$.
10. $\delta\epsilon\iota\zeta$.	10th. $\delta\epsilon\alpha\zeta\eta\alpha\delta$.
11. $\alpha\omicron\eta$ $\delta\acute{\epsilon}\alpha\zeta$.	11th. $\alpha\omicron\eta\eta\alpha\delta$ $\delta\acute{\epsilon}\alpha\zeta$.
12. $\delta\acute{\omicron}$ $\delta\acute{\epsilon}\alpha\zeta$, $\delta\acute{\alpha}$ $\delta\acute{\epsilon}\alpha\zeta$.	12th. $\delta\alpha\tau\alpha$ $\delta\acute{\epsilon}\alpha\zeta$.
13. $\tau\mu\acute{\iota}$ $\delta\acute{\epsilon}\alpha\zeta$.	13th. $\tau\mu\epsilon\alpha\tau$ $\delta\acute{\epsilon}\alpha\zeta$.

And so on, up to and including 19.

Cardinal.	Ordinal.
20. <i>ἑξέ.</i>	20th. <i>ἑξέαδ.</i>
21. { <i>ἁοη ἀ' ἑξέ, ἁοη</i> <i>ἁη ἑξίδ,</i> And so on, up to 29.	21st. { <i>ἁοηηαδ</i> <i>ἁη</i> <i>ἑξίδ.</i>
30. { <i>τριόαδ, τριόα,</i> <i>δεῖ ἀ' ἑξέ.</i>	30th. { <i>τριόαδαδ,</i> <i>δεαχῆαδ</i> <i>ἁη</i> <i>ἑξίδ.</i>
33. { <i>τρί ἁη τριόαιδ,</i> <i>τρί δέαζ ἀ'</i> <i>ἑξέ.</i>	33d. { <i>τρεαρ ἁη τριό-</i> <i>αῖδ, τρεαρ</i> <i>δέαζ ἁη ἑξίδ.</i>
40. { <i>δά ἑξίδ, ceat-</i> <i>μαα, ceatma-</i> <i>αδ.</i>	40th. <i>ceatmaααδαδ.</i>
50. <i>καοζα, καοζαδ.</i>	50th. <i>καοζαδαδ.</i>
60. { <i>ρεαρζαδ, ρεαρζα,</i> <i>τρί ἑξίδ.</i>	60th. { <i>ρεαρζαδαδ, τρί</i> <i>ἑξίδεαδ.</i>
70. { <i>ρεαχτηοζα, ρεαχ-</i> <i>τηοζαδ, δεῖ ἀ'</i> <i>τρί ἑξίδ.</i>	70th. { <i>ρεαχτηοζαδαδ,</i> <i>δεαχῆαδ</i> <i>ἁη</i> <i>τρί ἑξίδ.</i>
80. { <i>οχτηοζα, οχτ-</i> <i>τηοζαδ, ceitne</i> <i>ἑξίδ.</i>	80th. { <i>οχτηοζαδαδ,</i> <i>ceitne</i> <i>ἑξίδ-</i> <i>εαδ.</i>
90. { <i>ηοα, ηοαδ, δεῖ</i> <i>ἀ' ceitne</i> <i>ἑξίδ.</i>	90th. { <i>ηοαδαδ, δεαχ-</i> <i>ῆαδ</i> <i>ἁη ceit-</i> <i>ne</i> <i>ἑξίδ.</i>
100. <i>κέαδ.</i>	100th. <i>κέαδαδ.</i>
1,000. <i>ἡςλε.</i>	1,000th. <i>ἡςλεαδ.</i>
2,000. <i>δά ἡςλε.</i>	2,000th. <i>δά ἡςλεαδ.</i>
1,000,000. <i>ἡλλύη.</i>	1,000,000th. <i>ἡλλύηαδ.</i>

2 *Ὀδ* and *ceat* are used only in the absence of nouns, *i.e.*, merely as the names of the numbers; but *δα* and *ceitne* are always used when the nouns are expressed; as *δα* *δύαη*, two ears; *ceitne* *ἑη*, four men.

8. *ἑξέ* is declined:—Nom. *ἑξέ*; gen. *ἑξέαδ*; dat. *ἑξίδ*; nom. plur. *ἑξίδ*.

4. *κέαδ* has gen. *κέιδ*; nom. plural, *κέαδα*, or *κέαδτα*.

5. The following nouns, which are all, except *beητ*, formed from the numerals, are applied to persons only:—

<i>δῆρ, δῆρ</i> , two persons.	<i>ρεαχταη,</i>	} seven persons.
<i>beητ</i> , a couple.	<i>ἡδρ ἑερεαη,</i>	
<i>τριύηη</i> , three persons.	<i>οχταη,</i>	eight "
<i>ceatmaη</i> , four "	<i>ηοηβαη, ηαοηβαη,</i>	nine "
<i>cύζεαη</i> , five "	<i>δεῖηεαβαη,</i>	ten "
<i>ἑερεαη</i> , six "		

CHAPTER IV.

THE PRONOUN.

1. There are in Irish six kinds of pronouns:—Personal, Posses-
sive, Relative, Demonstrative, Interrogative, and Indefinite.

I. PERSONAL PRONOUNS.

1. There are four personal pronouns—*mé*, I; *tú*, thou; *fé*, he; *sí*, she; with their plurals, *riḡḡ*, we; *rib* ye or you; and *riad*, they. These are the simple forms of the personal pronouns.

2. Each of these takes an emphatic increase or postfixed syllable, equivalent to the English word *self*; and the whole word thus formed is called the emphatic form. The emphatic syllables vary their vowel part in accordance with the rule *caol le caol*, &c.

3. The following are the emphatic forms:—*ḡḡḡ*, or *mḡḡḡ*, myself; *túra*, thyself; *féḡḡḡ*, himself; *síḡḡḡ*, herself; *riḡḡḡ*, ourselves; *ribḡḡḡ*, yourselves; *riadḡḡḡ*, themselves.

4. The word *féḡḡḡ*, self, is often added to the personal pronouns, not as a particle but as a separate word; and it is still more emphatic than the particles mentioned in last paragraph:—*mé féḡḡḡ*, I myself; *sí féḡḡḡ*, she herself.

5. The personal pronouns are all declined; and they may carry the emphatic increase through all the cases.

6. The personal pronouns (except *mé*), unlike nouns, have a distinct form for the accusative (or objective) case. It is, of course, only the pronoun *tú* that is used in the vocative.

DECLENSION OF PERSONAL PRONOUNS.

The declension of the emphatic form of *mé* is given as an example: observe, in this, the vowel changes in obedience to *caol le caol*, &c.

mé, I.

Singular.	Plural.
Nom. <i>mé</i> , I.	Nom. <i>riḡḡ</i> , we.
Gen. <i>mḡ</i> , mine.	Gen. <i>ár</i> , our.
Dat. <i>dom</i> , <i>daíḡ</i> , to me.	Dat. <i>dúḡḡḡ</i> , to us.
Acc. <i>mé</i> , me.	Acc. <i>ḡḡḡ</i> or <i>riḡḡḡ</i> , us.

ḡḡḡ, myself (emphatic form).

Nom. <i>mḡḡḡ</i> , <i>mḡḡḡḡ</i> , myself.	Nom. <i>riḡḡḡḡ</i> , ourselves.
Gen. <i>mḡḡ-ḡḡ</i> , my own.	Gen. <i>ár-ḡḡḡḡ</i> , our own.
Dat. <i>domḡḡḡ</i> , <i>daíḡḡḡḡ</i> , to myself.	Dat. <i>dúḡḡḡḡḡḡ</i> , to ourselves.
Acc. <i>mḡḡḡḡ</i> , <i>mḡḡḡḡḡḡ</i> , myself.	Acc. <i>ḡḡḡḡḡḡḡḡḡḡ</i> , ourselves.

Tú, *thou.*

Singular.	Plural.
Nom. tú,	Nom. ṙṙḃ.
Gen. do.	Gen. búṙ, báṙ.
Dat. duṙc.	Dat. oaoṙḃ, dṙḃ.
Acc. tú.	Acc. ṙḃ, ṙṙḃ.
Voc. tú.	Voc. ṙṙḃ, ṙḃ.

Sé, *he.*

Nom. sé.	Nom. ṙṙad.
Gen. a.	Gen. a.
Dat. do.	Dat. doṙḃ.
Acc. é.	Acc. ṙad.

Sṙ, *she.*

Nom. sṙ.	Nom. ṙṙad.
Gen. a.	Gen. a.
Dat. dṙ.	Dat. doṙḃ.
Acc. í.	Acc. ṙad.

PERSONAL PRONOUNS COMPOUNDED WITH PREPOSITIONS.

1. In Irish, the personal and the possessive pronouns unite with prepositions, each compound forming a single word.

2. In each case the preposition and the pronoun are amalgamated, and the latter changes its form, so as to be considerably, and, in some cases, completely disguised.

3. These "prepositional pronouns," as they are sometimes called, are of constant occurrence in the language—scarce a sentence in which they are not met with: they are therefore of great importance, and the learner should get them all off by heart.

4. The following prepositions unite with personal pronouns:—*aṙ*; *aṙṙ* or *aṙ*; *aṙṙ* or *ṙ*; *aṙ*; *cuṙ*; *de*; *do*; *cuṙṙ* or *ṙṙṙ*; *fa* or *faoṙ*; *le*; *o* or *ua*; *ṙoṙṙ*; *reac*; *taṙ*; *ṙṙé*; *uaṙ*; *uṙ* or *ṙṙ*.

5. The following are the combinations of these prepositions with the personal pronouns.

6. The emphatic particles may be used with these combinations also, as well as with the uncompounded pronouns, of which one example is given:—

aṙ, *at or with.*

Singular.	Plural.
<i>aṙaṙ</i> , with, or at me.	<i>aṙaṙṙṙ</i> , with us.
<i>aṙac</i> , <i>aṙad</i> , with thee.	<i>aṙaṙḃ</i> , with you.
<i>aṙe</i> , with him.	<i>aca</i> or <i>acu</i> , with them.
<i>aṙce</i> or <i>aṙcṙ</i> , with her.	

Ἐα or ἑαοί, under.

Singular.	Plural.
ἑῦμ, under me.	ἑῦμῆν, under us.
ἑῦτ, under thee.	ἑῦῖν, under you.
ἑαοί, under him.	ἑῦτά, under them.
ἑῦτε, under her.	

Ἔε, with.

ἔμ, with me.	ἔμῆν, with us.
ἔετ, with thee.	ἔῖν, with you.
ἔει, with him.	ἔό, with them.
ἔετε, ἔῃ, with her.	

Ἔε is often written με in books, and its pronominal combinations in this form are often met with. They are as follows:—

μεμ, with me.	μεμῆν, with us.
μετ, with thee.	μεῖν, with you.
μεῖ, with him.	μεῖα, with them.
μεῖα, with her.	

Ἐ or εα from.

εαμ, from me.	εαμῆν, from us.
εατ, from thee.	εαῖν, from you.
εαδ, from him.	εατά, from them.
εατε, εατε, from her.	

Ἐοίη, before.

ἰοίημ, before me.	ἰοίημῆν, before us.
ἰοίητ, before thee.	ἰοίημῖν, before you.
ἰοίηε, before him.	ἰοίημα, before them.
ἰοίηπε, ἰοίηφι, before her.	

Ἐεᾶ, beside.

εεᾶμ, beside me.	εεᾶμῆν, beside us.
εεᾶτ, beside thee.	εεᾶμῖν, beside you.
εεᾶ ε, beside him.	εεᾶα, beside them.
εεᾶ ῖ, beside her.	

Ἐαυ, beyond, over.

εαυμ, εαυμ, over me.	εαυμῆν, εαυμῆν, over us.
εαυτ, εαυτ, over thee.	εαυμῖν, εαυμῖν, over you.
εαυμῖ, over him.	εαυματα, εαυμα, over them.
εαυμτε, εαυμφι, over her.	

Ἐρε, through.

ερεμ, through me.	ερεμῆν, through us.
ερετ, through thee.	ερεμῖν, through you.
ερεδ, through him.	ερεμοῦα, through them.
ερετε, ερεφι, through her.	

Uar, *above.*

Singular.	Plural.
uaram, above me.	uaraɪnɪ, above us.
uaraɓ, above thee.	uaraɪb, above you.
uara, above him.	uaraɓa, above them.
uairɓe, uairɓi, above her.	

Um or im, *about.*

amam, about me.	umainɪ, about us.
umab, about thee.	umaiɓ, about you.
ume, about him.	umpa, about them.
umpe, umpɪ, about her.	

II. POSSESSIVE PRONOUNS.

1. The possessive pronouns, which are merely the genitives of the personal pronouns, are as follows:—mo, my; do, thy; a, his or her; aɪ, our; baɪ or buɪ, your; a, their. The three possessives, a, his, a, her, and a, their, are distinguished by the initial letter changes of the next word. (See pages 14, 16, 17; see also Syntax.)

2. The o of mo and do is omitted before a vowel or before ɸ; as n'aɓaɪɪ, my father; n'ɸeaiɪnɪ, my land. And do is often changed, before a vowel, to ɓ, ɓ, and h; as ɓ'aɓaɪɪ, ɓ'aɓaɪɪ, or h-aɓaɪɪ, thy father.

3. The possessive pronouns also take the emphatic increase, with this peculiarity, however, that the emphatic particle always follows the noun that comes after the possessive, or if the noun be qualified by one or more adjectives, the emphatic particle comes last of all; and, in accordance with the rule caol le caol, its vowel is generally broad or slender according as the last vowel of the word it follows is broad or slender; as mo ɓeac-ra, my house, or my own house; mo ɓeac moɸu buɪɓe-rɪ, my great yellow house. And these again may be followed by ɸeɪɪ, (Par. 4, page 38), rendering the expression still more emphatic; as mo ɓeac-ra ɸeɪɪ, my own house.

POSSESSIVE PRONOUNS COMPOUNDED WITH PREPOSITIONS.

1. The possessive pronouns are amalgamated with prepositions, much in the same way as the personal pronouns; as beɪɪ beaɪ-n'aɓɓ oɸi ɓɸoɸɓe, bear a blessing *from my* heart.

2. The following are the most important of these combinations:—

Aɪɪ, *in.*

Singular.	Plural.
aɪ, aɪ', in my.	ɪaɪɪ, 'ɪaɪɪ, in our.
aɓ, aɓ', in thy.	—
ɸoɸa, ɸa, 'ɸa, in his or her,	ɸoɸa, ɸa, 'ɸa, in their.

Do, to.

Singular.	Plural.
dom, dom', to my.	dáir, d'áir, to our.
dod, dod', to thy.	—
dá, d'a, to his or her.	dá, d'a, to their.

le, with.

lem, lem', with my.	leir, le'ir, with our.
led, led', with thy.	—
lena, le η-a, with his or her.	lena, le η-a, with their.

O or ua, from.

óm, óm', from my.	óair, ó'ir, from our.
ód, ód', from thy.	—
óna, ó η-a, from his or her.	óna, o ηa, from their.

3. Those that are identical in form and different in meaning are distinguished by the initial letter changes they produce in the next word; as óna éiḡ, from his house; óna eiḡ, from her house; óna d-eiḡ, from their house.

4. These combinations can also take the emphatic increase, like those of the personal pronouns, with the peculiarity, however, noticed in Par. 3, above; as óm éiḡ ḡóir aḡd-ra, from my great high house.

III. RELATIVE PRONOUNS.

1. There are three relative pronouns in Irish:—a, who, which, that; noç, who, which, that; naç, which not; as aḡ té a buaḡear, the person who strikes; aḡ lḡaiḡ noç a deiḡi zo b-fuḡl tú rlan, the physician that says that you are well; aḡ té noç b-fuḡl lḡidḡir, ḡí fulaḡir dó béiç ḡlḡc, "the person who is not strong, it is necessary for him to be wise."

2. Oá sometimes takes the place of the relative a; and in some grammars it is counted as a distinct relative pronoun; as táid na ḡaolta ir feáir aḡum dá b-fuḡl a d-talaḡ 'Eirneann, "I have the best friends *that are* (to be found) in the land of Erin." And sometimes do stands for the relative a.

3. The relative a has sometimes the sense of "all which" or "all that;" as beiḡ beannaçt cum a ḡaḡneann de ḡolḡaiç Ir a'r Eibḡir, "bear a blessing to *all that* live of the seed of Ir and Eber;" a b-fuḡl ran talaḡ d'aḡme Uḡaḡne, "*all that are* in the land of the tribe of Maine."

4. The relative pronouns are not declined.

IV. DEMONSTRATIVE PRONOUNS.

1. The demonstrative pronouns are ro, this, these; riḡ, that, those; rúo or úd, yonder; as an feaḡ ro, this man; na ḡa riḡ, those women; rúo í rḡor, "yonder she (moves) below."

V. INTERROGATIVE PRONOUNS.

1. There are usually reckoned three interrogative pronouns:—
 cīa or cē, who? cā, what? where? cad or cīeud, what? as
 cīa ēīuēāīz̄ tū? who created thee? cad deīī tū? what sayest
 thou? ca b̄-fuīl aī fēaī rīī? where is that man? cīeud īr
 ēīzīī? what is necessary?

VI. INDEFINITE PRONOUNS.

1. The following are the principal indefinite pronouns:—

aōī, one.	ceac̄taī, either.
ēīzīī, some, certain.	uīle, all.
eīle, oīle, other.	a cēīle, each other.
cāc̄, all.	aī tē, aī tī, the person who.
zāc̄, each, every.	cīa b'ē, cībē, zībē, whoever.
zāc̄ uīle, every.	

2. The indefinite pronouns are not declined; except cāc̄, which has a genitive form, cāīc̄; and zāc̄, which is sometimes made zāca in the genitive.

CHAPTER V.

THE VERB.

1. Irish verbs are inflected for number, person, mood, tense, and voice.

2. The conjugation is arranged, not according to the initial changes, but according to terminations.

3. As to the initial changes:—See pages 15 and 55 for the particles that aspirate, and page 17 for the particles that eclipse, the initials of verbs.

I. PERSONS: SYNTHETIC AND ANALYTIC FORMS.

1. The verb has three persons singular and three persons plural; and it has inflections for the whole six in the indicative and conditional moods of the active voice, except in one tense of the indicative.

2. The six forms of the present tense, indicative mood, active voice, of the verb tōz̄, take, are as follows:—

Singular.	Plural.
1. tōz̄aīī, I take.	1. tōz̄aīaīaīd, we take.
2. tōz̄aīī, thou takest.	2. tōz̄t̄aīaī, ye take.
3. tōz̄aīd̄ rē, he takes.	3. tōz̄aīd, they take.

3. This is what is called the synthetic form of the verb. The synthetic form is that in which the persons are expressed by inflections or terminations,

4. These six forms express the sense perfectly, without the accompaniment of the pronouns (except in the case of the third person singular): that is τόζαηη, as it stands, without using along with it the pronoun τύ, thou, expresses perfectly "thou takest;" and so of the others.

5. But there is another way of expressing the persons, singular and plural, namely, by using one form of the verb for the whole six, and putting in the pronouns to distinguish the persons and numbers. This is what is called the analytic form of the verb.

6. In this analytic mode of expressing the persons and numbers, the form of the verb that is used is the same as the form for the third person singular; and the persons, singular and plural, are expressed as follows:—

- | | |
|----------------------------|----------------------------|
| 1. τόζαηδ με, I take. | 1. τόζαηδ ηηη, we take. |
| 2. τόζαηδ τύ, thou takest. | 2. τόζαηδ ηηβ, ye take. |
| 3. τόζαηδ ηέ, he takes. | 3. τόζαηδ ηηαδ, they take. |

7. The third singular of the verb is not a synthetic form like the other five, that is, it does not include the pronoun as they do. In the third person singular, therefore, the pronoun must be always expressed in order to distinguish the number and person; unless there is a noun, or that the nominative is in some other way obvious from the construction.

8. But generally speaking it is not allowable to express any other pronoun along with the corresponding synthetic form of the verb:—For example, it would be wrong to say δέαηαηηηη ηέ or δέαηαηαοηδ ηηηη, both expressions being tautological.

9. This rule, in the case of the third person plural, however, is sometimes not observed; for such expressions as ηολαηδ ηάδ and ηολαηδ ηηαδ—they praise, they will praise—are often met with, though ηολαηδ or ηολαηδ alone would answer. And a like construction (in the third plural) is often used when the nominative is a plural noun, both in the present and in the past tense; as ηηγαλλαηδ ηηε βηλεαδ, "the sons of Milé go; ηαηη δο δοναδαηη ηα δηαοηε, "when the druids saw."

10. The emphatic particles may be postfixed to all the persons of verbs, in the same manner as to pronouns and nouns (p. 38); as ηολαηη-ηε, I praise; ηολαηη-ηε, thou praisest. And in all such cases, the word ηέηη (p. 38) may be used to make the expression still more emphatic; as δο δηηηηηηηη-ηε ηέηη ηο λεαηβ α δοδλαδ, "I myself would put my child to sleep."

11. The general tendency of modern languages is to drop synthetic forms, and to become more analytic. The English language, for example, has lost nearly all its inflections, and supplied their place by prepositions, conjunctions, adverbs, and auxiliary verbs. Following this tendency, the synthetic forms of the Irish verb are falling into disuse in the spoken language; and it has been already

remarked (page 26) that the noun-inflection *ib* is no longer used in speaking.* But all these forms are quite common in even the most modern Irish books; and the learner must, therefore, make himself quite familiar with them.

II. TENSES.

1. In English a regular verb has only two different forms to express tense:—I love, I loved; all the other tenses are expressed by means of auxiliaries.

2. In Irish, a regular verb has five different forms in the indicative mood for tense. Reckoning those tenses only which are expressed by inflection, an Irish regular verb has therefore FIVE TENSES in the indicative mood.

3. The five tenses, with the synthetic forms for the first person singular of the regular verb *ḡoill*, call, are:—

(1.) The present; *ḡoillim*, I call.

(2.) The consuetudinal or habitual present; *ḡoillfeadh mé*, I am in the habit of calling.

(3.) The past, or simple past, or perfect (for it is known by all these three names); *ḡoillfeadh*, I called.

(4.) The consuetudinal or habitual past; *ḡoillfeadh*, I used to call, or I used to be calling.

(5.) The future; *ḡoillfeadh*, I shall or will call.

III. MOODS AND VOICES.

1. The Irish regular verb has four moods:—The Imperative, the Indicative, the Conditional, and the Infinitive. These are the only moods for which the regular verb has distinct inflections.

2. There are, indeed, other moods, which are expressed, not by inflection, but by means of certain conjunctions and particles set before the verb; and these additional moods are given in conjugation in some Irish grammars; but as their forms do not differ from the forms of the five given above, they are not included here.

3. It is only the indicative mood of the verb that has tense inflection; in each of the other moods there is only one tense.

4. There are two voices, the active and the passive. It is only in the active voice that there are personal inflections; in the passive voice, the three persons singular and the three persons plural have all six the same form, rendering it necessary, of course, that the pronoun be always expressed when there is no noun.

* This is true only in certain parts of Ireland; in Connaught it is very generally pronounced.

IV. CONJUGATION OF A REGULAR VERB.

Ծալ, *strike.*

ACTIVE VOICE.

IMPERATIVE MOOD.

Singular.

Plural.

- | | |
|---------------------------------|------------------------------|
| 1. | 1. Ծալիմիր, let us strike. |
| 2. Ծալ, strike thou. | 2. Ծալիձ, strike ye. |
| 3. Ծալեաձ ը, let him
strike. | 3. Ծալիձիր, let them strike. |

INDICATIVE MOOD.

Present Tense.

- | | |
|--------------------------|------------------------|
| 1. Ծալիմ, I strike. | 1. Ծալիմիձ, we strike. |
| 2. Ծալիր, thou strikest. | 2. Ծալիժ, ye strike. |
| 3. Ծալիձ ը, he strikes. | 3. Ծալիձ, they strike. |

*Consuetudinal or Habitual Present.*Ծալեաղի մ, *I usually strike.**(The same form for all persons and numbers.)**Past.*

- | | |
|---------------------------|--------------------------|
| 1. Ծալեար, I struck. | 1. Ծալեարիմ, we struck. |
| 2. Ծալիր, thou struckest. | 2. Ծալեարիձ, ye struck. |
| 3. Ծալ ը, he struck. | 3. Ծալեարիձ, they struck |

Consuetudinal Past.

- | | |
|---------------------------------------|-------------------------------------|
| 1. Ծալիղի, I used to
strike. | 1. Ծալիղիր, we used to strike. |
| 2. Ծալիժեա, thou usedst
to strike. | 2. Ծալիժի, ye used to strike. |
| 3. Ծալեաձ ը, he used
to strike. | 3. Ծալիձիր, they used to
strike. |

Future

- | | |
|----------------------------------|-------------------------------|
| 1. Ծալիբեաձ, I will strike. | 1. Ծալիբիմիձ, we will strike. |
| 2. Ծալիբիր, thou wilt
strike. | 2. Ծալիբիձ, ye will strike. |
| 3. Ծալիբիձ ը, he will
strike. | 3. Ծալիբիձ, they will strike. |

(For the relative form of this tense, see page 49).

CONDITIONAL MOOD.

- | | |
|-------------------------------------|-------------------------------------|
| 1. Ծալիբիղի, I would
strike. | 1. Ծալիբիղիր, we would strike. |
| 2. Ծալիբեա, thou wouldst
strike. | 2. Ծալիբիձ, ye would strike. |
| 3. Ծալիբեաձ, ը, he would
strike. | 3. Ծալիբիձիր, they would
strike. |

INFINITIVE MOOD.

Օօ Բսալած, *to strike.*

PARTICIPLE.

ԱՅ Բսալած, *striking.*

PASSIVE VOICE.

IMPERATIVE MOOD.

(*The same as the Indicative Present.*)

INDICATIVE MOOD.

Present Tense.

Singular.

1. Բսալեալ մէ, I am struck.
2. Բսալեալ է՛ւ, thou struck.
3. Բսալեալ է, he is struck.

Plural.

1. Բսալեալ ըրող or լող, we are struck.
2. Բսալեալ ըլն or լն, ye are struck.
3. Բսալեալ լած, they are struck.

Consuetudinal Present.

(*Same as the Indicative Present.*)

Past.

1. Բսալեած մէ, I was struck.
2. Բսալեած է՛ւ, thou wast struck.
3. Բսալեած է, he was struck.
1. Բսալեած ըրող or լող, we were struck.
2. Բսալեած ըլն or լն, ye were struck.
3. Բսալեած լած, they were struck.

Consuetudinal Past.

1. Բսալելի մէ, I used to be struck.
2. Բսալելի է՛ւ, thou usedst to be struck.
3. Բսալելի է, he used to be struck.
1. Բսալելի ըրող or լող, we used to be struck.
2. Բսալելի ըլն or լն, ye used to be struck.
3. Բսալելի լած, they used to be struck.

Future.

1. Բսալբօալ մէ, I shall or will be struck.
2. Բսալբօալ է՛ւ, thou shalt or wilt be struck.
3. Բսալբօալ է, he shall or will be struck.
1. Բսալբօալ ըրող or լող, we shall or will be struck.
2. Բսալբօալ ըլն or լն, ye shall or will be struck.
3. Բսալբօալ լած, they shall or will be struck.

CONDITIONAL MOOD.

Singular.

1. *buaifíde mé*, I would be struck.
2. *buaifíde cú*, thou wouldst be struck.
3. *buaifíde é*, he would be struck.

Plural.

1. *buaifíde rínn* or *ínn*, we would be struck.
2. *buaifíde ríib* or *íib*, ye would be struck.
3. *buaifíde íad*, they would be struck.

INFINITIVE MOOD.

Oo beir buaite, to be struck.

PARTICIPLE.

buaite, struck.

IV. RELATIVE FORM OF THE VERB.

1. Besides the forms given in the preceding conjugation, the verb has what is called a "relative form," *i.e.*, a form used after a relative pronoun. In two of the tenses of the indicative mood, namely, the present and the future, the relative form has a distinct inflection, *viz.*, *ar*, *ear*, or *ior*.

2. For instance, "the person who calls," is translated, not by *an té a íoimíð* (3rd singular form), but by *an té a íoimear*; and "he who will steal," is not *an té a íoibíð* (3rd singular form), but *an té a íoibfear*. In other tenses and moods the relative form is the same as that of the third person singular.

3. This form of the verb is often used even when its nominative is not a relative, but a noun or personal pronoun, to express the "historical present," *i.e.*, the present tense used for the past; as *riaftaígear Aímhíuín a h-ainn í*, "Amergin asks her name of her." (See for a further account of the historical present, p. 50)

4. And not unfrequently the relative form is used as an ordinary present; as, *Jr móru an t-ionúna lioimra, nac d'Óirín íaíruar Fionn mure*, "It is a great wonder to me that it is not for Oisín Finn seeks (íaíruar) me."

3

V. FORMATION AND USES OF THE MOODS AND TENSES OF REGULAR VERBS.

1. The second person singular of the imperative mood, active voice, is the root or simplest form of the verb, from which all the other persons, moods, and tenses are formed directly, by affixing the various terminations.

2. Verbs which end in a consonant preceded by a slender vowel have all their inflections precisely alike those of *buaí* (with the exception mentioned in Par. 4, page 52); and they all begin with a slender vowel (except sometimes that of the infinitive) in accordance with the rule *caoll e caol*, &c.

3. But when the final consonant is preceded by a broad vowel, the synthetic terminations begin with a broad vowel, in accordance with the same rule. A table of the full conjugation of a regular verb, ending in a broad vowel, is given at page 55.

4. The root generally remains unchanged through all the variations of the verb, except that it occasionally suffers a trifling change in the infinitive. The cases in which the root suffers change in the infinitive are mentioned in Par. 4, page 51. See also Par. 8, page 53.

INDICATIVE MOOD.

Present Tense.

1. The present tense is formed by affixing the six personal terminations $\eta\eta$ (or $\alpha\eta\eta$), $\eta\mu$ (or $\alpha\eta\mu$), &c., to the root.

2. The historical present *i.e.*, that is the present tense used for the past, or where past time is intended, is very common in Irish; indeed in many narrative and historical pieces it occurs quite as often as the ordinary past tense in relating past transactions; as, $\text{Oala } \eta\epsilon, \text{ } \eta\sigma\eta\sigma\eta\mu\sigma, \text{ } \sigma\eta\eta\eta\eta\eta\eta\eta\eta\eta\eta \text{ } \eta\sigma\eta \text{ } \eta\sigma\eta, \text{ } \text{“as to Ith, indeed, a ship is prepared by him”}$ (instead of $\sigma\eta\eta\eta\eta\eta\eta\eta\eta\eta\eta$, *was prepared*).

3. It has been already remarked (Par. 3, page 49), that the relative form of the verb is often used for the historical present; as $\eta\sigma\eta\eta\eta \text{ } \sigma\eta\eta\eta\eta\eta\eta \text{ } \eta\sigma\eta\eta$, “Eremon reveals to them.”

Consuetudinal Past and Present.

1. These tenses express customary action; as $\eta\sigma\eta\eta\eta\eta\eta \text{ } \eta\sigma\eta$, I am in the habit of reading; $\eta\sigma\eta\eta\eta\eta\eta \text{ } \eta\sigma\eta$, he used to read, or he was in the habit of reading.

2. In the sentences, “I write always after breakfast,” and “he sold bread in his youth,” the verbs “write” and “sold” are used in the same manner as the Irish consuetudinal tense; except, indeed, that the idea is not so distinctly marked by the English phrase as by the Irish.

3. One of the particles $\sigma\eta$ or $\eta\sigma$ is usually prefixed to the consuetudinal past; and the initial consonant is generally aspirated; as $\sigma\eta \text{ } \eta\sigma\eta\eta\eta\eta\eta$, they used to call.

4. The Irish peasantry seem to feel the want of these two tenses when they are speaking English; and they often, in fact, attempt to import them into the English language, even in districts where no Irish has been spoken for generations; thus they will say, “I do be reading while you do be writing;” “I used to be walking every day while I lived in the country,” &c.

Past Tense.

1. In the past tense the initial consonant is aspirated in the active voice, but not in the passive voice.

2. With the exception of the aspiration, the third singular past tense is the same as the root.

3. One of the particles *do* or *no* is generally prefixed to the past tense in both voices; as *do fearar*, I stood; *no cōdlaip*, thou sleepedst; *do mōlad iad*, they were praised; *no buailead é*, he was struck.

4. The particle *no*, used as a mark of the past tense, is often compounded with other particles, the *n* only being retained, but it still causes aspiration in the active voice, as if it were uncompounded.

The principal of these compounds are:—

(1.) *Ái*, whether? from *ai* and *no*; as *ai buaíl ré*, did he strike?

(2.) *Ṣu*, that, from *so* and *no*; as *ciuidim ṣu buaíl ré*, I believe that he struck.

(3.) *Ḃu*, unless, from *mu* and *no*; as *muḃar buaíl ré* unless he struck.

(4.) *Nac*, or *na'*, or *na*, whether not? from *na* and *no*; as *na buaíl ré*, did not he strike?

(5.) *Ní*, not, from *ní* and *no*; as *ní buaíl ré*, he did not strike.*

6. The particle *no*, as a sign of past tense, is also often combined with the relative pronoun *a*; as *ai feara d'ar zeallar mo leaba*, the man *to whom* I promised my book. For a further account of this, see Syntax.

Future Tense.

1. All the personal inflections of this tense, in both voices, begin with the letter *f*, which, in the spoken language, is often sounded like *h*; thus *dúnfad*, I shall shut, is colloquially pronounced *doonhad* (instead of *doonfad*).

CONDITIONAL MOOD.

1. The particle *do*, causing aspiration, is often prefixed to verbs in the conditional mood; as *do fubalfaigh*, I would walk.

2. But very often also *dá*, if, or *mu*, unless, is prefixed, and with these particles the initial is eclipsed; as *dá b-faḃaigh-ré mo moḃa*, "if I would get my choice;" *mu* *m-beidead ré*, "unless he would be."

* See Second Irish Book, by the Society for the Preservation of the Irish Language.

3. It is important to note that the personal inflections of this mood in both voices, as well as those of the future indicative, all begin with *ϕ*.

INFINITIVE MOOD.

1. The initial is aspirated in the infinitive, whether the particle *do* or *α* be expressed or understood. But in some cases the aspiration is prevented by other grammatical influences, as shown in next paragraph.

2. When the infinitive is preceded by one of the possessive pronouns, the initial of the verb falls under the influence of the pronoun.*

(1.) It is aspirated for *α*, his; *μο*, my; *δο*, thy (but here the influence of the pronoun is not perceived, as there would be aspiration without it); as *δα ζοηαδ*, to wound him (literally to his wounding, and so of the others); *δο η'ζοηαδ*, to wound me; *δο δ'ζοηαδ*, to wound thee.

(2.) It is preserved from aspiration by *α*, her; as *δα ζοηαδ*, to wound her.

(3.) It is eclipsed by the three plural possessives; as *δαη η-ζοηαδ*, to wound us; *δο βυη η-ζοηαδ*, to wound you; *δα η-ζοηαδ*, to wound them.

3. The general way of forming the infinitive is by adding *αδ* or *εαδ*, the first when the last vowel of the root is broad; the second when the vowel is slender.

4. If the final consonant of the root be preceded by *ι* as part of a diphthong or triphthong, the final vowel is made broad in the infinitive (which is usually, but not always, done by dropping the *ι*); as *βυαι*, *βυααδ*, to strike; *ζοηη*, *ζοηαδ*, to wound. But if the final consonant be preceded by *ι* alone, the infinitive is formed according to the general rule in the last paragraph; as *ηλλ*, *ηλλεαδ*, to destroy.

5. The infinitives of many verbs are formed irregularly, and these must be learned by practice. The following are a few of such verbs. Each group exhibits a particular type, in which the manner of forming the infinitive will be obvious on inspection:—

Root or Imperative.

εαζ.
ρηαιη.
δλ.

Infinitive.

δ'εαζ, to die.
δο ρηαιη, to swim.
δ'δλ, to drink.

* For the influence of the possessive pronouns, see pages 15, 17, and see also Syntax.

Root or imperative.	Infinitive.
ταρτιαηζ.	δο ταρτιαηζ, to draw.
cuη.	δο cuη, to put.
ζοη.	δο ζοη, to weep.
ηηη.	δ'ηηηε, to play.
ηηζη.	δ'ηηηε, to graze.
διβηη.	δο διβηηε, to banish.
ceη.	δο ceηε, to conceal.
φαζ.	δ' φαζβεηη, to leave.
ζαβ.	δο ζαβαη, to take.
τοζ.	δο τοζβαη, to lift.
leaη.	δο leaηaηηaηη, to follow.
caηη.	δο caηηeaiηaηη, to lose.
οη.	δ'οηleaηηaηη, to nourish.
φοηη.	δ'φοηηleaηηaηη, to suit.
ζλυaηη.	δο ζλυaηaετ, to move.
εηηε.	δ'εηηεaετ, to listen.

THE PARTICIPLE.

1. The active participle is merely the infinitive mood, with some such particle as αζ prefixed; as αζ buααδ, at beating, or a-beating.

2. The passive participle is generally formed by adding τε or εε when the last vowel of the root is slender, and τa or εa, when broad.

When the root ends in ε, ο, ι, η, ηη, ρ, ε, or ζ (except verbs in uηζ or ηζ), the τ of the participial termination retains its sound: after any other consonant, and also in verbs in uηζ or ηζ, the τ is aspirated. In the passive voice, the terminations τaη and εη follow the same law.

VI. VERBS IN uηζ, &c.

1. Verbs of two or more syllables, with the root ending in uηζ, or ηζ, and some other dissyllabic verbs ending in ηη, ηηη, and ηηη, differ so decidedly from the model verb in the formation of some of their moods and tenses, that some writers,* not without reason, class them as a second conjugation.

2. The difference lies in the formation of the future and of the conditional in both voices; the other moods and tenses are formed like those of buαη.

3. In buαη, and all other verbs of its kind, the letter ρ is a characteristic mark of the future and of the conditional mood in both voices, as stated in Par. 3, page 52.

* As, for instance, the Rev. Canon Bourke, in his "College Irish Grammar."

4. The verbs now under consideration have no *þ* in the future and conditional, but they take instead *eó*, before the final consonant of the root.

5. In addition to this change, verbs in *u1þ* and *1þ* change *þ* into *ç*; though in the spoken language, both of Munster and of Connaught, the *þ* retains its place.

6. There is no other inflectional difference between these verbs and *bu1þ*, the personal terminations following the final consonant of the root being the same in all cases.

7. In the other tenses of the indicative, verbs in *1þ*, *1n*, *1u*, and *1r* are almost always synecopated by the elision of the vowel or diphthong preceding the final root-consonant; as *cod1þ*, sleep; *cod1a1n*, I sleep, &c. (But this change is not regarded as a grammatical inflection).

8. Verbs in *u1þ* almost always form their infinitive by dropping *1* and adding the usual termination *að*; those in *1þ* alone (not preceded by *u*), retain the *1* and take *u* after it in the infinitive; as *co1n1a1rçu1þ*, mark; infinitive, *co1n1a1rçu1það*; *co1n1a1r1þ*, advise; infinitive, *co1n1a1r1þu1það*.

9. Sometimes there are other slight changes, caused chiefly by the rule *caol le caol*, &c., which will be obvious on inspection.

10. The following are a few examples of the formation of the present and future indicative, and of the conditional mood, in such verbs. The first person singular only is given in each case, as the other persons have the same terminations as *bu1þ* and *mcall*:—

Root or imperative.	Pres. indicative.	Future indicative.	Conditional Mood.
<i>D1n1þ</i> , direct.	<i>d1n1þ1n</i>	<i>d1neóçad</i> .	<i>d1neóç1a1n</i> .
<i>þ1aðu1þ</i> , love.	<i>þ1aðu1þ1n</i> .	<i>þ1a1ðeóçad</i> .	<i>þ1a1ðeóç1a1n</i> .
<i>lab1n</i> , speak.	<i>lab1n1n</i> .	<i>la1beórad</i> .	<i>la1beórad1n</i> .
<i>ca1n1u1n</i> , draw.	<i>ca1n1n</i> .	<i>ca1neórad</i> .	<i>ca1neórad1n</i> .
<i>fo1rç1þ</i> , open.	<i>fo1rç1a1n</i> .	<i>fo1rçeólad</i> .	<i>fo1rçeólad1n</i> .
<i>co1ra1n</i> , defend.	<i>co1ra1n1n</i> .	<i>co1reórad</i> .	<i>co1reórad1n</i> .
<i>1n1r</i> , tell.	<i>1n1r1n</i> .	<i>1neórad</i> .	<i>1neórad1n</i> .
<i>D1b1u</i> , banish.	<i>d1b1u1n</i> .	<i>d1beórad</i> .	<i>d1beórad1n</i> .

11. In Munster, verbs in *1þ*, *1n*, *1u*, and *1r*, are conjugated like those in *u1þ* or *1þ*; and the *eó* comes *after* the final consonant: thus *d1b1u*, banish is made in the future and conditional, *d1b1eóçad* and *d1b1eóç1a1n*, as if the verb were *d1b1u1þ*.

12. A table of the full conjugation of a verb in *u1þ* (*a1ðu1þ*) is given at page 56.

VII. IRREGULAR VERBS.

1. There are fourteen irregular verbs, several of which are defective, *i.e.*, want one or more of the moods and tenses. The conjugation of some of them, it will be observed, is made up of those of two or more different verbs.

2. It will also be observed that through all their irregularities, the five synthetic personal terminations remain unchanged; for which reason it is scarcely correct to call these verbs irregular at all.

3. The irregular verbs are as follows:—(1), τάμ, I am; (2), the assertive verb ἴρ; (3), βειμ, I give; (4), βειμ, I bear; (5), ḥίμ, I see (including φειμ); (6), κλυμ, I hear; (7), δέημ, I do; (8), ζήμ or ηίμ, I do; (9), δεμ, I say; (10), φαζμ or ζειβμ, I find; (11), ἰτμ, I eat; (12), ἱξμ, I reach; (13), τέιδμ, I go; (14), τιξμ, I come.

4. the following is the synthetic conjugation of the irregular verbs (except in the case of the second verb ἴρ, which has no synthetic conjugation). They may be all conjugated analytically, by using the third person singular of each tense with the three personal pronouns, singular and plural, as shown in case of the regular verb, τόζαἰδ, at page 45. As an example, the analytic conjugation of the present tense of the first verb, τάμ, is given.

(1.) Τάμ, *I am.*

IMPERATIVE MOOD.

Singular.

1.
2. βί, be thou.
3. βιδεαδ ῥέ, or βιδδ ῥέ, let him be.

Plural.

1. βίμῖρ, let us be,
2. βιδδδ, be ye.
3. βιδῖρ, let them be.

INDICATIVE MOOD.

Present Tense.

- | | |
|--------------------------|-------------------------------|
| 1. τάμ, ατάμ, I am. | 1. τάμμοἰδ, ατάμμοἰδ, we are. |
| 2. τάμ, ατάμ, thou art. | 2. τάτμοἰ, ατάτμοἰ, ye are. |
| 3. τά ῥέ, ατά ῥέ, he is. | 3. τάἰδ, ατάἰδ, they are. |

Present Tense: analytic conjugation.

- | | |
|-----------------------------|-------------------------------|
| 1. τά μέ, ατά μέ, I am. | 1. τά ῖμῖν, ατά ῖμῖν, we are. |
| 2. τά τύ, ατά τύ, thou art. | 2. τά ῖβ, ατά ῖβ, ye are. |
| 3. τά ῥέ, ατά ῥέ, he is. | 3. τά ῖαδ, ατά ῖαδ, they are |

Consuetudinal Present.

- | | |
|--|--|
| 1. Բիծլոյմ, I am usually. | 1. Բիմիծ, Բիծմիծ, Բիտաօլծ, we are usually. |
| 2. Բիծլու, thou art usually. | 2. Բիժի, Բիծժի, ye are usually. |
| 3. Բիծեաղոյ ըն, or Բիտղոյ ըն, he is usually. | 3. Բիծ, Բիծլծ, they are usually. |

Interrogative and Negative Present.

(The negative particle is here used: see Par. 3, page 59.)

- | | |
|--------------------------------|---------------------------------|
| 1. Դի Բ-բուլլոյմ, I am not.* | 1. Դի Բ-բուլլոյմիծ, we are not. |
| 2. Դի Բ-բուլլու, thou art not. | 2. Դի Բ-բուլլուժի, ye are not. |
| 3. Դի Բ-բուլլ ըն, he is not. | 3. Դի Բ-բուլլիծ, they are not. |

Past Tense.

- | | |
|----------------------------|--------------------------------|
| 1. Բիծեալ, Բիտլ, I was. | 1. Բիծեալար, Բիտար, we were. |
| 2. Բիծլր, Բիլր, thou wert. | 2. Բիծեալար, Բիտար, ye were. |
| 3. Բիծ ըն, Բի ըն, he was. | 3. Բիծեալար, Բիտար, they were. |

Consuetudinal Past.

- | | |
|--------------------------------------|-------------------------------------|
| 1. Բիծլոյող, Բիող, I used to be. | 1. Բիծլոյլր, Բիողլր, we used to be. |
| 2. Բիծժեա, Բիժեա, thou usedst to be. | 2. Բիծժի, Բիժի, ye used to be. |
| 3. Բիծեաժ ըն, Բիժ ըն, he used to be. | 3. Բիծժլր, Բիժլր, they used to be. |

Interrogative and Negative Past.

(The negative particle is here used: see Par. 3, page 59.)

- | | |
|-----------------------------|-------------------------------|
| 1. Դի լաՅար, I was not. | 1. Դի լաՅարար, we were not. |
| 2. Դի լաՅար, thou wert not. | 2. Դի լաՅարար, ye were not. |
| 3. Դի լալ ըն, he was not. | 3. Դի լաՅարար, they were not. |

Future

- | | |
|----------------------------|---------------------------|
| 1. Բեյծեաժ, I shall be. | 1. Բեծմիծ, we shall be. |
| 2. Բեյծլու, thou shalt be. | 2. Բեյծլծ, ye shall be. |
| 3. Բեյծ ըն, he shall be. | 3. Բեյծլծ, they shall be. |

CONDITIONAL MOOD.

- | | |
|------------------------------|----------------------------|
| 1. Բեյծլոյող, I would be. | 1. Բեյծլոյլր, we would be. |
| 2. Բեյծժեա, thou wouldst be. | 2. Բեյծժի, ye would be. |
| 3. Բեյծեաժ ըն, he would be. | 3. Բեյծլր, they would be. |

* These are commonly pronounced in conversation as if the Բ-բուլ were omitted in each case; and accordingly they are often contracted in books to Դիլլոյմ, Դիլլու, Դիլ ըն, &c.

INFINITIVE MOOD.

Օօ ելլիլ, *to be.*

PARTICIPLE.

Այ ելլիլ, *being.*

1. Ես is commonly called the substantive verb, and answers to the verb "to be" in English.

2. It has two forms, which the regular verb has not, namely, a form in the present tense, for interrogation and negation, (Ելլիլ), and a form in the past tense for the same (Ելլար). These two are classed by O'Donovan as a subjunctive mood, present and past tense.

3. The forms Ելլիլ and Ելլար are used only—

(a.) After negative and interrogative particles; as Ելլիլ չի, he is not sick; Ելլիլ չի ինչ որ այնտեղ, I was not there: Ելլիլ արդե՞րք ինչ քան լողափ? "Is there wine in your ships?" Ելլիլ արդե՞րք ինչ քան լողափ? "Wert thou at the rock" (or at Carrick)? Չ որովհետեւ Ելլիլ ծուռ չեմ գալիս, "Since I cannot escape from him" (lit. "since it is not with me to go from him"); Ելլիլ արդե՞րք ինչ քան ինչ, արդե՞րք, "Is the knowledge of it with thyself, O Finn?" "It is not," says Finn."

(But these forms are not used after the interrogative ինչ, how?)

(b.) After յօ, that; as Ելլիլ յօ Ելլիլ ինչ լալի, I say that he is well.

(c.) After the relative արդե՞րք when it follows a preposition, or when it signifies "all that" (Par. 3, page 43); as արդե՞րք է արդե՞րք ինչ քան լողափ արդե՞րք ինչ քան լողափ, արդե՞րք արդե՞րք ինչ քան լողափ? "What answer wilt thou give to God, who has a knowledge of thy sins?" (lit. "with whom is a knowledge"); արդե՞րք արդե՞րք ինչ քան լողափ յօ Ելլիլ ինչ քան լողափ, "All that is from Ath-cliath (Dublin) to Oilean mor an Bharragh;" յօ Ելլիլ ինչ քան լողափ արդե՞րք ինչ քան լողափ, "We pledge our word, that we do not think it little, *all that* we shall bring of them to Finn."

4. This verb, like verbs in general, has a relative form for the present and future; but the relative form of the present is always a consuetudinal tense (whereas in regular verbs it is generally not consuetudinal); as արդե՞րք արդե՞րք ինչ քան լողափ (or արդե՞րք ինչ քան լողափ) արդե՞րք ինչ քան լողափ յօ արդե՞րք ինչ քան լողափ; "in like manner death is (in the habit of) lying in wait always for man."

5. The analytic form of this verb is now far more common in the spoken language than the synthetic. In asking a question the analytic form is often preferred: but in answering, the synthetic; as արդե՞րք արդե՞րք ինչ քան լողափ? Օօ ինչ քան լողափ. "Were you at Carrick?" "I was at Carrick."

6. The letter *a* is often prefixed to the present tense both in speaking and writing: *a*τá instead of τά, &c.; it is sometimes slightly emphatic, but often merely euphonic, and does not otherwise affect the meaning.

7. This verb is often used as an auxiliary, like the verb "to be" in English; and it is the only verb in the Irish language that can be regarded as an auxiliary. Thus, instead of *bua*ᵃᵗᵉᵃᵣᵢ ᵐᵉ, I am struck, we can say τά ᵐᵉ *bua*ᵃᵗᵉ: for *do bua*ᵃᵗᵉᵃᵈ ᵐᵉ, I was struck, *do b*ᵢ ᵐᵉ *bua*ᵃᵗᵉ, &c.

(2.) *J*ᵣ, *it is.*

INDICATIVE MOOD.

Present Tense.

*J*ᵣ, *it is:* as, *j*ᵣ ᵐᵉ, *it is I;* *j*ᵣ τᵃ, *it is thou.*

Past Tense.

*b*ᵃ or *b*ᵃᵈ, *it was;* as *b*ᵃ ᵐᵉ, *it was I.*

Future Tense.

*b*ᵃᵈ or *b*ᵃᵣ, *it will be.*

CONDITIONAL MOOD.

*b*ᵃᵈ, *it would be.*

1. This is commonly called the assertive verb.

2. It has no inflection for person, being always used in the third person singular: hence it is often called the impersonal verb.

3. It has no other moods and tenses besides those given above.

4. It takes other forms in the modern language, some of them contracted, which are often puzzling to learners.

5. After *z*ᵣᵢ, that, it is often made *ab*, which is given by O'Donovan as a subjunctive mood; as *c*ᵣᵉᵢᵈᵢᵐ *z*ᵣᵢ *ab é a*τá τᵢᵠᵠ, I believe that it is he (who) is sick: *m*ᵉᵃᵣᵢᵠᵢ ᵈᵃ ᵠᵉᵢᵠᵢ ᵣᵢᵠ, *z*ᵣᵢ *ab dá b*ᵢᵗᵃᶜᵃᵠᵢ ᵃᶜᵣᵢ ᵠᵢᶜᵉ ᵣᵢᵗ ᵠᵢᶜᵃᵈ Ἀᵇᵣᵃᵠᵃᵠᵠ ᶜᵃᵠᵢᶜ ᵠᵃᵣᶜᵠᵠᵠᵠ ᵢᵠ-ᵉᵢᵠᵢᵠᵠ, "I think, according to that, that it is two years and twenty before Abraham was born, that Partholon came to Erin."

6. Very often *z*ᵣᵢ *ab* is shortened by omitting the *a*; as *c*ᵣᵉᵢᵈᵢᵠᵢ *z*ᵣᵢ *'b*ᵉ, &c.; and sometimes the *b* is joined to *z*ᵣᵢ, as *c*ᵣᵉᵢᵈᵢᵠᵢ *z*ᵣᵢᵇ *é*, &c.

7. After *m*ᵃ, if, the *j* is omitted, as *m*ᵃ'ᵣ ᵠᵢᵠᵢ *é*. if it be true; and in this case the *r* is often joined to the *m*ᵃ; as *m*ᵃᵣ ᵠᵢᵠᵢ *é*; *m*ᵃᵣ ᵠᵃᵗᶜ ᵗᵉᵃᵗ ᵃ ᵇᵉᵗᶜ *b*ᵃᵃᵠ, *c*ᵃᵗᶜ ᵠᵃᵃᵠ ᵃᶜᵣᵢ ᵗᵉᵗᶜ, "If you wish to be long-lived, drink cold and hot" (or "drink cold and flee"—a celebrated Irish saying of double meaning).

8. Sometimes *ba* or *bá* is shortened to *b* or *bá* alone, which again is often joined to the preceding word; as *λαοὺ δ'ἀγὶ β'ἀγῆμ Ἱῆμ*, or *λαοὺ δ'ἀγὶ β'ἀγῆμ Ἱῆμ*, "a hero whose name was *Lir*;" of which the full construction is, *λαοὺ δὸ α ἦο βἀ ἀγῆμ Ἱῆμ*, "a hero to whom was name *Lir*."

9. There is another form, *բá*, for the past tense, which is now disused, but which is constantly used by Keating, and by other writers of the 17th and 18th centuries: *բá τῆεῆεῆεῆε, ἀη Ἐεῆτ ῖο*, "this *Ceat* was a mighty man;" *Ἱῆ ἴ (Banba) բá βεῆη δὸ βῆε Ἐὸλλ, δ'ἀγὶ β'ἀγῆμ δ'Ἱῆῖῖ Ἐεῆτῖ*, "it is she (*Banba*) who was wife to *Mac Coll*, whose proper name was *Eathur*;" or *Ἐ ἀη Ἐὸτῖβῆεῆεῆε բá τῆεῆεῆε Ἐὸτῖεῆη ῖῆη Ἐῖῖῖῖ ἀη τῖῖῖῖ δὸ Ἐῖῖῖῖ Ἤεῖῖῖῖῖ Ἐῖῖῖῖ*, "Since it is the *Scotic* language which was the common tongue in *Scythia* in the time that *Neimheadh* emigrated from it."†

10. For the distinction between *τá* and *Ἱῆ*, see *Idioms*.

(3.) *βῆεῖῖῖῖ, I give.*

ACTIVE VOICE.

IMPERATIVE MOOD.

Singular.	Plural.
1.	1. <i>τῖβῖῖῖῖῖῖῖῖῖῖῖῖ.</i>

3. τεϊδεαδ ἤϊ.	3. τέϊδιης.

INDICATIVE MOOD.

Present Tense.

1. τέϊδιη.	1. τέϊδιης.
2. τέϊδιη.	2. τέϊδιης, or τέϊδιη.
3. τέϊδ ἤϊ.	3. τέϊδιη.

Past Tense.

1. έιαδαρ.	1. έιαδαρη.
2. έιαδαρη.	2. έιαδαρη.
3. έιαδ ἤϊ.	3. έιαδαρη.

There is another form of the past tense of this verb used after the particles ζο, ης, &c., which O'Donovan classes as a subjunctive mood. The negative ης, which aspirates, is here prefixed: after ζο, the initial would be eclipsed.

1. ης δεαααρ.	1. ης δεαααρη.
2. ης δεαααρη.	2. ης δεαααρη.
3. ης δεαααδ ἤϊ.	3. ης δεαααρη.

First Person Singular.

<i>Consuet. Past :</i>	έϊδιηη.	} With the usual terminations for the other persons and numbers.
<i>Future :</i>	ἤϊαταδ, or ἤϊαταδ.	
<i>Conditional Mood :</i>	ἤϊαταρηη, or ἤϊαταρηη.	

Infinitive ; δο δυλ. *Participle ;* ας δυλ.

(14.) ԵԼԻՄ, *I come.*

IMPERATIVE MOOD.

Singular.	Plural.
1. . . .	1. ԵԼԻՄԻՐ, or ԵԼԵԱՄ.
2. ԵԱՐ, or ԵԼ.	2. ԵԼԻԾ.
3. ԵԼԵԱԾ ԴԵ.	3. ԵԼԻԾԻՐ.

INDICATIVE MOOD.

Present Tense.

1. ԵԼԻՄ.	1. ԵԼԻՄԻԾ.
2. ԵԼԻՐ.	2. ԵԼԻԾ, ԵԼԾԻԾ.
3. ԵԼ ԴԵ.	3. ԵԼԻԾ.

Past Tense.

1. ԵՆԾԱՐ.	1. ԵՆԾԱՄԱՐ.
2. ԵՆԾԱՐ.	2. ԵՆԾԱԲԱՐ.
3. ԵՆԻՅԻ ԴԵ.	3. ԵՆԾԱԾԱՐ.

First Person Singular.

<i>Consuet. Past:</i>	ԵԼԻՄՊ.	} With the usual terminations for the other persons and numbers.
<i>Future:</i>	ԵԼՈՐԲԱԾ.	
<i>Conditional Mood:</i>	ԵԼՈՐԲԱԻՊ.	

Infinitive; ծօ շեաճ. *Participle;* աջ շեաճ.

OTHER DEFECTIVE VERBS.

1. The following defective verbs are often met with in the modern language :

Ար, or ար, "says." It is used only in the third person, much like the English defective verb *quoth*; as ար ԴԵ, says he: ԵՐԵՍԾ ծօ ճեւրբար ծամ? ար Օյարմայծ: "What wilt thou do for me?" says Diarmaid; "ճեւրբար ծուր ճուր մար ա Բարլ ԴԵ, ար ԴԻԱԾ, "give knowledge to us where he is," said they (or say they)." In the older writings this verb is often written ol.

ԱՇ ԲԱՃ, he (or she) died.

ՕԱՐ, it seems, it seemed, or it might seem (according to the tense or mood of the verb with which it is connected). ՕԱՐ ԼԻՄ, methinks or methought; ԾԱՐ ԼԵԱՇ, it seems or seemed to thee; and so on with the rest of these prepositional pronouns singular and plural: ՕՍ ՈՒՃ ԴԵ, ԾԱՐ ԼԻՄ, մար ա ճարլճ, he ran, methought (or it seemed to me), like the wind.

ՕԼԻՃՇԵԱՐ, it is lawful, it is allowed.

ՕՐ, to know; ԵՆԻՅԻ ԴԵ ԾՐ ա ըար ԴԻԱԾ ա ղ, he came (in order) to know whether they were there.

ԲԵԱԾԱՐ, I know; used only negatively and interrogatively, and in the present tense: ղի ԲԵԱԾԱՐ ղԵ, I do not know; ղի ԲԵԱԾԱՐ ԴԵ, he does not know; ա ղ ԲԵԱԾԱԲԱՐ? do ye know?

Ní fúláir, it is necessary (or “must,” used impersonally); ní fúláir san a beic air ríabál, “it is necessary for me to be (or I must be) walking (away).”

CHAPTER VI.

ADVERBS, PREPOSITIONS, CONJUNCTIONS, INTERJECTIONS.

I. ADVERBS.

1. There are not many simple adverbs in the Irish language. Far the greatest number of the Irish adverbs are compounded of two or more words.

2. An adverb may be formed from an adjective by prefixing the particle *so*, which in this application has the same effect as the English prefix *ly*; as *boirb*, fierce; *so boirb*, fiercely. Almost all Irish adjectives admit of being changed in this manner to adverbs.

3. Besides the adverbs formed in this way, there are many compound adverbs, which are generally made up of a noun and a preposition; the preposition often causing an eclipsis.

4. The following is an alphabetical list of the compound adverbs in most general use, with a few of the simple adverbs. Some of the compound adverbs become, in some situations, prepositions:—

A b-fad far off, in space or time.	Air z-cúl, backwards, back: cúir air z-cúl—the opposite to cúir air bun—to put back, to abolish.
Abur, on this side. (See éall.)	Air leic, apart, separately.
A d-toraic, at first, in the beginning.	Air mhod, in a manner; so that.
A d-tuaic, northwards.	Air ro, for the sake of.
A z-céadóir, immediately.	Air uairib, at times; sometimes.
A z-céir, far off.	Amaic, out of, outside.
A z-comhruic, always.	Ahain, alone, only.
A z rir, there.	Ahainic, to-morrow.
A z ro, here.	Ahuic, outside.
A z rúid, yonder.	Ahuil, like, as.
Air air, back, backward. (See air éirir)	Ah airde, on high.
Air ball, on the spot, instantly.	Ah é, yesterday.
Air bic, at all.	Ah for, from below, upwards.
Air bun, on foundation: cúir air bun, to found, to institute.	Ah éirfeacit, together.
Air ceana, in like manner; in general.	Ah rir, there.
Air coirde, for ever.	Ah ro, here.
Air éirir, with difficulty; perforce:—air air no air éirir, by consent or by force: <i>nolens volens; willy nilly.</i>	Ah rúid, yonder.
	Ah ndear, southward.
	Ahaince, near.
	Ahail, on this side; hither.
	Ah zair, near.
	Ah air, to-day.

Ἀνοίτ, now.	Ἐπί, thrice.
Ἀνοή, to that side; thither.	Ἐπί, for ever (lit. to [the] judgment).
Ἀνταν, when.	Ἐπί, verily; truly; indeed.
Ἀνωα, from above, downwards.	Ἐπί, unto.
Ἀπέι, last night.	Ἐπί, yet; awhile.
Ἀμια, ever.	Ἐπί, altogether.
Ἀμί, again.	Ἐπί, entirely.
Ἀρτεα, in, into.	Ἐπί, enough.
Ἀρτι, in, inside.	Ἐπί, however, moreover, indeed.
beaζ ηα, little but; almost.	Ἐπί, together with.
Ἐπί, cad α, canα, from what? whence?	Ἐπί, likewise; in like manner.
Ἐπί, how many? how much?	Ἐπί, together with.
Ἐπί, cá η-α, cá α, what place?	Ἐπί, until.
Ἐπί, because.	Ἐπί, from that time out.
Ἐπί, always.	Ἐπί, above.
Ἐπί, that is, <i>i. e.</i> ; <i>id est</i> .	Ἐπί, downwards.
Ἐπί, gives an adverbial meaning to some words:	Ἐπί, eastwards.
Ἐπί, immediately.	Ἐπί, upwards.
Ἐπί, at last.	Ἐπί, on the other side; beyond. (See αβγ.)
Ἐπί, twice.	Ἐπί, awhile.
Ἐπί, by turns; respectively.	Ἐπί, besides; moreover.

II. PREPOSITIONS.

1. The following is a list of the simple prepositions:—

α or ι, as a η-βα, in a town.	Ἐπί, towards, along with. It takes τ before the article αη; as αβγ αη δ-ε, to the house.
α, out of, or from (unusual); as a Δουήα, out of Munster.	ι, the same as α.
αζ or αι, at, with.	Ἐπί, after. It takes τ before the article (αη) and becomes Ἐπί.
Ἐπί, αη, upon.	Ἐπί, between.
Ἐπί, in. This takes τ before the article. (See page 21.)	Ἐπί, the same as αη.
Ἐπί, out of.	Ἐπί or Ἐπί, with. It takes τ before the article (αη), and then becomes Ἐπί or Ἐπί.
Ἐπί, to or towards, for the purpose of.	Ἐπί, like, as.
Ἐπί, used in swearing, equivalent to <i>by</i> : αβγ ηο βγδ-ε, "by my word."	Ἐπί, from.
Ἐπί, to.	Ἐπί, over, above.
Ἐπί, the same as Ἐπί.	Ἐπί, ηα, before. It takes τ before the article (αη).
Ἐπί or Ἐπί, under.	
Ἐπί, without.	

Seac, beyond, besides.

Tré, through. It takes r before the article, and then becomes

Car, over, across. It takes r before the article (an), and then becomes car.

tré.
Tríd, the same as tré.
Um or im, about.

2. Some of the simple prepositions are amalgamated with the personal and possessive pronouns.

3. Besides the simple prepositions, there are in Irish a number of compound prepositions. Each of these consists of a simple preposition followed by a noun; and in many of them the initial of the noun is eclipsed by the influence of the simple preposition. In some cases the preposition has dropped out and only the noun remains.

4. The following is a list of the most usual compound prepositions, with their meanings:—

A b-fadhaire, in presence of.

A b-focairi, with, along with.

A d-taobh, in regard to, concerning.

A d-timceall: see timceall.

A z-ceann, at the head of, at the end of, with regard to.

A z-coinne, against, for (in the phrase to go for): ruíd a z-coinne a céile, "they run against each other:" do cuaid re a z-coinne a aca, he went for his father.

A z-coir, by the side of, hard by, along. This is often contracted to coir: coir na bhuíde, "beside the (river) Bride."

A h-aiéle, after: "a h-aiéle na laide rin, "after that lay."

A mearz, amongst: ríor amearz na z-coilltead, "down amongst the woods."

A lacairi, in presence of.

Airi azaid, forward, over against, opposite: dul airi azaid, to go forward, to progress: airi azaid na zaoice, opposite (exposed to) the wind.

Airi béalaib, in front of, opposite: do luídeir do zhaic, a h-íomdaib airi béalaib, a h-acair, "they used to lie, customarily, in beds opposite their father" (Children of Lir).

Airi bun, on foundation.

Airi ceann, for (in the phrase to go for); as a dubairt Naisi le h-Ardan dul airi ceann Fergusair, "Naisi said to Ardan to go for Fergus."

Airi fead, through, throughout, during: airi fead bliadhna, "during a year."

Airi fud, throughout, amongst: airi fud na d-tonn, amongst the waves.

Airi z-cúl, behind.

Airi ron, for the sake of.

A h-diaid, after: a h-diaid a céile, after one another, one after another.

Coir, contracted from a z-coir.

Óála, as to: dála blánaide, "as to Blanaid."

Ó'éir, after: d'éir na Dlíne, "after the Deluge."

Ó'ionnraíḡḡ or d'ionnraíḡe, towards: ḡluair ear mḡine
d'ionnraíḡe a laíḡe, "he goes forward towards his ship."

Óocum, towards.

Óo m'éir, according to.

Óo nuíḡe, unto, until.

Óo d-ḡí, to, unto, as far as: ḡubair ḡo d-ḡí aḡ doruḡ, walk to
the door.

Óomḡúra, as to: íomḡúra Fhíne "as to Finn."

Fá tuairim, towards.

Láir le or láir ne, near, by, beside: ruíḡ láir íom, sit near
me; láir ne Beanna Boirche, "beside Beanna Boirche."

Ór cionn, over, above: ḡuaduiḡ Óia ór cionn ḡac uile níḡ,
"love God above all things": ío éiríḡ or cionn aḡ ḡaoḡ,
"he rose over the spear."

] ḡ-cionn, the same as a ḡ-ceann: í ḡ-cionn na bliadna, "at the
end of the year."

ḡar ceann, besides, for the sake of, beyond, in preference to.

ḡar air, backwards; same as air air.

ḡar éir, after; the same as d'éir: ḡar éir na Samhna, "after
the Samhain (1st of November)"

ḡimḡeall, about, around: teact, ḡimḡeall Óhiamada, "to
go around Dermat"

Ór comair, in presence of, before the face of: ór comair Fhíne,
"in presence of Finn."

III. CONJUNCTIONS.

1. There are few simple conjunctions in the Irish language.

2. There are, however, many compound conjunctions, much like the English conjunctive phrases, "for the reason that," "to the end that," &c.

3. Generally speaking, the meanings of the compound conjunctions may be easily gathered from the signification of the words that compose them; but there are a few whose meanings are not so plain.

4. The following is a list of the simple conjunctions, with their meanings, together with those of the compound conjunctions whose meanings are not quite obvious:—

Acḡ, but, except.

Acḡ ceana, but however.

Aḡur, and; often contracted to

a'ḡ, aḡ, and 'ḡ.

Aḡu aḡ adbaḡ ḡíne, wherefore.

Aḡ, an interrogative particle:

aḡ b-fuḡ íḡ ílan? Is she
well?

Aḡu, the same as the last,
only used with the past
tense.

b'fod, although: it is really the
third singular imperative of
the verb ḡairm.

Cíḡ: see ḡíḡ.

Cóir, as.

Óa, if; sometimes written dá mo.	Wuna, if not, unless; often written mun, and even (corruptly) man.
Óo bñiž, because.	Waiŕead, if so, well then.
Óo cum žo. in order that.	Wap rñ, man ro, in that manner, in this manner: thus.
Fór, yet, moreover.	Ná, than: see ioná,
Žiđ, or Žiđeád, although.	Ná, nor, not.
Žo, that.	Nó, or; often pronounced nú in Munster.
Žup, that: formed of the preceding and no. (See page 58.)	Ó, since, seeing that, because.
Joná iñá: see ná.	Ó čárla, since, whereas.
Jonnuŕ žo, in order that, so that.	Óñ, because.
Wa, if.	Sul, before.
Wa ta žo, although that.	Uñme rñ, therefore, wherefore.
Wap, as; see muna.	

IV. INTERJECTIONS.

1. The following is a list of the most common interjections. Besides these there are many interjectional expressions somewhat like the English, "O shame!" "Alack! and well-a-day!" but it is not necessary to enumerate them:—

á, the sign of the vocative case, usually translated "O."	Wapñž, woe! Oh sad!
ár tñuaž, alas! what a pity!	Wonañme, Oh shame!
Éñt, hush! list!	Wonañ, alas! woe is me!
Fapaon, fapaonñ, alas!	Wó čñuaž: see ar tñuaž.
Fapaonñ žeuñ, alas! O sharp sorrow!	Óc, uc, alas!
Féac, see! behold!	Ócón, or ucón, alas! written ocán or ucán in old writings.
	Ólažón, alas!

CHAPTER VII.

PREFIXES AND AFFIXES.

1. There are in Irish, as in other languages, prefixes and affixes, which modify the meanings of words.

I. PREFIXES.

1. The following is a list of the principal prefixes, with their meanings: it will be observed that many of them have a double form, which arises from conformity to the rule caol le caol, &c.

2. Most of these are inseparable particles; but a few are also employed independently as separate words:—

áñr or eñr, back or again, like English re: as ioc, payment; añrioc, repayment, restitution; eññže, rising; eñreñže resurrection.

Αἰή, or αἰή, a negative particle, like English *un*; as μείδ, open, clear; αἰήμείδ, difficult, rough.

Ἄη, an intensitive particle: as λυαῖζᾶμεαῖ, joyful; ἀηλυαῖζᾶμεαῖ, overjoyed.

Ἄη or αἰη, a negative particle, like English *un*: as τμαῖ, time; ἀητμαῖ, untimely; ἡσαν, desire; αἰηἡσαν, evil desire.

Ἄε, a reiterative, like English *re*: as μαδ, a saying; αῖμαδ, a repetition.

Ἄε has sometimes the meaning of English *dis* in *dismantle*: as κυμα, a form; αῖκυμαδ, to deform, to destroy; μιοζαδ, to crown or elect a king; αἰεμιοζαδ, to dethrone.

Βη, feminine (from βειη, a woman); as εαῖλαῖ, a messenger; βη-εαῖλαῖ, or βαιη-εαῖλαῖ, a female messenger.

Βιῖ, or βιοῖ, lasting, constant: as βεῖ, living; βιῖβεῖ, everlasting.

Κοή, equal; English *co* or *con*: as αἰηρεαι, time; κοη-αἰηρεαι, cotemporary.

Θεαῖ, δεῖ, good: as βλαῖ, taste; δεαῖβλαῖ, good or pleasant taste.

Οῖ, δῖ, a negative, like English *dis*: as κέλλιδε, wise; δῖ-κέλλιδε, foolish; κεαιη, a head; δῖκεαιηαδ, to behead.

Οῖοῖ, δῖοῖ, bad or evil: as οβαῖ, work; δῖοῖ-οβαῖ, an evil work.

Οο and ρο are opposites, as are also often the letters δ and ρ. Οο denotes difficulty, or ill, or the absence of some good or positive quality: as φαῖρεαιαῖ or ροφαῖρεαιαῖ, visible; δοφαῖρεαιαῖ, invisible; δολαῖ, tribulation; ρόλαῖ, comfort; δοηαῖ, ill luck; ροηαῖ, good luck; δο-δέητα, hard to be done; ρο-δέητα, easy to be done; δυβαῖ, sad; ρυβαῖ, merry.

Εα, a negative, often causing eclipse: as δαιηζεαι, strong; εαδαιηζεαι, weak; κόμ, just; εαζκόμ, injustice; έμωμ, heavy; εαδτμωμ, light.

Εαι, a negative: as οηόμ, honor; εαιοηόμ, dishonor; ρλαν, healthful; εαιρλαν, sick; καιμδεαι, friendship; εαιρκαιμδεαι, enmity.

Υο, under: as δυηη, a man; ροδυηη, an *under-man*, a common man, a servant.

Υιῖ, against, back *contra*: as βυλλε, a stroke; ρυῖβυλλε, a back-stroke; βαι, a hook; ρυῖβαι, a *back-hook*, a barb.

Ιλ, ιολ, many: as ιομαδ, much; ιλιομαδ, sundry, various; δαι, a color; ιολδαιαῖ, many colored; φαοβαι, an edge; ιολφαοβαι, many-edged weapons.

Ιη, ιοη, fit: as δέητα, done; ιηδέητα, fit to be done; μαῖδε, said; ιοημαῖδε, fit to be said.

Λαν, full, used as an intensitive: as αἰδῶέιλ, vast; λαναἰδῶέιλ, awfully vast.

Leac̄, half: as uaiμ, an hour; leac̄uaiμ, half an hour. This word is also used to denote one of a pair: thus ῥύιλ, an eye; leac̄-ῥύιλ, (literally *half an eye*), one of two eyes. See "Idiom, No. 13."

Ἐσί, m̄jo, a negative: as meap, respect; m̄j̄meap, disrespect; cóm̄aiμle, advice; m̄jo cóm̄aiμle, evil advice.

Heam̄, heim̄, a negative: as com̄m̄iḡce, comprehensible; heam̄cóim̄m̄iḡce, incomprehensible: m̄j̄d̄, a thing; heim̄m̄j̄d̄, nothing.

Reum̄, before, like English *pre*: as maḡce, said; reum̄m̄aiḡce, aforesaid.

Ḥo, an intensitive particle: as m̄d̄m̄, great; ḡd̄-m̄d̄m̄, very great.

Saμ, an intensitive particle: as maḡc̄, good; ῥáμ-m̄iaḡc̄, very good.

Ξo, roḡ, the opposite to do, denotes apt, easy, good: as deap̄b̄-ḡa, proved; roḡdeap̄b̄ḡa, easily proved.

Uμ or uμ, an intensitive particle: as ḡreal, lo; úm̄ḡreal, very low humble, mean, vile.

II. AFFIXES OR TERMINATIONS.*

1. The following is a list of the principal affixes or terminations, with their meanings; but it does not include inflectional terminations, which are all given in connection with declensions and conjugations:—

Ḷc̄, when it is the termination of an adjective, means full of, abounding in, like the English *y* and *ous*, with the former of which it seems cognate; as dm̄aiḡcean̄, the black-thorn; dm̄aiḡcean̄ac̄, abounding in black-thorn; b̄m̄iaḡcam̄, a word; b̄m̄iaḡcam̄ac̄, wordy, talkative.

Ḷc̄, as the termination of a noun, generally denotes a personal agent: as cúm̄iaḡc̄d̄, power; cúm̄iaḡc̄d̄ac̄, a mighty person; Com̄m̄iaḡcam̄ac̄, a native of Connaught.

Ḷc̄t̄, an abstract termination, like the English *ness* and *ty* (in *probability*): as cam̄ḡam̄ac̄, charitable; cam̄ḡam̄ac̄t̄, charity; m̄d̄m̄ and m̄d̄m̄da, great; m̄m̄daḡc̄t̄, greatness.

Ḷḡe, uḡe, or ḡe, a personal termination, denoting a doer; as cor, a foot; com̄ḡe, a walker; ḡom̄ān̄, drive; ḡom̄ān̄aiḡe, a driver.

Ḷm̄e, or m̄e, a personal termination, denoting an agent or doer; as lom̄ḡ, a track; lom̄ḡaiμe, a tracker; cealḡ, guile; cealḡaiμe, a deceiver.

Ḷm̄aiμ, has the same meaning as the English *like* and *ly*: as flaiḡc̄, a prince; flaiḡcean̄m̄aiμ, princely.

* For a full account of these terminations see the author's "Origin and History of Irish Names of Places." Second series, Chaps. I. and II.

Ἀη, a diminutive termination, but it has now nearly lost its diminutive sense; as *loc*, a lake; *loc'āη*, a small lake.

Ἀρ or εαρ, and sometimes the letter ρ alone, a termination denoting abstract quality, like *αῖς*, as *αοιβιηη*, delightful; *αοιβ-ηεαρ*, delightfulness or delight; *εεηη*, a head; *εεηηεαρ*, headship, authority.

βηαρ and βηε, have a collective or cumulative sense; as *δυλλε*, a leat; *δυλλεεβαρ*, foliage; *δαρη*, an oak; *δαρηβηε*, a place of oaks.

Chαρ has a collective sense like the last; as *βεηηη*, a peak or gable; *βεηηεεαρ*, abounding in peaks or gables.

Οε, an ancient adjectival termination, has much the same meaning as the English *ful* and *ly* (in manly). In the modern language it is varied to the forms *δα*, *δα*, and *τα*; as *μῶρη*, great; *μῶρηδα*, majestic; *ρεαρ*, a man; *ρεαρδα*, manly; *ηῖλε*, a champion; *ηῖλεεδα*, champion-like, knightly.

Ε denotes abstract quality, like *αῖς*; as *εῖηη*, fair or white; *εῖηηε*, fairness; *βοῖ*, soft; *βυῖε*, softness.

Ἥη a diminutive termination. This may be said to be the only diminutive that still retains its full force in the living language; and it is much used in Ireland even where Irish is not spoken. *βῶεαρ*, a road; *βῶεαρηῖη*, (*bohreen*), a little road; *crusk*, a pitcher; *cruiskeen*, a little pitcher.

Λε, ηε, ρε, τε, τρε, have all the same meaning as *αῖς*, namely, full of, abounding in: as *βυρη*, break; *βυρηεε*, a breach, a complete defeat; *μυε*, a pig; *μυεε*, a piggery; *λυεαρ*, rushes; *λυεεαρ*, a rushy place; *βοῖ*, a bog or soft place; *βοῖεε*, a place full of bogs; *κολλη*, a wood; *κολληεε*, a woody place. These seem to be cognate with the terminations in the English words *poull-ry*, *variety*, &c.

Ἐαρ means abounding in, like the English *ful* and *ly*; as *βυρηῖ*, power; *βυρηῖεαρ*, powerful.

ὄε, a diminutive termination; as *εῖαρ*, black; *εῖαρὄε*, a black little animal (a clock, or chafer); *εῖαρ*, a fork; *εῖαρὄε*, a little fork.

ὄρη, or *δῶρη*, or *εῖρη*, denotes an agent or doer, the same as the English *er* in *reaper*; as *βυρη*, strike; *βυρηεε*, a thresher; *κορηεε*, a candle; *κορηεε*, a candlestick; *ρεεε*, a scythe; *ρεεεε*, a mower.

Ἦε has a collective signification, like *βαρ*, as *βευ*, the mouth; *βευε*, language, speech.

εεε is used as a sort of feminine termination; as *εεε*, an Englishman; *εεεεε*, an Englishwoman; *εεεεε*, a female fool (from an old root *εε*, whence the old word *εεηεε*, a fool, the equivalent of the modern *εεεεε*).

τεε and τεεε: see *λεε*.

PART III.

SYNTAX.

CHAPTER I.

NOUNS.

1. When two nouns come together, signifying different things, the second one is in the genitive case; as $\zeta\upsilon\tau\acute{\epsilon}\ \zeta\epsilon\delta\alpha\iota\mu$, the voice of a hound; $\text{í b-}\text{fla}\text{í}\text{c}\text{í}\text{o}\text{r}\ \text{E}\text{í}\text{r}\text{ne}\text{a}\text{n}\text{n}$, "in the sovereignty of Erin;" $\text{b}\text{á}\text{í}\text{r}\text{í}\ \text{n}\text{a}\ \text{h-}\text{i}\text{n}\text{í}\text{r}\text{e}$, the top of the island.

2. When the genitive noun is singular masculine, its initial is aspirated if the article is used; as $\text{m}\text{a}\text{c}\ \text{a}\text{n}\ \text{f}\text{í}\text{r}\text{í}\text{r}$, the son of the man. (See pages 21 and 22 for this rule and its exceptions.)

3. When the article is not used with the governed noun in the singular number, the initial of the latter is generally not aspirated (except in the case mentioned in next Rule); as $\text{C}\text{o}\text{n}\text{a}\text{l}\ \text{í}\ \text{z-}\text{c}\text{r}\text{o}\text{c}\text{á}\text{í}\text{b}\ \text{b}\text{á}\text{í}\text{r}$, "Conall in the forms of death;" $\text{a}\ \text{n-}\text{d}\text{o}\text{l}\text{á}\text{r}\ \text{b}\text{í}\text{o}\text{í}\text{d}\text{e}\ \text{a}'\text{r}\ \text{f}\acute{\epsilon}\text{i}\text{n}\text{e}$, "in the sorrow of bondage and of pain."

4. When the noun in the genitive is a proper name, its initial is generally aspirated, even though the article is not used; as $\text{r}\text{í}\text{j}\text{o}\text{c}\acute{\tau}\ \text{z}\text{h}\text{a}\text{o}\text{í}\text{d}\text{í}\text{l}$, "the race of Gaodhal; $\text{c}\text{l}\text{o}\text{í}\text{d}\text{e}\text{a}\text{n}\ \text{w}\text{h}\text{a}\text{n}\text{a}\text{n}\text{n}\text{a}\text{i}\text{n}$, "the sword of Manannan."

Exception:—In this case, δ and τ often resist aspiration; as $\text{E}\text{í}\text{r}\text{ne}$, $\text{i}\text{n}\text{z}\text{e}\text{a}\text{n}\ \text{D}\text{e}\text{a}\text{l}\text{b}\text{h}\text{a}\text{o}\text{í}\acute{\tau}$, "Eire, the daughter of Dealbhaoth."

5. If the governed noun be in the genitive plural, its initial is eclipsed with the article; and the initial is generally aspirated, if the article is not used; as $\text{D}\text{a}\text{i}\text{n}\text{z}\text{e}\text{n}\ \text{m}\text{a}\text{c}\ \text{n-}\text{U}\text{i}\text{r}\text{n}\text{e}\text{a}\acute{\tau}$, "the fortress of [the] sons of Usna;" $\text{b}\text{u}\text{i}\text{d}\text{e}\text{a}\text{n}\ \text{c}\text{u}\text{í}\text{a}\acute{\delta}$, "a company of knights;" $\text{d}\text{i}\text{a}\text{r}\ \text{b}\text{a}\text{n}$, "two women" (or rather "a pair of women.")

Even in the absence of the article, however, an eclipsis sometimes occurs; as, $\text{n}\text{a}\text{o}\text{í}\ \text{n}\text{a}\text{o}\text{n}\text{b}\text{a}\text{í}\text{r}\ \text{d}\text{o}\ \text{b}\acute{\text{í}}\ \text{a}\text{z}\ \text{t}\text{e}\text{a}\acute{\text{c}}\ \text{d}'\text{i}\text{a}\text{í}\text{r}\text{í}\text{a}\text{í}\text{d}\ \text{c}\acute{\text{í}}\text{o}\text{r}\text{a}\ \text{a}\text{z}\text{u}\text{r}\ \text{c}\acute{\text{a}}\text{n}\text{a}\ \text{b-}\text{f}\text{e}\text{a}\text{í}\text{r}\ \text{n-}\text{E}\text{í}\text{r}\text{í}\text{u}\text{i}\text{o}\text{n}\text{n}$, "nine times nine persons who were coming to demand the taxes and tributes of the men of Erin."

Sometimes also, in the absence of the article, the noun in the genitive plural is neither aspirated nor eclipsed.

* Several of the rules of Syntax have been unavoidably anticipated in Orthography and Etymology, as they are in every Irish Grammar. These rules will be referred to in their proper places in this Syntax, or repeated when thought necessary.

6. When two nouns come together signifying the same thing (or in apposition), they generally agree in case; as, *Nuada Áir-
ziodlam mac Eac̄taíḡ mic Eadarlamh*. “Nuadha Silver-hand,
son of Eachtach, son of Eadarlamh;” *ḡa d-*τ*ρί β-*Φ*ιννεαῖḡa,
mac Eoc̄aíḡ*, “of the three Finnawns, sons of Eochad.”

Here, in the first example, *Nuada*, is nominative, and so is *mac*, which is in apposition to it; *Eac̄taíḡ*, is genitive and so is the next word, *mic*, which is in apposition to it. In the second example, *Φιννεαῖḡa* is in the genitive (plural), and *mac* also, in apposition to it, is in the genitive (plural).

For exceptions to this Rule, see “Idioms,” No. 33, page 107. See also next rule.

7. The last rule is not always observed: departures from it are sometimes found, even in good Irish writings; as *ḡairḡe buíḡe órḡa ḡair bḡead ar ḡhḡairḡe, bean Sheaḡaḡa aḡ íḡea-
dóra*, “yellow gold rings as used-to-be on Mary, wife of John (the son of) the weaver;” *ḡairḡe mic Chḡairḡuḡe Luac̄ra d’*ḡ*or
a corḡdalḡa, eadon, Cḡaḡ mac Óilḡolla*, “the King of Kerry-
Luachra came to visit his foster-son, that is, Cian, the son of Oiliú;” *do ḡḡall (Órcan) a ḡ-corḡne ḡheairḡaíḡ ḡḡre, aḡ
ḡréan, leorḡaḡ*, “Oscar went to meet the furious Meargach, *the strong lion.*”

The first example exhibits a disagreement in case between *ḡhḡairḡe*, and *bean*, which are in apposition, the former being dative (after *ar*), the latter nominative (its dative would be *ḡḡaol*, page 50). In the second example *corḡdalḡa* is genitive (after the infinitive, Rule 15, page 90), and *Cḡaḡ*, in apposition to it, is nominative (its genitive would be *Céḡn*). In the last example *ḡheairḡaíḡ* is genitive, and *leorḡaḡ*, in apposition to it, is nominative. This last example, however, seems properly to belong to a class of exceptions to Rule 7, which are explained further on. (“Idioms,” No. 33, page 107.)

8. A noun used adjectively in English is commonly expressed in Irish by a genitive case; as, English, “a gold ring,” Irish, *ḡairḡe órḡ*, a ring of gold. This form of expression is very common in Irish; as *ḡear ḡlḡe*, a lawyer; literally “a man of law.”

9. Collective nouns are singular in form, and as such they take the singular form of the article (when the article is used); but they are plural in signification, and as such they generally take adjectives and pronouns in the plural number, and also verbs in the plural, when, in accordance with Par. 9, page 45, the plural form of the verb is used; as, *ḡócḡuḡ aḡ ḡuirḡeaḡḡ rḡn*, “that company disclose;” *ḡaḡadair aḡ buíḡean cḡraḡ rḡn do
laḡairḡ Fḡḡnḡ, aḡur do beairḡaíḡ rḡad dó*, “*that comp my of knights came* to the presence of Finn, and *they* saluted him.”

The personal nouns from *dḡar* to *deḡḡeaḡair*, mentioned at

page 37, follow this rule; as, *do b'adap an diap rin zo h-ymhear-nac*, "that pair were at strife."

10. Nouns denoting a part commonly take *de* with the dative of the nouns (or pronouns) of which they form a part; as, *zadap d'ap n'zadapayb*, "a hound of our hounds;" *aoi'cao' b'ob*, "one berry of them;" *zac dujhe de'n' pobul*, "each person of the people."

11. The personal nouns, from *diap* to *deic'neabap* inclusive, and also *teora*, three, generally govern nouns in the genitive plural; as, *diap ban*, "two (of) women;" *a' ep'ur mac azur a d-ep'ur ban*, "his three sons and their three wives;" *teora ban*, "three women; *naonban caoireac*, "nine chieftains."

But they sometimes take *de* with the dative, as in the last rule; as *naoi'naonban do'naonayb na b-Fo'moria'ac*, "nine times nine of the stewards of the Fomorians;" *mo' d'ir mac, mo' d'ir d'feapayb*, "my two sons, my two men."

CHAPTER II.

THE ARTICLE AND NOUN.

1. The article agrees with its noun in number, gender, and case; as, *an'feap*, the man; *na'cipce*, of the hen; *na'ba*, the cows.

2. For the influence of the article on the noun, see page 22.

3. When one noun governs another in the genitive case, the article can be used only with the latter. Thus, in English we can say "the age of the world" (using the definite article with each noun); but in Irish, the corresponding expression is, *aoir' an' domhain*, not, "an' aoir' an' domhain."

Exception:—When a demonstrative pronoun follows the governing noun, or when the two nouns come together as a compound word, the governing noun may take the article; as, *an' t-oid' m'urte*, the teacher; *ma' do' beir' tu' an' oir'ead' rin' du'ir' ran' lo' ro' na' n-deor*, "if thou givest so much to us in this day of tears." Here the article is used before both *lo'* and *deor*. *Tan' zadap' ar'ir' i' n'-Eip'ur' an' r'io'ct' ro' Shimeon' bhric*, "these descendants of Simon Brec came again into Erin:" here the article is used before *r'io'ct'*, the governing noun.

4. When a possessive pronoun is used with the genitive noun, the article cannot be used with either; thus, "the house of my father" is *teac' m'ac'ap*, not "an' teac' m'ac'ap."

The peculiarity noticed in the last two rules exists also in English when the possessive case is used, *i.e.*, the article can be used only with the possessive noun; as, the world's age; my father's house.

5. When a demonstrative pronoun is used with a noun, the article is also used; as, *an fear rí*, that man; literally, "the man that;" *na mhná úd*, yonder women; literally, "the women yonder."

6. The article is used before the names of some countries and cities, where the definite article would not be used in English; as *Moenan*, *Abb Caṡnac Fursa rí* *Frainc*, *déu*, "Moenan, Abbot of Caher Fursa, in (the) France, died;" *Cruaca na h-Eireann*, "the stacks of (the) Erin;" *tuairceart na h-Asia*, "the north of (the) Asia." There is in Irish also a form of phrase corresponding to the English "the mighty Hector;" as, *an t-Oscar*, "the noble Oscar."

7. When an adjective is predicated of a noun by the verb *is* (in any of its forms), the article is used with the noun (but in the corresponding expression in English the definite article would not be used); as, *is maic an fear é*, he is a good man: literally "he is the good man."

8. The Irish article is used before abstract nouns much more commonly than the English definite article; as, *an t-ocur*, "the hunger;" *trí nṡ do cṡ*:—*an peacad*, *an bair*, *a' r an pían*, "three things I see—*the sin*, *the death*, and *the pain*."

CHAPTER III.

THE ADJECTIVE AND NOUN.

1. Adjectives denoting fullness or a part of anything may take either the dative after *de* or the genitive; as (dative after *de*):—*idur dá bharla lan do lean*, "between two barrels full of ale;" *tá mé lan do náire*, "I am full of shame;" *móran d'úairib*, "many of nobles;" (genitive):—*lan a duir*, "the full of his fist;" *an naib móran airgid aise*, "had he much of money?" *craob dhaoisín azur a lan áirhead uirre*, "a branch of blackthorn and its full of sloes on it."

2. The adjective in the comparative degree takes *na* (or *na*, or *iona*,) before the noun which follows it; as, *is bhinne a ceól ná lon rí na ríol*, "sweeter is her voice (music) than the blackbird and than the thrush."

Exception:—If the adjective in the comparative degree has *de* ("of it") after it, then *na* is not used; as, *na c bu fearuide dóib é*, "that they would be none the better of it."

AGREEMENT AND COLLOCATION OF THE ADJECTIVE AND NOUN.

FIRST CASE—When the adjective is joined immediately with the noun:

When the adjective is joined immediately with the noun as a

qualifying or limiting term (as in the English "a high tower,") in this case the following **ten** rules apply:—

1. The natural position of the adjective is after its noun; as, *cablaç mór*, "a great fleet."

The chief exceptions to this are stated in the next two rules.

2. Monosyllabic adjectives are often placed before their nouns; as, *caol-féar*, "slender man; *mór féar-rize*, "great sea;" *dub-carra-is*, "black rock."

3. This is especially the case with the following adjectives, some of which are hardly ever used after their nouns: *deá*, good; *duo*, evil; *féo*, true; *nua*, new; *rea*, old; *tua*, left-handed.

Numeral adjectives form another exception, for which see next chapter.

4. When a name consists of two words, the adjective comes between them; as, *Sliab adbal-mor luaçra*, "the tremendous-large Slieve Lougher;" *Eamhuir nín áluir u Maça*, "the smooth beautiful Eman Macha."

5. When the adjective follows its noun, it agrees with it in gender, number, and case; as, *féa maç*, a good man; *rzéu na mha móire*, "the story of the large woman" (gen. sing. fem.); *an an aíobeír ionçaínçaíç*, "on the wonderful abyss" (dat. sing. fem.).

6. When the adjective follows its noun, the initial of the adjective is aspirated under the circumstances already stated in Par. 6, page 16; or eclipsed in the circumstance stated in Par. 3, page 34.

7. When two or more nouns are joined together, and are followed by an adjective which qualifies or limits them, all and each, the adjective agrees with the last: in other words, it is the last noun only that influences the adjective, both in grammatical inflection, and in initial change; as, *bean açur féar maç*, a good woman and man; *féar açur bean maç*, a good man and woman.

8. When the adjective precedes the noun, as in Rule 2 and 3, above, it does not agree with the noun, *i.e.*, it is not influenced by the noun, either as to inflection, or as to initial change; in other words, the simple form of the adjective is used, whatever be the number, gender, or case of the noun; as, *móir uaírle*, "great nobles;" *do moir uaírlib*, "to [the] great nobles;" *ban choic Eínean*, "the fair hills of Erin;" *luaç barca*, "swift barks;" *féo rzeu*, "a true story;" *féo rzeuta*, "true stories."

9. When the adjective precedes the noun, the adjective and the noun are sometimes regarded as one compound word; and the initial of the noun is aspirated (in accordance with Par. 4, page 16); also the vowel of the adjective is often modified by the

rule caol le caol, &c.; as, *Deirdre an Ouib-íleíbe* "Deirdre of Dubh-Shliabh;" *óíḡ-bean*, "a young woman."

10. When the adjective precedes the noun, the initial of the adjective is subject to the same changes as if the adjective and the noun formed one word, *i.e.*, one noun; as *ḡáííe na η-óíḡ-íearí*, "the laughter of the young men;" *an t-áíḡ-ollam ííí*, "that chief professor;" *an t-íean-bean boct*, "the poor old woman."

SECOND CASE.—When the adjective is connected with the noun by a verb:

When the adjective, instead of being joined immediately with the noun, is predicated of, or ascribed to, the noun by a verb of any kind (as in the English, "the man is tall," "he considered the man tall," "he made the knife sharp," "the roads were made straight"), in this case the following **three** rules apply:—

1. When an adjective is predicated of a noun by the verb *tá*, it follows the noun, the order being:—verb, noun, adjective; as *tá an lá breáḡ*, "the day is fine."

2. When an adjective is predicated of a noun by the verb *ír*, it precedes the noun, the order being:—verb, adjective, noun; as *ír breáḡ an lá é*, "it is a fine day."

3. When an adjective is ascribed to a noun by a verb of any kind, the adjective does not agree with the noun, *i.e.*, the adjective is not influenced by it, either initially or inflectionally; in other words, the simple form of the adjective, without inflection, is used, whatever be the number or gender of the noun; and the initial of the adjective is neither aspirated nor eclipsed (unless under the influence of some other word); as, *ír aḡbííí do cúaíí acat do cialapuíí acat do ííáḡa ííííííííí caeííáííe*, "delightful are thy harbors and thy bays, and thy flowery lovely plains;" *aḡur cíííííe íéíííeáḡ an íí íí-ḡáííḡáḡ ḡeapí*, "and rams' skins dyed red."—(Exodus, xxv. 5).

The first example (from the story of the Children of Usna), exhibits both an agreement according to Rule 5, page 83, and a disagreement according to the present rule. For the three nouns are plural, and the two last adjectives which qualify them directly are in the plural form, while the first adjective, *aḡbííí* (modern *aíííííí*), which is asserted of them by *ír*, is in its simple form (the plural would be *aḡbííííe*, or *aḡbííe*). In the second example *cíííííe* is plural, while *ḡeapí* is singular (plural *ḡeapíá*).

Observe the difference in meaning in the following, according to agreement or disagreement:—*Oo íííííe íé íí ííííí ííííí*; *do íííííe íé íí ííííí ííííí*: in the first the adjective agrees with the noun, (both being plural), showing that it qualifies it directly (Rule 5, page 83), and that the meaning is, "he made the green mantles;" in the second there is no agreement, (the adject-

tive being singular and the noun plural), showing that the adjective is connected with the noun by the verb (Rule 3, page 84), and that the meaning is "he made the mantles green."

CHAPTER IV.

NUMERAL ADJECTIVES.

1. A numeral adjective, whether cardinal or ordinal, when it consists of one word, goes before its noun; as, τριῖ ῥιη, three men; ῥαη δαηα η-αη, "in the second place."

2. Numeral adjectives, both cardinal and ordinal, from 11 to 19 inclusive, take their nouns between the simple numeral and δέαη; as, τριῖ ḡαηηη δέαη, thirteen horses; αη ηηεαη ḡαηηη δέαη, the thirteenth horse.

3. Άοη, one; δά, two; ḡέαδ, first; and ηηεαη, third, cause aspiration; as, αοη ῥεαη, one man; δά ηηαοη, two women; αη ηηεαη ῥεαḡ, "the third occasion."

4. The numerals ῥεαḡ, οḡ, ηαοη, and δεηḡ, cause eclipsis (except the noun begins with η, in which case there is no change); as, ῥεαḡ η-ηηαδηα, "seven years;" οḡ η-ηα, "eight cows;" ηαοη η-αηḡηε, "nine rivers;" δεηḡ η-ῥηη, "ten men."

5. The numerals τριῖ, ḡεηḡηε, ḡύηη, ῥέ, the ordinals (except ḡέαδ and ηηεαη: Rule 3 above), and the multiples of ten, cause no initial change; as, ḡεηḡηε ηαδαηη, "four hounds."

6. Άοη, one, and all the multiples of ten, take their nouns in the singular number; as, αοη ηά, one day; ḡέαδ ḡεαηη, a hundred heads (lit. "a hundred head"); τριῖ ḡαοηαδ ηαοḡ, "three times fifty heroes;" ηῖηε ηεαη, "a thousand women."

7. Δά, two, takes both the article and the noun in the singular number; and if the noun be feminine, it will be in the dative form; as, δά ῥεαη, two men; αη δά ηαηη, the two hands. (See next two rules).

8. If the noun following δά be in the genitive, it will be in the genitive plural; as, ηαη α δά ηαηη, "the full of his two hands."

9. Although δά takes the article and noun in the singular, yet the adjectives and pronouns referring to the noun will be in the plural, and the noun may also take the plural verb; as, δο ηηαηηηεαδαν αη δά ḡηεηηηηηηηεαδ ῥηη, "these two strong heroes went;" ηο ηαδ α δά ῥηεαη ḡηόῥαηηηηηηε ḡηαηηηηεαηηηα αη ηα η-ῥοḡηαηαδ α η-ῥηη ηαḡηαḡ ηεηηε, "he took his two wide-sock-ted, thick-handled spears, *they* having been bathed in the blood of serpents." Here the two adjectives and the pronoun referring to ῥηεαη, are plural.

CHAPTER V.

THE PRONOUN.

I. PERSONAL PRONOUNS.

1. Personal pronouns agree with the nouns they represent, in gender, number, and person; as *íṛ maíṛ aṇ beaṇ í*, she is a good woman; *íṛ maíṛ aṇ feaṛ é*, he is a good man; *íṛ mḡṛ na daoíṇe íad*, they are great men.

2. A personal pronoun, or a possessive pronoun, which stands for a sentence or part of a sentence, is third person singular masculine; as *dá m-béíḡíṛ fíṛ 'Eíṛbeaṇṇ aṇ baṛ ḡ-aḡaíḡ, ḡaḡ bu feíṛṇde dḡíḡ é*, "if the men of Erin were against you, they would not be the better of *it*;" (here the pronoun *é* stands for the sentence).

3. The accusative forms of the personal pronouns are often used as nominatives: always with *íṛ*, (see Rule 18, page 90), and with passive verbs (see Rule 20, page 91); and sometimes with other verbs; as, *máṛ maíṛ ḡa leaḡa íḡḡ, aṛ éíṛíṇ*, "if ye are the good physicians," says *he*."

II. POSSESSIVE PRONOUNS.

1. A possessive pronoun is never used without a noun.

In English there are distinct forms of the possessive pronouns which can stand without nouns (mine, thine, hers, &c.), but there are no forms corresponding to these in Irish.

2. The possessive pronouns precede their nouns; as *mḡ mḡaḡaíṛ*, my mother; *a ḡ-caíṛbaḡ*, their chariot.

3. The possessives *mḡ*, my; *ḡo*, thy; and *a*, his, aspirate the initials of their nouns; as *mḡ ceaṇṇ*, my head; *ḡo cor*, thy foot; *a mḡeaṛ*, his finger.

4. The possessive *a*, her, requires the initial of its noun in its primitive state (neither aspirated nor eclipsed), and if the initial be a vowel, it prefixes *h*; as *a mḡaḡaíṛ*, her mother; *a h-aḡaíṛ*, her father.

5. The possessives *aṛ*, our; *baṛ*, your; and *a*, their, eclipse the initial consonants of their nouns (except *r*, on which they exert no influence), and prefix *ḡ* to vowels; as *aṛ d-tíṛ*, our country; *baṛ m-ba*, your cows; *a ḡ-aḡaíṛ*, their father.

6. Possessive pronouns amalgamated with prepositions (see page 42,) have the same influence over the initials of their nouns, as they have in their uncompounded state; as *ḡomḡ cṛmḡíḡe*, to my heart; *ḡḡa d-tíṛ*, from their country.

7. The manner of using the emphatic increase after the possessive pronouns has been already pointed out in Par. 3, page 42. For an additional Rule of possessives, see Rule 2, above.

III. RELATIVE PRONOUNS.

1. The relative follows its antecedent and precedes its verb; as, *an tó a rubalpar*, the person who shall walk.

2. The relative aspirates the initial of its verb; as, *an laoc a mharb an t-acac*, "the hero who slew the giant." To this the next rule is an exception.

3. When the relative *a* signifies "all that," (see Par. 2, page 43), it eclipses the initial of its verb; as, *a b-fuil ó Shailib buð deap*, "all that is from Galway southwards;" *do néin a n-dubramar*, "according to *what* we have said."

4. When the relative *a* is governed by a preposition, expressed or understood, and is followed immediately by a verb to which it is not the nominative, the initial of the verb (except *r*) is eclipsed; as, *a ré níd mhorna dá d-táinig a bap* "the following is the circumstance, indeed, *from which came* his death;" *an boit na n-tóir*, "the tent in which they used to eat;" *a dubairt Fionn go n-diongnad (rít) zid bé nó r a n-diongnad Oiarmaid í*, "Finn said that he would make (peace) in whatever manner Diarmaid would make it" (here the preposition *an* is understood: *zid bé nó r, ó r "an" a n-diongnad Oiarmaid í*, whatever the manner *in which* Diarmaid would make it. (See next rule.)

5. If, in the case stated in the last rule, the verb is in the past tense, with the particle *no* or *do*, the initial of the verb is not eclipsed, but aspirated (see Pars. 1 and 4, pages 50 and 51): as, *áit an tuit Oara Dearg*, "the place in which fell Dara Dearg."

6. The relative precedes the verb which governs it in the accusative (as in English); as, *an tís a zmaduizim*, the country which I love.

7. As the relative has no inflection for case, the construction must determine whether the relative is the nominative to the verb which follows it, or is governed by it in the accusative; as, *an cara a zmaduizid mé*, the friend whom I love; *an cara a zmaduizeap mé*, the friend who loves me.

8. The relative is often omitted both in the nominative and in the accusative; as, *ólaoð do mhuintir nín mic Péil. táinig uaid do bpat na 'Eirionn*, "a youth of the people of Nin Mac Peil (wl:o) came from him to view Erin." *An leabap no rénicb (Cambrenfir) do tuaparzbap 'Eirionn*, "the book (which) Cambrensis wrote on the history of Erin."

9. The relative *a* is often disguised by combination with other words and particles, especially with *no*, the mark of the past tense; as, *an tís ón táinig me*, "the country from which I came" (here *ón=ó a no*); *plaz léin mharbad nóf míle dfoí*, "a plague, by which were killed nine thou-and of them" (here *léin=le a no*); *an tís dá d-táinig ré*, the country to which he came (*dá=do a*); *la dap comórnað aona le miz 'Eirnean*,

"a day on which was convoked an assembly by the king of Erin" (δαρ=δο α ηο); ηί βεαζ λιοηρα αη ιλοηηεαρ φέηη μαη ειηιϷ, "I do not think it little what I have named as an *eric*." λη=α ηο, in which α means "all that," (see Par. 3, page 43).

IV. DEMONSTRATIVE PRONOUNS.

1. The demonstrative pronouns follow their nouns or pronouns; as, αη φεαη ιηη, "that man;" Ϸηα η-έ ιηη? "who is that?"

Exception—When the verb ιη in any of its forms is understood; as, Ϸúd βαη ζ-Ϸηδ, "yonder (is) your meal;" ιο αη λα, "this is the day."

2. If the noun be followed by one or more adjectives, the demonstrative pronoun comes last; as, Ϸηα αη φεαη βαλλαέ βηηη-βηηαέηιαέ úδ? "Who is that fre. kled, sweet-worded man?"

V. INTERROGATIVE AND INDEFINITE PRONOUNS.

1. A interrogative pronoun comes first in the sentence; as, Ϸά β-φαιλ ηο λεαβαη? "where is my book?" Ϸηα αη λαοέ úδ αη ζηαλαηηηη ζηοηιι? "who is that hero at the shoulder of Goll?"

This rule holds good even when the interrogative is governed by a preposition, *i.e.*, the preposition follows the interrogative that it governs; as, Ϸαδ αη τú? "out of what (place art) thou?" ζο δε ηαη τά τú? "how do you do?" (literally "like to what art thou?") Ϸηεud φά αη ειηζεαβαη? "what for did ye rise?"

2. When υηε precedes its noun, it means "every;" when it follows the noun it means "all;" as, ιλαν όη υηε ζαλαη, "sound from every sickness;" δο βαταδ αη Ϸηε δαοηα ζο η-αοη οϷταη, "all the human race was drowned, all to (except) a single eight."

There are occasional exceptions; as, δηοηζ αηηβφιοραέ ιη ηα η-υηε ιηυάιιϷβ, "people ignorant in *all* virtues" (in this passage, from Keating, υηε means "all," though it precedes its noun).

CHAPTER VI.

THE VERB.

1. As a general rule the verb precedes its nominative; as, δο ζηυαη φεηζαη, "Fergus went;" δο Ϸλαοηδεαδ υλαϷ ζαηηαιδ, "Mac Garraidh was defeated." (See next Rule).

2. When the nominative is a relative or an interrogative pronoun, it precedes the verb; and sometimes also in poetry, the nominative, even though a noun, precedes the verb; as, αη τε α ιηυάιιϷβ, "the person who will walk;" Ϸηεud ατά αηηρο? "what is here?" ΟεδμαηδϷε ιφοηα, ζαη ιζιϷ ζαη ιοη ηηαηαιδ,

But in many such constructions the preposition expresses purpose, and the signification is active; as, *azur go m-bíð ollamh ne dénamh feille ari a céile*, "and that they are ready to do treachery on each other."

12. The infinitive, even without the preposition *le*, has often a passive signification; as, *Fiaçra, mac Ailene, tizearna Wuíðorin, do mharbad*, "Fiachra, son of Ailene, lord of Mourne, to be slain" (lit. "Fiachra, &c., to slay"): *azur an fearu nac tlobnad (an éfor) rin uaid, a ímón do buain óna ceann de*, "and the man who would not pay that tribute from him, his nose to be cut off from his head."

13. One verb governs another that follows it or depends upon it in the infinitive mood; as *da m-bad nac maçfad clanna Wuorine d'iarriaid na ç-caon rin*, "if it were so that the Clann Morna had not come to seek those berries."

The following very important rule was first enunciated by O'Donovan, and is given here in his own words ("Irish Grammar," page 387):

14. "When the governed verb is one expressing motion or gesture, which does not govern the accusative, the sign *do* is never prefixed; as, *duabairt ré lioin dul go Corcaig*, 'he told me to go to Cork.'"

15. If the noun which is the object of a transitive verb in the infinitive mood follows the verb, it is in the genitive case; as, *tançadair cablaç mór do déanamh coçuid*, "a great fleet came to make war" (nom. *coçad*. war: gen. *coçuid*); *do m'lead éloinne çir*, "to kill the children of Lir."

16. A noun or pronoun, which is the object of a transitive verb in the infinitive mood, often precedes the verb, and in this case it is (not in the genitive, as in the last rule, but) in the accusative; as, *azur iread do çhoð, da cuaille do çur id-calmian azur ceann an t-rnaithe do ceanzal da çac cuaille ðioð, azur uball do çur ari m'nullac cuaille aca*, "and it is what he used to do, two poles to put in the earth, and the end of a thread to tie to each pole of them, and an apple to put on the top of a pole of them."

17. The active participle of a transitive verb governs the noun which is the object of the action, in the genitive case; as, *az bnuicnead an óir*, "smelting the gold" (lit. "smelting of the gold"); *do bí an çaðal ro az m'ñad çcol*, "this Gaodhal was teaching schools" (lit. "teaching of schools"); *az toçairt na çalmian*, "digging the ground."

18. The verb *ir* in any of its forms, expressed or understood, takes the accusative form of a personal pronoun as its nominative; as, *ir í céadfad ðioinne ne reançur*, "it is the opinion of some historians;" *ir m'ic ruiç go f'irinneac iad*, "they are truly

sons of a king;" *a* *z*ur *f*ia *f*ia *z*ear *a*n *m*iz *c*ia *h*-*i*ad *f*éin,
 "and the king asks who *they* (are)."

19. The verb *r* is very often omitted, especially in negative and interrogative sentences, and in answer to questions; as, *b*eac*a* *a*n *r*ta *r*ia *d*e *f*ia *r*ne, "truth (is) the food of the historian;" *c*eann *O*h*a*r*m*uda *U*i *O*h*u*b*h*ne *a*n *c*eann *ú*d, "that head (is) the head of Diarmaid O'Duibhne;" *c*ia *t*ura? *m*ir*i* *J*olla*n*, "who (art) thou? I (am) Iollan;" *a*n *f*io*r* *r*ne? "whether (is) that true?" *n*í *m*ir*i*, "(it is) not I."

20. A verb in the passive voice takes the accusative form of a personal pronoun as its nominative; as, *d*éan*t*ar *é*, "it is done;" *b*ua*l*tear *i*ad, "they are struck."

CHAPTER VII.

PREPOSITIONS.

1. A simple preposition governs the dative (including the ablative, for which there is no distinct inflection); as, *t*áin*e* *r*é *z*o *C*onca*z*, "he came *to* Cork," *a*z *c*oir *a*n *t*-*r*léibe, "*a* the foot of the mountain;" *a*ir*n*id *c*uid *d*o *n*a *h*-*ú*z*d*ar*a*b, "some of the authors reckon." (See next rule for exception).

2. The preposition *i*dir generally governs the accusative in the singular, and the dative in the plural; as, *i*dir *C*orca*c* *a*z*ur* *L*im*n*ea*c*, "between Cork and Limerick;" *i*dir *n*a *c*ó*z*ea*d*a*b*, "between the provinces."

3. The prepositions *a*n*n*, *z*o, *i*ar, *i*ia, *l*e or *m*e, and *t*ar, take *r* before *a*n, the article, the *r* being sometimes joined with the preposition and sometimes with the article; as, *a*n*r* *a*n *l*ea*b*ar, or *a*n*r* *r*a*n* *l*ea*b*ar, "in the book;" *l*e*r*r *a*n *b*-*f*ear, "with the man." (See Par. 7, page 21).

4. The compound prepositions govern their nouns in the genitive; as, *d*o *m*uz *a*n *t*o*n*na *m*ir *a* *n*-*a*z*a*id *a*n *c*huic, "he brought the tun with him *against* the hill;" *a* *b*-*f*ia*d*huire *b*-*f*ear *n*-*E*ir*i*o*n*, "*in* presence of the men of Erin;" *d*o *z*luar-eada*r* *c*lann *T*uireann *m*o*n*pa *d*'io*n*ruide *a*n *c*áca, "the children of Tuireann went forwards *towards* the battle."

The following prepositions, *c*um, towards; *d*ála, as to; *d*éir, after; *i*om*c*ura, as to; *m*earz or *a*mearz, amongst; *m*éir, according to; and *t*im*c*oll, about, although having the form of simple prepositions, are in reality compound, and take their nouns in the genitive. (See end of Par 3, page 73).

As a compound preposition consists of a noun governed by a simple preposition, it is in reality the noun-part of the compound preposition that governs the noun in the genitive, in accord-

ance with Rule 1, page 79: thus, the expression above, a η-αῆαιδ̄ αν̄ ḡηυιϗ, is literally “in the face of the hill,” where ḡηυιϗ is governed in the genitive by αῆαιδ̄, face; and so of the others.

5. The simple prepositions, except δο, δε, ζαν, and ιδιη, generally cause eclipsis in singular nouns when the article is used; as, ὀη̄ ζ-εηοϗ ρη̄, “from that hill;” αῆ̄ αν̄ η-βαηε̄ ηᾱ η-ηηε̄, ῑῑαῑ, “at the town of the island, in the west.” (See page 22).

6. The simple prepositions generally cause aspiration when the article is not expressed; as, αη̄η̄ βαηη̄ αν̄ ḡηοηηη, “on the top of the tree;” ὀ η̄η̄η̄η̄η̄ ηᾱ ῒεηηηαϗ, “from the ramparts of Tara.”

Exception 1: α or η, ηαι, and ζο (when it means “with”) cause eclipsis without the article; as, α η-βαηε-αῖα-ϗη̄αϗ, “in Baile-atha-eliath (Dublin);” ηαῑ η-Οίηηη, “after the Deluge.”

Exception 2: αῆ, ηε, and sometimes ζο cause no change in the initial, and ζαν may either aspirate or not; as, ρη̄αν̄ ηε̄ ῒαῑη̄, “farewell to (the river) Maigue;” “ὀ η̄ τ-Σηοηηηη ρη̄οη̄ ζο ρη̄ηηηε, “from the Shannon east to the sea.”

7. When a simple preposition ending in a vowel comes before the possessive α (whether it signifies *his*, *her*, or *their*), the letter η is inserted between the vowels; as, τε̄ηε̄ η-ᾱ βᾱηαῑβ, “through his hands;” αν̄ η̄ᾱ ζο η-ᾱ η̄αν̄ τ-ρη̄ηηε̄, “the day with its abundant light.”

Except after δο and δε; as, τᾱβαηη̄ ρ̄ε̄ηη̄ δ'ᾱ ḡαηᾱη, “give grass to his horse;” βᾱηη̄ ζε̄η̄ δ'ᾱ ζ-εη̄ηη̄, “take a branch from their tree.”

Before any other word beginning with a vowel, the letter η is usually inserted after these prepositions; as, δο̄ ḡαη̄δ̄ ρ̄ε̄ ζο η̄ ḡηβᾱηη, “he went to Alban (Scotland).”

PART IV.

I D I O M S.

AN idiom, in the sense in which it is used here, may be defined:— An expression that has acquired by usage a certain meaning, which becomes lost in a word-for-word translation into another language; so that in order to convey the true meaning in that other language, the form of expression must be changed.

Thus, “*ṭá an leabhar aḡ an duine*” is an idiom, for its sense is lost in the word-for-word translation, “the book is at the man;” and, in order to convey the true meaning, the English expression must be changed to “the man *has* the book.”

Idioms constitute one of the chief difficulties in learning any language; and the student is recommended to master this Part, in which the principal idioms of the Irish language are explained and illustrated.

I. The Infinitive governing Possessive Pronouns.

The infinitive of a transitive verb governs its object in the genitive (Syntax, Rule 15, page 90). When the object, instead of being a noun, is a personal pronoun, then, according to the analogy of the Rule quoted, it should be in the genitive case. But the genitive of a personal pronoun is a possessive pronoun; and possessive pronouns precede the words they refer to; so that the pronoun which represents the object of the action, is a possessive, and precedes the infinitive, influencing its initial as if it were a noun (see Syntax, page 86, Rules 3, 4, 5). This gives rise to idiomatic expressions like the following, which are of very frequent occurrence:—

	English.	Irish.	Contracted to.
To strike	me,	do mo bualadh,	dom' bualadh.
	thee,	do do bualadh,	dod' bualadh.
	him,	do a bualadh,	dá bualadh.
	her,	do a bualadh,	dá bualadh.
	us,	do ár m-bualadh,	dár m-bualadh.
	you,	do buir m-bualadh,	(not contracted).
	them,	do a m-bualadh,	dá m-bualadh.

These may be translated literally, “to my striking” “to their striking,” &c.

A like construction prevails in the case of a transitive participle: *aḡ a bualadh*, “striking him;” *aḡ a bualadh*, “striking her;” *aḡ ár m-bualadh*, “striking us,” &c. In this construction the par-

tiple may itself be governed in the genitive case by a noun:—*ḡáinje mjan a marbca dain féin*, “a desire to kill them, has come to me” (lit. “a desire of the killing of them,” or “of their killing.”)

2. Compound Prepositions governing Possessive Pronouns.

A compound preposition governs the genitive (Rule 4, page 91); and when the governed word is not a noun but a personal pronoun, this last becomes a possessive, and goes before the noun-part of the compound preposition, giving rise to idiomatic phrases, corresponding with those quoted in last Idiom. Example: *air fon*, for the sake of; *air a fon*, for his sake; *air bui fon*, for your sake, &c. *Do cuaid Oiarmaid da h-éir*, “Diarmaid went after her;” *ḡáinje tinnear orra féin, azur ar a rlioct h-a n-diaid*, “sickness came upon themselves, and on their posterity after them.”

A similar construction often occurs with the compound adverbs. Example: *tar air*, “backwards;” *do cuaid ré tar a air*, “he went backwards;” *do cuaid rí tar a h-air*, “she went backwards;” *do cuaid ríad tar a n-air*, “they went backwards;” &c.

3. To die.

“To die,” is very often expressed in Irish by a phrase meaning “to find death:” the verb *faid*, find, being used for this purpose, in its various forms; as, *an dara bliadain da éir rin fuair Juiá báir*, “the second year after that Irial found death;” *azur máir an aca a n-dan dain báir d'faidail*, “and if it be here that it is in fate for me death to find” (i.e., “that it is fated for me to die.”)

There is, however, a single verb *d'euz*, meaning to die, but it is not used so often as the above. The following example exhibits both forms:—*A deir cuid do na reanuḡdamaib zuir ab a n-ḡleann da loca fuair Naon Padruig báir; b'iod zo n-abraid d'ruḡ oile zuirab an n-áidmaca d'euz ré*, “some of the old authors say that it is in Glendalough St. Patrick found death, although another party say that it is in Armagh he died.”

4. Nominative Absolute.

What is called the nominative absolute in English is expressed in Irish by the preposition *air* (on), or *iar* (after), placed before the participle, and the preposition *do* (to) before the noun; which will be understood from the following examples:—*ar m-beid aca fada do Chormac az a b-feidhom*, “Cormac having been a long time watching them” (lit. “on being a long time to Cormac a-watching of them”); *azur air m-beid ollain don luign*, “and the ship being ready” (lit. “and on being ready to the ship”); *azur air n-dul a luign dób*, “and they having gone

into a ship:" (lit. "and on going into a ship to them"): $\iota\alpha\pi$ η -bejč $\tau\mu\acute{\epsilon}\alpha\eta$ $\eta\tau$ $\alpha\eta$ $\tau\acute{\iota}\eta$ $\delta\acute{o}\iota\beta$, "they having grown strong in the country" (lit. "after being strong in the country to them.")

5. To have no help for a thing.

The Irish phrase corresponding to this is "to have no strength ($\eta\epsilon\alpha\iota\tau$) on a thing:" the *having* being expressed in accordance with Idiom 34. $\text{Ní b-}\tau\mu\iota\lambda$ $\eta\epsilon\alpha\iota\tau$ $\alpha\zeta\alpha\eta$ $\alpha\eta\tau$ $\alpha\eta$ $\eta\delta$ $\tau\eta$, "I have no help for that thing—I cannot help that" (lit. "there is to me no strength on that thing"). $\text{A}\zeta\upsilon\tau$ $\delta\upsilon\beta\alpha\eta\tau$ $\zeta\mu\acute{\alpha}\eta\eta\epsilon$ $\eta\acute{\alpha}\check{\epsilon}$ $\mu\alpha\iota\beta$ $\eta\epsilon\alpha\iota\tau$ $\alpha\eta\check{\epsilon}$ $\acute{\rho}\acute{\epsilon}\eta$ $\alpha\eta\mu$, "and Grainne said that she had no help for it" (or "could not help it," "could not have prevented it"). Sometimes $\lambda\acute{\epsilon}\eta\zeta\epsilon\alpha\tau$, remedy or cure, is used in the same way as $\eta\epsilon\alpha\iota\tau$.

6. To cause a thing to be done.

To cause a thing to be done, to have it done, to see that it is done, is often expressed in Irish by $\delta\acute{o}$ $\acute{\epsilon}\mu\iota$ (or $\delta\acute{o}$ $\acute{\epsilon}\alpha\beta\alpha\eta\tau$) $\acute{\rho}\acute{\alpha}$ $\delta\epsilon\alpha\eta\alpha$, "to put (or bring, or give,) under notice." $\text{A}\zeta\upsilon\tau$ $\mu\acute{o}$ $\acute{\epsilon}\mu\iota$ $\mathcal{U}\mu\acute{o}\delta\acute{\alpha}\check{\epsilon}$ $\acute{\rho}\acute{\alpha}$ η - $\delta\epsilon\alpha\eta\alpha$ $\acute{\upsilon}\eta\tau$ $\text{I}\eta\epsilon$ $\mathcal{T}\mu\iota\epsilon$ $\delta\acute{o}$ $\acute{\epsilon}\mu\iota$ $\acute{\rho}\acute{\upsilon}\iota\beta$, "and Miodbach caused the mould (or soil) of Inis Tuile to be placed under you;" $\delta\acute{o}$ $\mu\upsilon\zeta$ ($\mu\acute{\iota}\zeta$) $\beta\eta\epsilon\alpha\check{\epsilon}$ $\beta\alpha\eta\tau$ $\alpha\eta\tau$ $\alpha\eta$ η - $\beta\eta\epsilon\eta\check{\epsilon}\alpha\eta$, $\alpha\zeta\upsilon\tau$ $\acute{\epsilon}\mu\zeta$ $\acute{\rho}\acute{\alpha}$ $\delta\epsilon\alpha\eta\alpha$ $\acute{\alpha}$ $\acute{\epsilon}\mu\acute{o}\acute{\alpha}\delta$, "(the king), passed sentence of death on the judge, and had him hanged" ("put under notice him to hang," or "his hanging").

7. Number of Individuals of which a company is composed.

The number of individuals of which any collection of persons or things is made up, is often inserted, in the nominative form, in a narrative sentence, without any syntactical connection with the rest of the sentence. $\text{A}\zeta\upsilon\tau$ $\tau\alpha\eta\eta\check{\epsilon}$ $\zeta\eta\mu$ $\mu\acute{o}\eta\eta\epsilon$ $\alpha\eta\eta\alpha\mu\acute{\alpha}\rho\acute{\alpha}\check{\epsilon}$, $\acute{\epsilon}\alpha\mathcal{O}\zeta\alpha\tau$ $\acute{\epsilon}\alpha\eta\mu\acute{\rho}\acute{\epsilon}\alpha\check{\epsilon}$, \acute{o} $\mathcal{S}\eta\eta\acute{o}\tau$ $\beta\upsilon\eta\delta\acute{\beta}$ $\mathcal{D}\epsilon\eta\mu\zeta$, "and Lir set out on the morrow, fifty chariot-men, from Shee Bove Berg" (*i.e.*, with chariots); $\alpha\zeta\upsilon\tau$ $\tau\alpha\eta\eta\check{\epsilon}$ $\mathcal{U}\delta\delta\acute{\beta}$ $\mathcal{D}\epsilon\alpha\eta\zeta$, $\eta\alpha\acute{o}\iota$ $\acute{\epsilon}\acute{\epsilon}\alpha\delta$ $\acute{\rho}\eta\check{\epsilon}\acute{\epsilon}\alpha\delta$, $\delta\alpha$ η - $\eta\acute{o}\eta\eta\mu\upsilon\zeta\epsilon$; "and Bove Derg came, twenty-nine hundred men, towards them."

This is like the English:—"The Duke began his march next morning, 20,000 strong."

8. Passive Verbs used impersonally.

A passive verb is often used impersonally; as, $\zeta\alpha\beta\acute{\rho}\alpha$ $\acute{\epsilon}\mu\zeta\alpha\eta\eta$ $\alpha\mu\acute{\alpha}\check{\epsilon}$, $\alpha\zeta\upsilon\tau$ $\eta\acute{\iota}$ $\lambda\alpha\eta\acute{\rho}\alpha\eta$ $\acute{\rho}\mu\iota\mu\zeta\acute{\alpha}\delta$ $\acute{o}\mu\tau$, "come forth to us, and no one will dare to wound thee:" (literally, "and *it will not be dared* [to put] wounding on thee").

This form of expression is of very frequent occurrence in the older narrative writings:—Thus, instead of "they advance; they plunge into the (river) Crond," the writer expresses himself in this way:—"it is advanced; it is plunged into the Crond."

9. Nominatives before Infinitives and Participles.

Instead of the usual assertive construction, consisting of a verb with its nominative (noun or pronoun), the following construction is often adopted:—the verb is put in the infinitive or participial form, and the subject (whether noun or personal pronoun) is placed before it, the pronoun being placed in the accusative form (but whether the noun is nominative or accusative cannot be determined, as there is no distinction of form); as, *ir aithlaid bí Naisi agus Déirdre, agus an cenncaimh eatarra, agus iad as imhuict uirthi*, “it is in this manner Naisi and Deirdre were (seated), and the Cenncaimh (a chess board) between them, *and they playing on it;*” *ir aithlaid do bí Cobhác, agus é as fearu-zaó*, “it is thus Cobhach was, *and he pining away;*” *cuimioir rceula go blaithuid é féin do beir an h rih*, “he sends word to Bland, *he himself to be there*” (i.e., “that he himself was there”).

This form of expression is often adopted, even when the verb or participle is (not expressed but) understood; as, *do cuim (an cú) a ceann a h-uict Oghairmuda agus é ina còdla* “(the hound) put her head in the breast of Diarmaid, *and he in his sleep.*”

10. One person meeting another.

“Donall met Fergus” is often expressed in Irish in the following way:—*Do caraó Fergus ar Donall*; literally, “Fergus was met (or turned) on Donall.” *Do caraó Doibell na Craglea léite oruinn*, “we met Eevel of Craglea” (lit. “Eevel of Craglea was met [or turned] on us”): *cia carfaide oru aó rtauid-bean*, “whom should I meet but the fair woman” (“who should be met on me”).

The same idea is expressed by the verb *tarla*, happened: *agus tarla oíac orua ar h-bozác*, “and they met a youth on the moor” (lit. “and a youth happened on [or to] them”); *tiualluid go Slieb Uir go tarla banba go h-a druidib orua an*, “they travel to Slieve Mish, until they met Bauba with her druids there” (“until Bauba with her druids happened on [or to] them there”).

11. Although: Although not.

Siógh go, or *siógh zuir*, has two opposite meanings which can only be distinguished by the general sense of the passage; sometimes “although” (or “although that”), and sometimes “although not.”

Although:—*a Fhinn, ar órzan. siógh zuir foizre mo záol duire ná do Oghairmuid ó’Ohuibne*, “‘O Finn,’ says Oscar, ‘although my relationship with thee is nearer than to Diarmaid O’Duibhne.’”

Although not:—*do béim comhaille maic óib, a Chlainn Uirghí, siógh go h-déantar lib í*, “I shall give a good counsel to

you, O sons of Usna, though it will not be done by you;" $\zeta\iota\omicron\eta$ $\zeta\upsilon\mu\ \acute{\epsilon}\alpha\mu\iota\delta\ \eta\eta\acute{\alpha}\ \alpha\eta\ \eta\acute{\iota}\delta\ \rho\eta\eta$, "although that proceeding would not be the business of a woman."

12. To be able.

To be able to do a thing is expressed in different ways. The most usual is by phrases of the type, $\eta\ \acute{\rho}\acute{\epsilon}\iota\delta\iota\mu\ \text{le}$, "it is possible with;" as, $\eta\ \acute{\rho}\acute{\epsilon}\iota\delta\iota\mu\ \lambda\iota\omicron\eta\ \alpha\ \delta\acute{\epsilon}\alpha\eta\alpha\delta$, "I can do it" (lit. "it is possible with me to do it"). See Idiom 1.

Another, and more idiomatic way, is by the verb $\tau\iota\zeta\iota\mu$, "I come," in its various moods and tenses; and with this verb "I can do," or "I am able to do," is expressed by "it comes with me to do;" as, $\eta\mu\eta\alpha\ \delta\text{-}\tau\iota\zeta\epsilon\alpha\delta\ \mu\eta\ \alpha\eta\ \acute{\epsilon}\alpha\iota\lambda\lambda\epsilon\alpha\acute{\epsilon}\ \delta'\alpha\mu\alpha\tau$, "unless he would be able to strike the hag" (lit. "unless it would come with him the hag to strike"); $\acute{\alpha}\epsilon\tau\ \eta\iota\sigma\tau\ \delta\omicron\iota\lambda\zeta\epsilon\ \mu\eta\eta\eta\ \eta\eta\acute{\alpha}\ \rho\eta\eta\ \mu\alpha\mu\ \alpha\tau\acute{\alpha}\iota\delta\ \acute{\alpha}\mu\ \delta\text{-}\tau\iota\zeta\ \acute{\rho}\acute{\epsilon}\iota\eta\eta\eta\delta\epsilon\ \epsilon\epsilon\alpha\eta\zeta\alpha\iota\tau\epsilon\ \eta\eta\acute{\alpha}\mu\ \beta\text{-}\rho\iota\alpha\delta\text{-}\eta\mu\iota\tau\epsilon$, $\alpha\zeta\upsilon\tau\ \eta\alpha\acute{\epsilon}\ \delta\text{-}\tau\iota\zeta\ \mu\eta\eta\eta\ \rho\zeta\alpha\omicron\iota\lambda\epsilon\alpha\delta\ \delta\acute{\iota}\phi\omicron\beta$, "and we think more grievous than that, how our three champions are bound in our presence, and that we are not able to free them;" $\eta\acute{\iota}\ \acute{\epsilon}\upsilon\mu\mu\text{-}\epsilon\alpha\eta\eta\ \upsilon\alpha\lambda\acute{\alpha}\ \omicron\mu\mu\alpha\iota\eta\eta\ \eta\alpha\acute{\epsilon}\ \delta\text{-}\tau\iota\zeta\ \lambda\iota\eta\eta\ \alpha\ \eta\omicron\mu\acute{\epsilon}\alpha\tau$, "he puts not a burden on us that we are not able to bear."

Sometimes the verb $\tau\acute{\alpha}$ or $\eta\ \rho$ is used instead of $\tau\iota\zeta$, and also the preposition $\alpha\zeta$ instead of le ; as, $\delta\ \eta\alpha\acute{\epsilon}\ \lambda\iota\omicron\eta\ \delta\upsilon\lambda\ \delta\eta\ \zeta\text{-}\text{con}\tau\alpha\text{-}\beta\alpha\iota\mu\tau\ \rho\omicron$, "since I cannot escape from this danger" ("since it is not with me to go from this danger": here $\eta\ \rho$ is understood); $\delta\ \eta\alpha\acute{\epsilon}\ \beta\text{-}\rho\upsilon\lambda\ \delta\upsilon\lambda\ \upsilon\alpha\iota\delta\ \alpha\zeta\upsilon\mu$, "since I cannot escape from him" ("since it is not with me to go from him"): here $\tau\acute{\alpha}$ and $\alpha\zeta$ are used, as in "possession:" Idiom 34.

13. One of a pair.

One of a pair is often expressed by the word $\lambda\epsilon\alpha\acute{\epsilon}$, half; $\lambda\epsilon\alpha\acute{\epsilon}\text{-}\acute{\epsilon}\omicron\tau$, "one foot" (lit. "half-foot"). In this compound the word $\lambda\epsilon\alpha\acute{\epsilon}$ is used adjectively, so that $\lambda\epsilon\alpha\acute{\epsilon}\text{-}\acute{\epsilon}\omicron\tau$ means, not half of a foot, but a *half-foot* (i.e., a foot which is itself a half, i.e., half of a pair). So also $\lambda\epsilon\alpha\acute{\epsilon}\text{-}\acute{\rho}\acute{\iota}\upsilon\lambda$, "one eye;" $\lambda\epsilon\alpha\acute{\epsilon}\text{-}\tau\alpha\omicron\beta$, "one side," &c. $\eta\ \rho\ \alpha\eta\eta\lambda\alpha\iota\delta\ \delta\omicron\ \beta\iota\ \alpha\eta\ \mu\eta\zeta\ \rho\eta\eta\ \alpha\zeta\upsilon\tau\ \lambda\epsilon\alpha\acute{\epsilon}\text{-}\lambda\alpha\eta\ \alpha\mu\eta\zeta\iota\delta\ \alpha\mu\mu$, "it is thus that king was, and one hand of silver on him."

14. To be alone.

The word $\alpha\omicron\eta\alpha\tau$, which the dictionaries now interpret as meaning "alone," was originally a concrete numeral noun like $\tau\mu\acute{\iota}\upsilon\mu$, $\epsilon\acute{\upsilon}\iota\zeta\epsilon\alpha\tau$, &c. (page 37), and meant "one person;" and this meaning it retains to some extent in its present application:-- $\delta\omicron\ \acute{\rho}\iota\upsilon\beta\alpha\lambda\ \eta\acute{\epsilon}\ \alpha'\eta\ \alpha\omicron\eta\alpha\tau$, "I walked alone" (lit. "I walked in my one person" [see Idiom 42]: or "I walked as one person"); $\delta\omicron\ \acute{\rho}\iota\upsilon\beta\alpha\lambda\ \tau\acute{\upsilon}\ \alpha\delta'\ \alpha\omicron\eta\alpha\tau$, "thou walkedst alone;" $\delta\omicron\ \acute{\rho}\iota\upsilon\beta\alpha\lambda\ \rho\acute{\iota}\ \eta\text{-}\alpha$

h-aonair, "she walked alone," &c.; an aonair feal a rribal b'idear, "alone, of a time, walking I was."

Another way of saying in Irish "he is alone" is "he is with himself:" *ca m'e l'om féin, "I am alone ("I am with myself"); ca tú leat féin, "thou art alone;" ca r'iad leo féin, "they are alone;" ca mo mháthair 'h-a codlad, a'zur m'ire l'om féin, "my mother is asleep, and I am alone."

15. One thing given for another.

When you give or take, sell or buy, one thing for another, it is expressed in Irish by saying you give it &c., *on* that other, the preposition a'iu being used. Oo éuz ré tuí ba a'iu an z-capall r'iu, "he gave three cows for that horse;" a'iu 'Eime n'í 'heó-r'air'ia c'ia h-í, "for Erin I would not tell who she is" ('heó-r'air'ia for i'nyeó-r'air'ia, see page 54).

In this sense, the preposition a'iu is set before the noun of price; do ce'annu'izear an b'ó ban r'iu a'iu ré p'úirt, "I bought that white cow for six pounds;" n'í h-íon'zha, an Cormac, ó'iu i'f m'air' e' luac tu'zar u'iu'e, "'No wonder,' says Cormac, 'for good is the price I gave for it.'"

16. Debt.

The fact that Donall owes Fergus money, or that Donall is under any obligation to pay money to Fergus, is expressed by saying, "Fergus has money on Donall," the preposition a'iu being used before the name of the debtor, and the act of "having" being expressed by ca and az as in Idiom 34. Ca tuí p'úirt az F'ezur a'iu Oo'ih'all, "Donall owes three pounds to Fergus;" ca bean e'ile a n'eo'air'le a b'fuil a'ic' cor'ó'ia a'iu, "there is another woman in Youghal to whom he owes a crown" ("to whom is a crown on him"); i'f am'lad do b'í an n'í'z ro. azur e'for cá'ia m'ó'iu t'rom az F'om'oir'az an Tu'ata Dé O'anan'ne n-a l'ia, "it is how this king was, and (that) the Fomoirians had a great heavy tribute and rule over the Tuatha De Dananns during his time" ("a great heavy tribute and rule was with the Fomoirians on the Tuatha De Dananns").

17. Asking, entreating, &c.

To ask, request, entreat, or demand of a person, is expressed by "to ask, &c., *on* that person:" i'air'iu a'iu O'ia n'a z'ra'ra r'iu, "ask of God those graces."

18. Sensation, suffering, &c.

That a person is hungry, thirsty, cold, afraid, sick, &c., is expressed in Irish by saying that hunger, thirst, cold, fear, sickness, &c. is *on* him, the preposition a'iu being used: ca fu'act o'iu ('cold is on me'), "I am cold;" n'a b'fod eazla o'iu ("let not fear be on thee"), "be not afraid;" do b'í ca'it m'ó'iu a'iu Sheaz'an

(“great thirst was on John”), “John was very thirsty;” *cad é ríḡ oirt?* (“what is that on thee?”) “what ails you?” *Ḃ cúirle ḡo cúirle, cneud í an ḡuuaim ríḡ oirt?* “O pulse of my heart, what is that frown on thee?”

19. One person entertaining feelings (of love, hatred, &c.) towards another.

That Donall entertains certain feelings towards Fergus is expressed by saying that Donall *has* such feelings *on* Fergus; the preposition *air* being used before “Fergus,” and the act of “having” being expressed by *tá* and *aḡ*, as in Idiom 34:—*ní ḡó an cion no bá aḡ Aongḡur oirta ina an cion no bá aḡ ḡuḡḡ-tir Aongḡura air ḡac an neactaire, ḡo ḡairḡ forḡad ḡóru an t'actair fá ḡ-a cionḡ ríḡ*, “not greater was the affection Aonghus felt for thee than the affection the people of Aonghus felt for the son of the steward, so that thy father felt great jealousy on that account” (lit. “not greater was the affection which was with Aonghus on thee, . . . so that great jealousy was on thy father on the head of that:” see Idiom 32).

Where the agent is not specified, a similar form of expression is retained: you are loved, is expressed by love is on you; you are esteemed, by estimation is on you, &c.; *tá ḡear aḡur cion ḡóru air Órcan* (“great esteem and love are on Oscar”), “Oscar is greatly *esteemed and loved*.”

20. To know: to know a person.

To know is usually expressed in Irish by the phrase knowledge is with me, I have knowledge; and to know a person by “to have or to give knowledge on a person:” “*aḡur an b'fuir a fáor aḡad féir, a Fhíḡḡ?* ‘ní b'fuir’ air Fíḡḡḡ:” “‘do you know it, O Finn?’ ‘I do not,’ says Finn;” (lit. “is its knowledge with you, O Finn?” “It is not,” says Finn): *an a' leat fáor d'fáḡair?* “do you wish to know?” (“is it a desire with you knowledge to get?”; *bíod a fáor aḡat, a leuḡḡóru*, “know, O reader” (“be it knowledge with thee, O reader”): (strangers are seen coming towards Finn and his party). *no fáirḡair Fíḡḡ do c'ac an d-tuḡadar a'cne oirta*, “Finn asked of the others did they know them” (lit. “did they put knowledge on them”); *aḡur tuḡairre a'cne oim*, “and thou knewest me” (lit. “and thou didst put knowledge on me”).

21. To part from: to separate from.

To separate from a person is expressed in Irish by “to separate *with* a person,” the preposition *le* or *ne* being used: much in the same manner as we say in English, “I parted with him:” *rcairḡair féir aḡur Óairḡairḡ ne ḡ-a c'le*, “they themselves and Diarmaid separated from each other;” *do rcaim fé*

μηνη, "he separated from us;" ἴσαμ ὄσαμ le Διάρμαιδ, "Oscar separated from Diarmaid;" do ἴσαμ μίρ, "he separated from him;" ἀξ Κυρραῖ Ἐλλ-δαρια do ἴσαμαρ le ζῆαδ μο ἔροιδε, "at the Curragh of Kildare I parted from the 'love of my heart.'"

22. However great, however good, however brave, &c.

Οα placed before some abstract nouns gives a meaning which, though it is well understood in practical use, has puzzled grammarians to analyse and explain, and which will be best understood by a few examples. From the adjective ἀλαση, fine or beautiful, is formed ἀσηε or ἀλλη, fineness, beauty; and δα ἀσηε or δα ἀλλη, means "however fine," "how fine soever." Examples:— Νί β-φυλ πιονύρ δά ημευδ, ηαῖ δ-τυλλιδ, "there is no punishment however great that they do not deserve;" ἀη τηεαρ ζειρ, ζαη κοηραξ αοιηφιρ δά ἐπιέριτ αιρ ταληαιη δ'οβαδ, "the third injunction, not to refuse single combat to any man on earth, however mighty;" δεαιηη ηα διαθα δά ἐπιέριε λαη, "demon or devil, however mighty of laud."

23. Both one and another: both these and those.

Both, in such phrases as "both men and women," is often expressed in Irish by the preposition ἰδιμ, between; as, βαηηφιδ Οια ἱάραη διοβ ἀηη ζαῖ ἱοῖαμ δ'α δ τυζ δόιβ ἰδιμ ἔειλλ, ceadhadaib, aζur conaῖ ἱαοζατα, "God will exact an account from them in every advantage He has given to them, *between* understanding, senses, and worldly prosperity:" ἔυιζ ηηλε ἰδιμ ἱεαμαιβ ἀζur ηηαιβ, "five thousand, between men and women (*i.e.*, both men and women, or reckoning men and women)."

24. To overtake.

To overtake a person is often expressed by "to bear on a person," the verb beηr, bear, being used with the preposition αιρ. Examples:— Φαζβαν ἀη τυλαῖ ἱο αι εαζια ζο η-beaηφαδ ζονζυρ ἀη θηροζα οηρμνη, "let us leave this hill, for fear that Aonghus of the Brugh would overtake us;" leaηυρ αιρ α λοηζ ζο μεηηδῆρεαῖ ἱαδ δοη Βηύηαιη, ζο ηυζ οηηα ἀζ Solcoid, "he follows them on their track directly to Munster, so that he overtook them at Solchoid:" ζο ηαῖ ἱύιζηιδῆρ ἀη ἱοηη ἱηη ηό ζο η-beηηead Βαηρεηα Σηδε οηηα, "that they might not leave that territory till the fairy cavalcade should overtake them:" ἱαηφαδῆα leaτ αι ἀη λαῖαιρ ἱο ηο ζο η-beηηηη οηηη ἀηῆρ, "I will wait for thee at this place till thou overtake me again:" ζαῖ αοη αιρ α η-beaηφαηηηη, "every one whom I would overtake" ("every one on whom I would bear").

25. To win a game on a person.

To win a game on a person is expressed by "to put a game on him:" *aʒur do tóʒ Óirín aḡ fear rín, aʒur no cúir aḡ cluicté ar Fhíonḡ,* "and Oisín moved that (chess-) man and won a game on Finn:" *aʒur nḡ nuʒamaḡ ar báire ar a céile,* "and we did not win the goal on each other" (*i.e.*, "neither of us won the goal on the other.")

26. To think long, short, well of, ill of: to think hot, cold, hateful, &c.

Such phrases as "it seemed long to him," "he thought it long," are expressed by the verb *ir* and the preposition *le*: *ir faða lóm,* ("it is long with me"), "it seems long to me," "I think it long." *aʒur do bo faða le ḡa bráictiub do bḡ bḡiaḡ uacá,* "and his brothers thought it long that Brian was a way from them" ("it was long with his brothers," &c.): *ir olc lín ar bean ríot,* "we think bad of what has happened to thee" ("it is evil with us:" *ar*=*a no*, and *a* means "all that:" see page 43): *tuiʒimḡ ḡac ionḡuḡ leatḡa me féin,* "I understand that thou dost not love me" ("that not beloved with thee am I myself").

Observe the difference in meaning conveyed by the two prepositions *le* and *do*: *ir ḡaict é do'n b-fear rín,* "it is advantageous to that man (whether he thinks it so or not): *ir ḡaict é leir aḡ b-fear rín,* "that man thinks it advantageous" (whether it is really so or not). The following example shows both forms:—*ba ḡaict lóm ríubal, acḡ ḡoḡ ḡaict ḡam é,* "I wished to walk, but it was not good for me."

27. To wish for: to like: to be glad of: to prefer.

After the same manner, a desire, wish, liking for, &c., is expressed by such words as *ḡiaḡ*, desire; *aḡc*, pleasure; *áil*, will or pleasure &c.: *ir áil lóm ríor ḡ'faʒáil,* "I wish to know" ("it is a desire with me knowledge to get"): *do cúirfein féin ríul aḡ cáic rín ad h-ucḡ a ḡ-ionad do ríul, ar fear díoḡ: do b'aḡc lóm rín, ar aḡ dóirreoir,* "'I would put the eye of that cat in thy lap in place of thy eye,' says a man of them. 'I would like that,' says the door-keeper."

The word *feáru*, better, is used in the same way to express preference: *ir fearu lóm do ḡearbḡacáru ná cḡra,* "I prefer thy brother to thyself:" "I would rather have thy brother than thyself" (lit. "thy brother is better with me," &c.); *do b'feáru le bḡiʒid leabaru ḡaict ná aḡuʒead,* "Brigid would prefer a good book to money" (lit. "a good book would be better with Brigid," &c.). The following example shows the application of both *ḡiaḡ* and *feáru*:—*Ní h-é ir ḡiaḡ leir aḡ uʒḡar (nḡ mo, nḡ h-é ir ḡiaḡ lóm-ra) tḡ do bḡeuzan; . . . acḡ ir é doḡ' feáru leir rín (aʒur lóm-ra) do cḡoide do feal*

buʒað: "it is not what the author wishes (neither is it my wish) to amuse thee (zu do breuʒan) . . . but it is what he would prefer (and I also,) to possess thy heart."

Féarri followed by le expresses mental preference as shown above: but féarri followed by do is equivalent to the English expression "better for," "better that," &c. Jr féarri domra ahoir, ar luʒ, fíor na heanca úd do éabairt éaoib. Jr féarri éana, ar iadrán, "'it is *better for me now,*' says Lugh, 'a knowledge of that *eric* (fine) to give you.' 'It is better indeed,' say they."

28. To think little of—much of—to grudge.

Similar to the preceding is the use of the words beʒ and móri (little and much) in several idiomatic phrases, which occur very frequently, and which will be best understood by the following examples:—Jr móri lioim an luac ríi, "I think that price large" ("that price is large with me"): óiri dá m-beiç mac aʒuime iona fíuðe rompa, híori beʒ leo do éúiri dári marbad, "for if (even) a child of us would be sitting ('in his sitting:' see Idiom 42) before them, they would not deem it (too) little cause to kill us" (lit. "it would not be with them a small [thing] for a cause to kill us:" for dári marbad: see Idiom 1): dári mo híiaçari, ar Nairi, hí beʒ liime ríi uair, "'by my word,' says Naisi, 'we do not think that small from thee.'"

The two expressions jr móri le and hí beʒ le ("it is much with, it is not little with) are used to express the idea of unwillingness, or grudging": jr móri lioim aon íiñʒíi do tabairt dó, "I think it much—I grudge—to give one penny to him." The very same idea is expressed by hí beʒ lioim aon íiñʒíi, &c., "I think it not little—I grudge—one penny, I think one penny enough," &c. The two reverse expressions (hí móri le—jr beʒ le) are used to express willingness—not grudging &c.: hí móri lioim na tiri ba ro do éabairt dó, "I do not think it much—I am quite willing—I do not grudge—to give him these three cows;" which might also be expressed by saying, jr beʒ lioim, &c.—"I think it little—I would give more, I would have more, I would want more; I am willing—I do not grudge" &c.—do beiriúid ar m-híiaçari, ar ríad, naç beʒ liim a m-beuram ʒo Fíonh díolb, "'we give our word,' said they, 'we think it not small—we grudge—what (a = all that,—see page 43) we shall bring of them to Finn.'" (See Mr. Standish O'Grady's note, in the "Pursuit of Diarmaid and Grainne," page 140.)

When móri and beʒ are used with the preposition do, they give the idea of enough or not enough *for* a person: híori beʒ do (marbad bári h-aíreac) mar eiriç uairbe, "(the killing of your fathers) is not small to him—is enough for him—should suffice for him—as an *eric* (fine) from you;" híori beʒ duir a ba do híeiç ó Fíonh, "it was not little for you—it was enough for you—to take away his cows from Finn."

29. Woe to.

Ír maíre doḡ b-ḡear ríḡ, “woe to that man”; a ḡaíre do’ḡ dḡuḡḡ ḡoíḡear do’ḡ olc maíḡ, “woe to those who call evil good.” Expressions of this kind are sometimes elliptical; as, “Ír maíre ḡac ḡ-déaḡaḡḡ coíḡaíḡle deaḡ-ḡḡa, “woe [to him] who doeth not the counsel of a good wife” (lit. “it is woe who doeth not,” &c.).

30. So .. as: as .. as.

When these “correspondent conjunctions” are expressed in Irish, the second one is usually translated either by aḡur, “and,” or by le, “with:” aḡur a dubaíḡe ríḡa aḡ taḡ do bḡoḡ, a ḡac coíḡ aḡaḡḡa aḡur ḡo líoḡaḡ a ḡeup aḡ iḡoḡ, “and he said to her when his son should be so grown (coíḡ aḡaḡḡa) as that his finger would fill the ring” (lit. “so grown and that his finger,” &c.); do bḡ a íleaḡ coíḡ ríeaḡaíḡ le ḡol ḡuḡllíḡḡ, “his spear was as thick as the shaft of a mill” (lit. “as thick with.”)

Aḡur follows aḡlaíḡ or aḡla (thus, so, in this manner), much in the same way as it follows coíḡ; and in this use it sometimes answers very nearly to “viz.,” aḡ aḡlaíḡ do ríaíḡe Naíḡí acaḡ Deíḡḡe, acaḡ aḡ Ceḡḡaeíḡ ecaḡríḡa, “it is thus he found Naisi and Deirdre, and the Cenn-chaemh (a kind of chess-board) between them.” (Meaning, “it was thus he found, viz., with the Cenn-chaemh between them.”)

31. Every other day: every second day: every alternate day.

Phrases like these are often expressed in Irish by the indefinite pronoun ḡac, followed by the preposition le or ríe. ḡac le Coíḡaḡ aḡ dul cúḡ teampol, “going to the church every other (or every alternate) Sunday; ḡa taíḡ ríḡḡe ríḡ do Chua-ḡaíb de Daḡaḡḡ do bḡ í b-ḡlaíḡíḡ ‘Eíḡeḡaḡḡ ḡac ríe ḡ-blíḡaḡaíḡ, “these three kings of the Tuatha De Danann were in the sovereignty of Erin every other year” (i.e., each for a year).

32. The Head.

The word for *head* is used in Irish, as it is in most languages, in a great variety of idiomatic phrases. Some have been already noticed among the compound prepositions; and these and others will be understood from the following examples:—

A ḡ-ceaḡḡ blíḡḡa, “at the end of a year;” do bḡ ríḡaḡ a ḡ-ceaḡḡ ḡa ríḡḡe, “they were at the end of the field.” A dubaíḡe Naíḡí le ḡ-Ardan dul aḡḡ ceḡḡe Feḡḡur, “Naisi said to Ardan to go for Fergus” (“to go on the head of Fergus”): ríḡḡe aḡḡ a ḡ-ceaḡḡ, “turn thou back for them” (“on their head”). Ó ḡac líoḡ dul óḡ ḡ-conḡabaíḡe ríe aḡ ceḡḡ, “since I am not able to escape from this danger [that lies] before me”

(am ceann, "in my head" = before me). *Na c̄fad ad ceann, a Fhinn, a gur a g-ceann na Féinne,* "I will go to thee (or before thee), O Finn, and to the Feni" ("in thy head and in the head of the Feni"). *Ac ar beirid buaid ac ar beirid ac ar da ceann,* "and bear ye victory and blessing on its account" (*da ceann*, "from its head"). *Tar ceann gur faoi an toiceac nac naib baozal ar b̄c ar féin,* "although the rich man thought that there was no danger at all to (*i.e.*, of) himself" (*tar ceann gur*, "over the head that" = although). *I r iongha duitre an ghad r̄n do tabairt daigha tar ceann Fhinn, an Diarmaid* "it is a wonder for thee to give that love to me instead of (to) Finn," says Diarmaid" (*tar ceann Fhinn*, "over the head of Finn," in preference to Finn, instead of Finn).

33. A proper noun with the genitive of a noun of office.*

When a proper noun is followed by a noun in the genitive signifying a profession, office, trade, or calling, the resulting phrase has a curious idiomatic meaning.

Seažan an f̄ižeadóira, which is, word for word, "John of the weaver," means in reality "John (the son, son-in-law, servant, or some other close connection) of the weaver;" *Seažan na baigh-treabaiže,* "John (the son, &c.) of the widow."

If, while the proper name is in the nominative, the second noun is also in the nominative, the meaning is quite different, the second noun being then simply in apposition to the first;" thus *Feruzar an mhaoir* (gen.) is "Fergus (the son, &c.) of the steward."

Suppose, now, you have to express in Irish such a phrase as "the house of Fergus, the steward," in which the proper name must be in the genitive: as the two nouns are in apposition, the second, according to a rule of Syntax (Rule 6, p. 80,) should also be in the genitive: *teac Fheruzar an mhaoir*. But here is an ambiguity; for, according to the present idiom, this expression would also mean, "the house of Fergus (the son, &c.) of the steward." To avoid this ambiguity, a disagreement in case is allowed in such expressions, between the two nouns, when they are in apposition. Thus, "the house of Fergus, the steward" is *teac Fheruzar mhair* (in which *Fheruzar* is genitive and *mhair* nominative); whereas *teac Fheruzar an mhaoir* is understood to mean "the house of Fergus (the son, &c.) of the steward." So in Dr. MacHale's translation of Homer, the first two lines are rendered:—

Bhuic̄ Acuil̄ reir̄n, óiž̄ neair̄da, a' r̄ buan̄ fear̄z,
Acuil̄ mh̄c̄ Beil̄, an̄ žair̄ž̄ideac̄ teir̄n̄teac̄ žair̄z.

"The wrath of Achilles sing, O heavenly virgin, and his enduring

* The substance of this explanation and the illustrative examples have been taken from an interesting Essay on the present state of the Irish language in Munster, written and sent to the Royal Irish Academy by Mr. John Fleming, of Rathgormack.

anger, of Achilles, son of Peleus, *the fiery fierce hero.*" Here the last noun ζαρζιδεαc, with its two adjectives, is in the nominative, while Άκυλ, with which it is in apposition, is genitive.

In the first example, Rule 7, Syntax, βειη Sheαζαιη ηη φηζεαδoρια, accordingly, is not "the wife of John the weaver," but "the wife of John (son &c.) of the weaver;" the wife of John the weaver, would be expressed by βειη Sheαζαιη φηζεαδoρην.

31. Possession.

There is no verb in Irish corresponding to the English verb "to have" as expressing possession; and the sentence "the man has a book," is expressed in Irish by the verb τά and the preposition αζ, in this form, τά λεαβαη αζ ηη δυηηε, "a book is at (or with) the man:" τά αηηζεαδ αζυη ("money is with me"), "I have money;" cηα βέ αζ β-φυη αηηζεαδ ("whoever with whom is money"), "whoever has money." Νη φέηδην λε δυηηε ηη ηηδ ηαc η-βεηδεαδ αηζε δο εαβαηηε υαηδ, αζυη ηη β-φυη δο-ηηαηβεαcτ αζυηηα, "it is impossible for a man to give away what he does not himself possess, and I do not possess immortality" (word-for-word: "it is not possible for a man the thing which would not be with him to give from him, and not is immortality with myself"). Οο αηηελ Κοηcυβαη Βοηαc ααη δο φηαφηαηζ δε ηη ηαηβ φεδ ολλαιη αηζε δδ, "Conchobhar addressed Borach and inquired of him whether he had a feast prepared for him" (lit. "whether a feast was ready with him [*i.e.* Borach] for him [*i.e.* Conchobhar.>").

The use of pronouns in this idiom sometimes gives rise to further idiomatic complications. Cηα αζυηηηε αζ α β-φυη ηη φηηηηηηε? "Which of us has the truth?" This, is word for word, "Which of us with whom is the truth?" and the interrogative appears without any government or other syntactical connection. Some good authorities believe that the preposition αζ in this construction governs not only the relative α, but also, by a sort of attraction, the interrogative cηα. Τά βειη εηε α η-εοcαηη α β-φυη αηη κοηoηηη αηη, "there is another woman in Youghal who has a crown on him" (*i.e.*, to whom he owes a crown: *Iaiom* 16) Here, also, there is an apparent redundancy, the act of "having" being expressed doubly, namely, both by the relative α before β-φυη, and by αηη; and the relative, according to the same authority, would be governed by the preposition αζ of αηη. The sentence may be expressed without redundancy in this manner: —Τά βειη εηε α η-εοcαηη αζ α β-φυη κοηoηηη αηη. The last example exactly resembles the English "there is a man in Dublin whom I owe a pound to him:" and perhaps it would be better to consider it, like the English sentence, merely as bad grammar, which is to be avoided by using a different form of expression in the manner shown. The apparent redundancy of the first example, which is from a good authority, cannot, however, be got rid of in this way. So also ηη, cηα λεηη ηη τεαc φηη ("who

owns that house"), the *le* of *leir* would appear to govern the pronoun with which it is combined, and also the interrogative *cja*.

35. Ownership.

Ownership is expressed by the verb *ir* and the preposition *le*, with; *ir leatira an teac*, "the house belongs to thee" (lit. "it is with thee the house"); *ir lem' acairu na ba riu*, "those cows belong to my father" ("it is with my father those cows"); *cja léir na ba riu*, "who owns those cows?" ("who with him [are] those cows?") *Oiru ir le neac éiriu do Thuača De Danann na muca*, "for the pigs belong to some person of the Tuatha De Danann." (A wizard holds a golden branch in his hand, and King Cormac asks him) *an leat féir an éirioib riu?* "Does that branch belong to thyself?"

Observe the distinction between this idiom and the last in the following sentence:—*Tá airgead go léir agad, ac't ní leat féir é*, "thou hast plenty of money, but it does not belong to thyself."

36. Wanting a thing.

The idea of wanting a thing, including a wish to get it, is usually expressed by the verb *ta* and the preposition *ó*, from; *ta leabair uair*, "I want a book" (lit., "a book is from me;" *cneud atá uair?* "What dost thou want?")

37. Genitive plurals of Personal Pronouns.

Each of the three prepositional pronouns, *agairiu*, *agairb*, *aca*, has two different meanings, which are always easily distinguished by the context:—

1. Possession, as in Idiom 34: *Oo bí leabairu aca*, "they had books."

2. The sense of a genitive plural when following words denoting a part: *zac fear agairiu*, "each man of us;" *no eiriu an dara fear acoran do déanair an éleara*, "the second man of them (acoran, "of themselves") arose to perform the feat:" *cja agairiu ag a b-fuil an éiriuhe, air Fionn*, "which of us has the truth," says Finn" (*ag a b-fuil*, "with whom is"—"has:" see Idiom 34).

38. To give a name.

To give a name to a thing is often expressed in Irish by *to put a name on it*: *mar go tuiztar dá banuačac air bhéoil agur air Ohanann*, "as (the name) 'two ladies' was put on Bechoill and Danann: i.e., as they "were called 'two ladies.'" *Wair go d-tuiz clear air an z-clear riu*, "as he called that feat 'a feat:" (lit. "as that he put [the name] 'feat' on that feat").

Sometimes, also, to give such and such a name to a thing is expressed by "to say such and such a name with a thing:" *Wof-dá-*

ḡaileac nṡr a naidtear luimneac anṡu, "Ros-da-shaileach, which is called Limerick now" (lit. "Ros-da-shaileach with which is said 'Limerick' now").

39. Oe after comparatives.

The prepositional pronoun de, "of it," is often prefixed to comparatives, giving rise to some idiomatic phrases. Aṡur ṡion ṡo b-ḡuṡ cuṡ aṡuṡṡ do ṡarbad Oṡarmada, ṡṡ ṡóide do, ṡeubad (Aongus) aṡ ḡimṡne uaṡṡ, "and although we have no part in killing Diarmaid, Aongus would not *the more* receive the truth from us" (here ṡóide is de added to ṡó, the comparative of ṡón, great: for ṡion ṡo = "although not:" see Idiom 11). ṡr ḡuraidē d'Fhionn aṡ loṡṡna leaṡaṡaṡ, aṡ eaṡṡa beṡc aṡaṡṡ, "it is the easier for Finn to follow our track that we have the horses" (ḡuraidē = de after ḡura, comparative of ḡurur, easy): *i.e.*, "our having the horses makes it easier for Finn," &c.

40. "A man of great strength."

"A man of great strength," is expressed by the Irish ḡearṡ ṡr ṡóru ṡearṡ, which, translated word for word, is "a man (who) is great strength:" the words ṡóru ṡearṡ being in the nominative, and not in the genitive, as might be expected from the English "of great strength." This idiom is extremely common in Irish, the verb ṡr in some of its forms being always used; and, when translating it, remember that the Irish words—though in the nominative case—convey the exact sense of the genitive with "of" in English, and must be rendered accordingly. Nṡ ṡaṡb a ṡóṡṡaṡṡṡṡ nṡr ḡearṡ ba ṡó ṡru aṡur aṡṡeac ṡṡa Oṡarmaid, "there was not at the same time with him a man who had more gold and silver than Diarmaid" (lit. "a man [who] was greater gold and silver," *i.e.*, "a man who was *of* greater gold and silver.") Oo deaṡcaṡ aṡ beṡc ba ṡaṡṡda cṡuṡc, "I saw a lady (of) bright shape;" Calam ba ḡearṡṡ bṡad aṡur deoc, "a land (of) the best food and drink;" Oṡrṡṡ ba cṡreṡṡ ṡearṡ aṡ luṡc, "Oisín of mighty strength and vigor."

Sometimes the preposition ṡo (with) is used instead of the verb: as, ḡearṡ ṡo ṡóru ṡearṡ, "a man *with* great strength," *i.e.*, "a man of great strength."

41. A wish.

"I wish I had such and such a thing," is often expressed in Irish by some such form of phrase as, "Alas, that I have not got it!" the word ṡaṡ being generally used as the negative particle. Aṡ cṡuaṡṡ ṡaṡ ḡeaṡa ṡṡ ṡaṡṡ aṡur! "I wish I had the shepherd's pet!" (Here aṡ cṡuaṡṡ, "it is pity = "alas!" aṡur is used to denote possession, with its verb understood—Idiom 34: and the word-for-word translation is "it is pity not the pet of the shepherd with me." A Oṡṡa ṡaṡ ṡé am' abalṡṡṡ, "I wish I were an apple" ("O God, I not an apple"—or "in my apple.")

APPENDIX.

ADDITIONAL EXAMPLES OF DECLENSIONS.

FIRST DECLENSION.

Երեաց, a trout.

Singular.	Plural.
N. երեաց.	երյւց.
G. երյւց.	երեաց.
D. երեաց.	երեացայն.
V. a երյւց.	a երեացա.

SECOND DECLENSION.

Կոր, a foot.

N. կոր.	կորս.
G. կորբե.	կոր.
D. կորբ.	կորայն.

THIRD DECLENSION.

Քիշեածօրն, a weaver; masc.

N. քիշեածօրն.	քիշեածօրնիք.
G. քիշեածօրնա.	քիշեածօրն.
D. քիշեածօրն.	քիշեածօրնն.

Աժայր, a father; masc.

N. աժայր.	այրեւ, այրեւ- աճա.
